This Presentation is brought to you for free and open access by the Tampa Library at Digital Commons @ University of South Florida. It has been accepted for inclusion in Scholar Commons Publications by an authorized administrator of Digital Commons @ University of South Florida. For more information, please contact digitalcommons@usf.edu.

Set the Default to **OPEN ACCESS.**

Open Access Blog

Neuroanthropology
Understanding the encultured brain and body

Neuroanthropology forms part of PLoS Blogs, and is one of eleven founding blogs that joined with PLoS.org, everyONE and Speaking of Medicine to provide a comprehensive network that covers science and medicine. Neuroanthropology examines the integration, as well as the breadth, of anthropology and neuroscience. Sometimes we do straight neuroscience, other times pure anthropology. Most of the time we'll be somewhere in the middle. The blog thrives on intersections and convergences, aiming to mesh the insights of neuroscience and anthropology into a more cohesive whole. We often throw some psychology, philosophy, evolution and human biology into the mix as well.
