Library Assessment: Anthropology  
Fall 2016

Nelson Poynter Memorial Library  
University of South Florida St. Petersburg

The Nelson Poynter Memorial Library, physically located at the University of South Florida St. Petersburg (USFSP), houses an extensive collection of materials that support the educational, research, and service missions of USF St. Petersburg. USF St. Petersburg faculty, staff, and students have on-site access to the Poynter Library's collection of over 222,578 items, including monographs, current periodical and serial subscriptions, newspaper subscriptions, and audiovisual titles.

In addition to resources held at the USFSP library, the shared electronic resources of the USF System are available at all times, except for brief system maintenance. Currently, the USF Libraries subscribe to over 800 proprietary databases, and more than 26,000 electronic journals. Additionally, USFSP faculty and students can access documentaries and instruction videos available online through streaming media. All resources are available remotely to currently affiliated USF students, faculty, and staff through the use of NetID or an authenticated server. USFSP faculty, staff, and students also have efficient interlibrary loan access or in-person borrowing privileges to resources of all libraries of the State University system. Through a series of formal agreements, USF St. Petersburg students and faculty borrow materials freely within the state, throughout the United States, and internationally.

The library is a three-story, 81,000 square feet building, offering 21 rooms for group study, seamless wireless access, an information commons with networked computers for student research and study, laptops and tablets for student check-out, and a dedicated instruction room. A wide variety of computer hardware and software is available to students, including networked collaboration areas with large monitors and shared access points, and a video production area freely available for student use.

A faculty librarian, currently Anthony Stamatoplos, serves as liaison to the Anthropology program, assigned to support specialized collection development and offer library instruction to classes and individuals. Faculty members are encouraged to request purchases of monographs, media, instructional materials, or new electronic resources. All distance education students, courses and programs receive reference and instruction support by both the Anthropology librarian and the Distance Education librarian. Distance Education support for students includes phone, chat and email reference assistance, as well as online subject guides developed by liaisons.
