The LeaderSpeak Series is designed to introduce students to the variety and complexity of leadership needs in today's society. Presenters from a wide variety of expertise and experience will be invited to articulate a critical need in a particular area and providing reflections on the role of leadership in meeting that need.

Friday—9:00 am to 5:00 pm: Corporate Leadership Retreat at Derby Lane

The Corporate Leadership Retreat is a unique program that provides an opportunity for USF St. Petersburg students to see firsthand how leadership development fits into the corporate setting. It also creates an opportunity for students to learn how the skills they are developing now will prepare them to be more valuable employees and citizens of their community. Each semester, a different Tampa Bay area business hosts the conference, and participants gain the following from the leaders of those corporations: an introduction to the leadership philosophy of a major corporation, workshops relating to leaders and/or leadership in that field, on-site demonstrations and training of work in that field and networking opportunities with other students with similar career goals and leaders in the field.
Please RSVP: <http://usfsp.edu/leadweek>

Ancient Shell Cities of Florida's Nature Coast

Ancient Shell Cities of Florida's Nature Coast
Dr. Kenneth E. Sassaman

Hyatt and Cici Brown Professor of Florida Archaeology, University of Florida

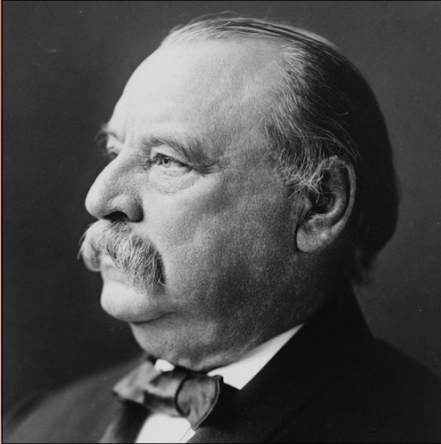

TUESDAY, FEBRUARY 28 - 5:00 PM - DAVIS HALL 105 - University of South Florida St. Petersburg

The north Gulf Coast of Florida is one of the least developed areas of the state and one of the least known to archaeologists. A new long-term project to locate and document pre-Columbian sites in the area has already uncovered an array of archaeological finds, notably the remains of settlements as old as 4000 years. These complement a record of massive shell mounds and mortuary facilities that were impacted by both natural and cultural forces in the last two centuries. The entire area today is subject to ongoing destruction from rising sea, underscoring the need to salvage information about this relatively unknown area before it is destroyed.
