## Sustainability Has New Campus Leader

Brian Pullen

Meet Brian Pullen, sustainability planner in the Office of Sustainability. A native of Idaho Falls, Idaho, Pullen received a bachelor's degree in Organizational Communications from Boise State University in 2013 and a master's degree in Global Sustainability from USF in 2015. He also works as Development Associate for the nonprofit Sustainability

International, helping to alleviate poverty in Nigeria through oil spill cleanup efforts.

Pullen's love for the environment began at a young age as a child who often played outdoors. "I became really concerned about climate change and its effect on the ecosystem," he said. "So I knew around then that I wanted to pursue a master's degree and career in sustainability.

"My biggest hopes for this year are to complete our campus Climate Action Plan, improve our sustainability-related curriculum and research, and implement new sustainable initiatives on campus that will speak loudly about USFSP's commitment to sustainability," Pullen said. "Long term, my goal is to help make sure USFSP reduces our environmental footprint to the point that we are a national figure for our sustainable efforts."

stemmed from conversations surrounding the 50th anniversary of the end of the Johns Committee.
