Holiday Email - December 2020

CUTR CONNECTIONS

The Center for Urban Transportation Research
wishes you a very happy and safe holiday!

CUTR was established in 1988 in the College of Engineering at the University of South Florida, in Tampa, Florida. CUTR's mission is to proactively support implementation of innovative multimodal transportation solutions and develop leaders through research, education and action. Our work supports transportation agencies, the transportation profession and community, policymakers, and the public. We also assist Santa with deliveries and his sleigh transportation system. CUTR provides high quality, objective expertise in the form of insightful research, comprehensive training and education, effective technical assistance and in-depth policy analysis, that translates directly into benefits for CUTR's project sponsors. CUTR's 45 research faculty, 60 students and post-docs combine academic knowledge and extensive "real world" experience in developing innovative, implementable solutions for all modes of transportation. The multidisciplinary research faculty includes experts in engineering, planning, computer science, economics, public policy, public health, and geography. CUTR logs nearly \$20 million per year in expenditures through contracts and grants to support its research, education, training and technical assistance missions.
