Dear Rich:

Thank you for your note and for sending me copies of all the correspondence between you and John Dobson.

I have talked with John Sparks, Head of the BBC Natural History Unit, and also with George Page and David Heeley at WNET/New York (producers of the PBS NATURE series). As you know, the BirdWatch program will be broadcast as part of NATURE.

John Sparks would like Audubon to be more involved in this program, and I would like that too. Of course we are involved in a very important way through you and we will get some identification with the program through your efforts.

Ideally this show would be co-produced by Audubon but now that the BCC and WNET have put the financing together, the opportunity for that has gone.

I am glad you are doing everything you can to help them and I hope you appear on camera in the show. If you see anyway to increase Audubon's identification with the program don't hesitate to pursue it!

With best wishes,

Sincerely,

Christopher N. Palmer
