Department Overview

Comprised of the Circulation, Reserves, Stacks Maintenance, and Interlibrary Loan units of the Nelson Poynter Memorial Library, the Access Services Department is primarily responsible for the smooth flow of library materials to borrowers. The department consists of 5 employees: Virginia Champion, the Head of Access Services, along with 4 Library Specialists. During the 2015/16 year, the staff consisted of Cynthia Brown, Lexi Terry, Samuel Holloway, and Angela Hood. In addition to this staff, the department has 3 student employees working an average of 45 hours a week. Part-time staff help with departmental tasks, including shelving, shelf reading, installing displays, interlibrary loan requests, and special projects.

New Departmental Responsibilities

In addition to management of the general circulating stacks, Access Services works with Technical Services staff to handle daily maintenance of the Audio-Visual and Periodical stacks. This includes shelf-reading as well as pulling items that Collection Development has determined can be withdrawn or replaced.

Samuel Holloway has also taken responsibility for identifying library items with missing, incorrect, or illegible call number labels. He relabels the materials properly and supervises their integration back into the collection.

Significant Departmental Accomplishments

- **Visits to the Library:** After a five year record of increasing visits, this year's door count is down 6.5%. It was not possible to keep an accurate count with an antiquated security gate requiring recalibration every few months. A new Sentry WAM security system was installed in late June 2016. It is expected that future gate counts will be more reflective of actual library use.
- **Keep Building Open and Running:** Virginia Champion coordinates the security guard coverage with the USFSP Office of Campus Safety. After a required bidding process, the Campus Safety department has changed the service from Universal Protection to Weiser Security Services. Weiser Security is expected to begin working here with in the Fall 2016 semester.
- **Service Desk Skills Revision:** Virginia Champion and Tina Neville identified areas of concentration for reviewing and updating skills needed to work at the Service Desk. Members of the Access Services and Public Services staff met for a workshop on and dialog about the various responsibilities of the public service desk in the library.
- **Proxy Card Handout and Online Form:** Angela Hood with assistance from Virginia Champion created an informational handout and website with an online form for GA/TAs and their professors to use.

Circulation and Reserves

- **Stacks Maintenance:** Stacks maintenance is an ongoing departmental responsibility; this past year the circulating collection has been shifted so that all shelves emptied by weeding are in use and all shelves have been returned to a uniform height.
- **Growing Reserve Circulation:** The circulation of items on reserve continues to be a considerable part of Service Desk responsibilities. These items consist of books on course reserve, but also the library laptops, study room keys, USB drives, whiteboard markers, and calculators. The high demand for library laptops and study room keys continues.

Average Lending Turnaround	15.63 hrs.	18.73 hrs.	20 hrs.	20 hrs.	1.23 days

Definition of terms

- **Fill Rate:** The percentages of materials that are provided out of the total number of interlibrary loan requests received (both borrowers and lenders)
- **Turnaround:** The amount of time from the receipt of the request until the request has been resolved. For borrowing this could be the receipt or cancelation of the ILL request, for lending it could be the shipping or cancelation of the ILL request.

Continuous Challenges:

Staffing the Service Desk

- Because the department is staffed at the most bare-bones level, providing coverage for the Service Desk is a continual challenge. It is particularly challenging to schedule staff annual leave time and still provide adequate coverage. When one individual is out sick, other staff must be pulled from their other work assignment to provide Service Desk coverage. If more than one person is out sick at the same time, staff from other areas of the Library must be pulled from their work assignments and brought in to assist.
- Additionally, the Access Services Department relies on student workers funded by Federal Work Study money rather than having a consistent, dedicated line or OPS funding. Thus, the number of student workers, who do critical but low-level library duties, can significantly vary semester to semester.
- As new staff and student workers are hired, training new employees is a continuous effort and responsibility of the Access Service Department. Training consists of basic library circulation procedures, but also includes customer services, and learning general library policies and procedures so that the new employees can best refer library visitors to the appropriate people, services, and resources.
- All new departmental workers require extensive initial training in the various library software, library guidelines, university policies, departmental practices, and library and university information. For new student workers, this training regularly takes 1 month before they are adequately prepared to work with minimum supervision. Student worker turnover occurs every semester, thus this training time is amplified by relying on a very transient student workforce.

Managing and Transferring Reference Questions across Departments

- Access Services staff, particularly the student workers, continue to have trouble distinguishing between questions best answered by themselves and those that are best handled by the on-call Reference Librarians. Student workers are particularly prone to inappropriately, and potentially incorrectly, answering research-based questions.

Keeping up with Software Program Changes

- While OCLC recently changed its software platform from WorldCat to WorldShare, requiring Access Services staff to learn the new software systems and login conventions, a new release indicates that they are now working to blend the ILLiad software into the WorldShare program. This will, once again, require mastering new software, and is particularly an issue for interlibrary loan staff.
- Other software programs utilized in the day to day Access Services work also are regularly updated, requiring the staff to continually learn new systems and tools.

Keeping up with Student Supply and Technology Demands

- Student use of laptops, calculators, and whiteboard markers is increasing and keep staff at the Service Desk steadily busy.

Future Directions:

Next Generation Integrated Library System (ILS)

- A USF Next-Gen ILS Implementation team has been pulled together to ensure the least disruptive transition to the new system, which is expected to 'go live' in July 2017. The transition work includes cleaning up stray data and records in the current ALEPH system rather than importing them into the new Innovative Sierra program. The move also necessitates training and familiarity with the Innovative/Sierra program.

Reserve Collection Project

- As part of the state-wide Textbook Affordability Project, Poynter Library is beginning a pilot project placing library owned books that are used as course texts on Reserve. These books will be entered into the ILS course Reserve system and be available for 3 hour check-outs.

Determining Gate Count Accuracy

- The Sentry WAM security gates were installed late June 2016. If two people walk through the gate simultaneously, it is probable that the gate will only register one patron. We plan to collect data to enable us to develop a formula to correct inaccuracies in the gate count.
