Nature "Animal Odd Couples"

showcases the most unlikely cross-species relationships imaginable: a chimp bottle-feeding a tiger cub; a giant tortoise snuggling a baby hippo; a black crow parenting a meerkat.

Does this bonding form only when animals are removed from their natural environments?

Or are they evidence of a broad array of emotions among animals?

Witness these remarkable relationships and explore what they suggest about the nature of animal emotions.

Airs Thursday, November 29, at 8 p.m
