RE: Haynes Williams Citrus; Okeechobee County; App.# 901231-58

Dear Mr. Asmussen:

In response to your letter dated July 25, 1991 to Mr. Peter Thompson, Hoover-Thompson and Assoc. on the referenced project, please accept the following information relative to comments # 13 and 15.

13. In discussions with the property owner, Mr. Haynes Williams, plans for construction of the project are tentative at the present time, and will be dependent on numerous personal and business factors. Consequently, it will be assumed that the project construction will commence approximately two and one half years after issuance of the permit. A schedule would be as follows:

TASK	DATE
Conduct baseline environmental monitoring	January 1994
Begin project construction	February 1994
Submit baseline environmental report	March 1994
Complete project construction	August 1994
Conduct first annual monitoring	August 1995
Submit first annual report	October 1995
Conduct fifth (final) monitoring	August 1999
Submit final monitoring report	October 1999

If the actual schedule for construction differs from these assumptions, modifications to this schedule will be provided in the future.

15. We have received a copy of the letter comments from Florida Game and Freshwater Fish Commission (FGFWFC), and have discussed these issues with their staff on several occasions. A copy of my response to FGFWFC is enclosed for your review. I expect the commitments of Mr. Williams to survey for nesting caracara and sandhill cranes prior to construction will satisfy these concerns.
