USF Researcher Uses NSF Grant to Improve Safety of Autonomous Vehicles

Events

Friday Transportation Seminar Series
Fridays from August 30 - November 22
12 PM - 1 PM
Learn more about
As the development of autonomous vehicles (AV) gains steam and continues to disrupt the automobile industry, an associate professor at the University of South Florida believes advanced radar may be key in improving the safety of these driverless cars. Read more.

Congratulations to THEA CV Pilot Team for being named the ITS World Congress Hall of Fame 2019 Americas Winner! Read more.

As transportation infrastructure continues to expand from isolated nodes to large interconnected networks, cybersecurity is a critical concern for transit agencies. This report provides recommendations and
suggested policies for transit agencies that may help reduce cybersecurity liabilities. The recommendations are informed by a literature review of existing vulnerabilities, a survey of Florida transit agencies, a taxonomy of transit technologies, outcomes of cybersecurity working groups and workshops, and hands-on analyses of several technologies, all of which were conducted as part of this project.

USF Events and News

With the assistance of Jason Jackman, CUTR was proud to participate in the Running of the Bulls Homecoming Parade at USF. Students and staff rode bicycles, scooters, and golf carts to promote micro-mobility on and off campus. Click for more pictures.
CUTR was established in 1988 in the College of Engineering at the University of South Florida, in Tampa, Florida. CUTR’s mission is to proactively support implementation of innovative multimodal transportation solutions and develop leaders through research, education and action. Our work supports transportation agencies, the transportation profession and community, policymakers, and the public. CUTR provides high quality, objective expertise in the form of insightful research, comprehensive training and education, effective technical assistance and in-depth policy analysis, that translates directly into benefits for CUTR’s project sponsors. CUTR’s 45 research faculty, 60 students and post-docs combine academic knowledge and extensive “real world” experience in developing innovative, implementable solutions for all modes of transportation. The multidisciplinary research faculty includes experts in engineering, planning, computer science, economics, public policy, public health, and geography. CUTR logs nearly $20 million per year in expenditures through contracts and grants to support its research, education, training and technical assistance missions.
