ISSN: 2167-8577

Published By:

Juan Carlos Toledano Redondo
Lewis & Clark College, USA
toledano@lclark.edu

In an alambique (n. still), ancient alchemists sought to turn base metals into gold. [University of South Florida Tampa Library](#) offers this journal as a distiller of (im)possible dreams of science fiction and fantasy.

Alambique (ISSN 2167-8577) is a peer-reviewed, open-access journal devoted to scholarly research and criticism in the fields of science fiction and fantasy originally composed in Spanish or Portuguese. *Alambique* will accept scholarly articles written in English, however, as long as the main focus of the study concentrates on one of the Spanish or Portuguese cultural regions of the world. It will also accept scholarly articles written in Spanish, Portuguese and English that focus on relevant cultural contact areas, i.e. Catalan, Guarani, Nahuatl, etc. In addition, *Alambique* intends to publish old and/or largely forgotten literary works that helped forge the Spanish and Portuguese tradition in science fiction and fantasy. These texts, whenever possible, will have accompanying English translation.

Call for submissions:

Issue Number 1 – Scheduled for publication in August 2013

Submit your article [here](#). **Deadline: February 28, 2013**

Website translation in Spanish available [here](#). Portuguese translation coming soon.

Statistics in Volcanology (SIV) is launching in 2012 (ISSN 2163-338X) as the open-access, peer-reviewed journal of the IAVCEI Commission on Statistics in Volcanology ([COSIV](#)). The aim of *SIV* is to provide a forum for volcanologists and statisticians to share experience and expertise related to the development and application of innovative analytical methods. Through this forum, it is hoped that we will improve our understanding of volcanic events and processes, to the benefit of all people who live with active volcanoes.

SEA LEVEL CHANGES INTO MIS 5: FROM OBSERVATIONS TO PREDICTIONS

Hosted Conferences

[Follow](#)

Palma de Mallorca, April 10-14, 2012

Workshop Information

The purpose of this NSF-sponsored workshop was to bring together an elite international group of researchers to discuss and promote opportunities for collaboration on the topics of sea-level data acquisition, calibration, and modeling. The workshop focused on the interpretation of sea-level changes during marine isotope stage 5 (MIS 5) and the onset of MIS 4.

ISLAC at the University of South Florida Presents:

The Institute for the Study of Latin America and the Caribbean (ISLAC) at USF in collaboration with the Florida Humanities Council and numerous community sponsors will bring together the most prominent international scholars of Hispanic Florida for a two day conference to commemorate Florida's Quincentenary. New research will be presented around the following themes:

1. Spanish Conquest and Colonization, 1513-1821
2. Spanish Florida in the 19th and 20th Centuries
3. Trans-Atlantic Studies: Migration, Exile, Diaspora
4. Cultural, Social, and Economic Exchange in Florida
5. Latin America and Florida: Today and Tomorrow
