AV Statistics 1995-2002

Space and Size

The Library's 7500 sq. ft. Media Center has a large array of media and distance education technologies. A broadcast studio receives and sends conferences, Project Oceanography, USF credit classes, etc. using ITFS technology, satellite uplink and downlink, and Pictel. During broadcasts, all forms of sound and image learning resources are exchanged via Elmos, computers, slides, overhead transparencies, videotape, dvd, and audio. The Media Center also has 6 large and small group listening and viewing rooms for all audio and video formats, a graphics lab, a studio and control room, production room, dubbing and archive room, storage and repair rooms, and an IMC that seats 44. It also provides for duplication of copyright compliant learning resources. Recently acquired computer technology now allows for digital storage and duplication of audio and video learning resources.

Deliveries and set ups

As more equipment is purchased for each room, there is less need for deliveries. Use of equipment, though, rises.

1995	4007
1996	3399
1997	2994
1998	2636
1999	3459
2000-2001	4203
2001 (Oct)	5123
2002 (Aug)	2263

Collections

The AV Circulating Collection includes:

499 audiocassettes
457 Cataloged Instructional Materials
2200 Waiting to be Cataloged Instructional Materials
6903 Juvenile Books
4755 Videotapes
210 DVD's
1043 LP's
357 CD's
35 Kits
4 slide sets
16048 Total Items

ID Cards

The USF Card system is centralized through a database that involves computers, software, dedicated lines, color printers, monitors, and electronic digital cameras.

2002(Spr&Sum)	129

Distance Learning

USF St. Petersburg has a complete broadcast studio with PicTel, 3 PicTel classrooms, 7 interactive ITFS rooms, and all other classrooms receive ITFS technology. The Library Media Center is responsible for the maintenance, room upkeep, and trouble shooting, and in many cases, installation of the technologies.
