Subject: [Genealib] MS Word macro to invert given surnames
Message-ID: <000001cfae94\$3d5076b0\$b7f16410\$@comcast.net>

I have undertaken a huge editing project consisting of 5 years of genealogical clippings from the years 1929 - 1934.

To facilitate the project, I seek assistance with a MS Word 2010 macro. Developing an index is easy enough for text that is in the desired order of the index.

However, I seek to index persons names from the news articles that are in the format: given_name(s) surname.

I seek a macro to invert the index entry to: surname, given_name(s)

I will appreciate whatever assistance you may be able to provide.

Regards, Patrick

I actually did that in Word about 25 years ago (really!) Must have been Word One back then, It does work, but it takes a long time. Of course today's computers are orders of magnitude faster. When we would run 600 or so names it would take about 6 hours. Just a thought - would it not be easier to type it into a spreadsheet and then resort that way (using one cell for name and one for surname)? Or even get a cheap flat file database and do it that way?

Hi Patrick,

What I'd try to do is save the Word document as a txt file, then open it in Excel and use the Excel wizard to import it with the first and last name in separate columns. Then you could reverse the two and resave as a txt file and open it in Word. You'd have to do some cleanup going in both directions, but it might work.

The History and Genealogy Reading Room at the Connecticut State Library will be closed August 15 through September 5 for renovations. However, from August 19th through September 3 the public will be able to access most library and archival materials. Use of Secured Collections, Archives, and Offsite Materials will be limited to between 11 am and 3 pm from August 19 and September 3. The reading room will undergo extensive renovations to include new carpeting, painting, electrical work for enhanced computer usage and installing walls around the archival reading area for greater security. Also, the hallway will be reconfigured creating a new entrance to the Reading Room and new photocopy area.

The newly renovated History and Genealogy reading room is scheduled to re-open on Saturday, September 6, 2014. For more information please contact the History and Genealogy department at (860) 757-6580.

Subject: [Genealib] Question About Book Scanners
Message-ID: <004d01cfafeb\$989b3e80\$c9d1bb80\$@ahsgr.org>

Julie,

Thanks for your response to my question! I did subscribe to Dick Eastman's blog. I learned about the different types of scanners but still need to research some more.

Thanks Again,

Diane Wilson

It looks like Dick Eastman has a new article on scanners, etc. via his "Plus Edition" newsletter. Might be worth it to subscribe!

<http://blog.eogn.com/2014/07/27/scanning-old-books/>

Cheers,

Julie

Content-Type: text/plain; charset="us-ascii"

I have a patron whose great-grandfather from Gilmore County, Georgia was sent to the New York Federal Penitentiary in Buffalo around 1882. Andrew Jackson "Jack" Bearden was sentenced for 2 years but later pardoned by Chester A. Arthur. The story goes that he was a participant in a group of about 20 men in burning down a "revenuers" house after that man identified several members of the community as having stills.

Our questions would be - What resources are there for penitentiary records? And why would he have been sent to New York from Georgia? She'd like to get a little bit of an idea of the truth of this situation.

Thanks for any help.
Gretchen

Hi Gretchen,

If the "revenuers" were Federal officers, the case would have been a federal, not a state, case. Then the person convicted could be sent to any Federal Penitentiary. I researched a man from New York who was convicted in Nevada (ca. 1912) and served his sentence in Washington state. His records were at the National Archives branch in Seattle. I don't know how the Federal system decided where to send people. I know of a man convicted in Maine in the 1950s who served his sentence at Lewisburg in Pennsylvania.

So I would suggest trying the National Archives, for prison records and also for records of Presidential pardons. Also Gilmore County, Georgia, newspapers for the era. The incident and the trial should certainly have been newsworthy at the time.

Good luck!

Subject: [Genealib] NC Digital Collections - Beta Redesign - Please let us know what you think
Message-ID: <A92BBB61D74BA04A9451F0E547E4E80036F8328A@NCWWDITMXMBX35.ad.ncmail>

Hello!

We are excited to be demoing a beta redesign for the North Carolina Digital Collections website (<http://www.digital.ncdcr.gov>), and we'd like to get your feedback!

Whether you are a frequent user of the Digital Collections, or this will be your

first time, we'd like to invite you to head over to the beta site and explore. Love it? Hate it? You can give us feedback via the survey form linked at the top. We'd love to hear your thoughts! Here is the link to the beta site:
<http://digital.ncdcr.gov/cdm/demo>.

The survey will be up through August 13th. The North Carolina Digital Collections contain over 90,000 historic and recent photographs, state government publications, manuscripts, and other resources on topics related to North Carolina. The Collections are free and full-text searchable, and bring together content from the State Archives of North Carolina (<http://www.ncdcr.gov/archives/Home.aspx>) and the State Library of North Carolina (<http://statelibrary.ncdcr.gov/>).

Thank you in advance and please share with your patrons and colleagues.

Besy,
Rebecca

Laura,

I am not sure if you want to ship them this far, but I have used the Ohio Bookstore <http://ohiobookstore.net/> for a number of books. They do a great job . . . although b/c they are good they have a backlog, so it does take awhile.

Subject: [Genealib] NC marriage

Message-ID: <CAAwgk_pn7MhLHwxFR4sv6qOzhyEX1C2mE8Ufo56+efYHw90rpQ@mail.gmail.com>

Kelsey,

As others have said, Dillon, SC is a prime place to try. Also, folks from our area went to Emporia, VA to elope.

And, as someone else said, the marriage records on Family Search for NC are great.

If the above strikes out and there wasn't a newspaper report, your patron may be stuck with the county by county search. Or oral history - anyone still alive who would know?

As well as surrounding counties, they may have gone to the beach. I had a patron just the other day whose parents were from the Piedmont area but he found the license in the New Bern/Morehead City area. :)

Good luck!

Traci Thompson, MLIS, CG

Opinions expressed are my own.

CG and Certified Genealogist are proprietary service marks of the Board for Certification of Genealogists and are used under license by Board-certified genealogists after periodic genealogical competency evaluations. The Board name is registered in the U.S. Patent and Trademark Office.

Hello,

We have a customer who is trying to find a marriage license for her parents, who were married in 1939. Both of her parents were from North Carolina, with her mother being from Franklin County and her father being from Columbus County. She has their marriage date from the family Bible, but the Bible does not list the location of the marriage. She has checked in Columbus County and Franklin County for a marriage record, but was

unable to find one.

Does anyone have any suggestions for finding a marriage record? The only thing I could think of is to check in all surrounding counties, which could be a very long process.

Thanks,
Kelsey

TRACING AMERICAN ANCESTORS BEFORE 1850

Presented by Don Wilson

Before 1850, the lack of census detail and official vital records can make genealogy difficult. Your immigrant ancestor may seem to be out of reach. Explore sources and techniques to overcome that barrier with RELIC?s Don Wilson.

This free 90-minute program will be presented at Bull Run Regional Library on

Thursday, August 14, at 11 a.m. and be repeated on Tuesday, August 26, at 7 p.m. To register please contact RELIC at Relic2 at [pwcgov.org](mailto:Relic2@pwcgov.org), or at (703) 792-4540.

THE DAR LIBRARY: RESEARCHING

THE REVOLUTION AND BEYOND

Presented by Eric Grundset

DAR Library Director Eric Grundset will present a program at Bull Run Regional Library on Thursday, September 11, 2014, at 11 a.m. describing one of the nation's largest collections devoted to genealogy and local history.

Since its founding in 1896, the Daughters of the America Revolution Library has grown into a specialized collection of American genealogical and historical manuscripts and publications, as well as powerful on-site databases. The DAR Library collection contains over 225,000 books, 10,000 research files, thousands of manuscript items, and special collections related to African American, Native American, and women's history, genealogy and culture. Nearly 40,000 family histories and genealogies comprise a major portion of the book collection, many of which are unique or available in only a few libraries in the country. The library, open to all, is located in Washington, D.C. Non-members pay a small research fee.

To register for this free program please contact RELIC at Relic2 at [pwcgov.org](mailto:Relic2@pwcgov.org), or at (703) 792-4540.

TENTH ANNUAL "RELIC AFTER DARK"

WILL FEATURE JOHN PHILIP COLLETTA.

Registration is now open for our fall special event, our tenth annual "Relic After Dark," to be held on Saturday evening, September 20, 2014, from 7 to 11 p.m., at Bull Run Regional Library. We've engaged nationally known genealogist and popular speaker John Philip Colletta to return after a five year absence. His topic: "Is Any Body There? Tracking Ancestral Remains." It is a humorous account of some of his experiences searching for burial places of ancestors, along with lessons on finding ancestral graves and conducting genealogical research in general. The event, costing \$25 per person, will include a buffet dinner, with assorted beverages, and allow opportunity to do your own genealogical research using RELIC's facilities. Seats are limited, so early registration is highly recommended. Please make checks out to Prince William County (put "Relic After Dark" in the memo line) and send them to RELIC, Bull Run Regional Library, 8051 Ashton Avenue, Manassas, VA 20109. Please include a phone number and email address. Registrations will be accepted in the order that payment is received. Please

contact RELIC staff at relic2 at pwcgov.org<mailto:relic2 at pwcgov.org> or 703-792-4540 for further information.

GENEALOGY 201: BEYOND THE BASICS

Presented by Tish Como

Genealogy 101 introduced basic resources and techniques for researching your family's history. Genealogy 201 presents alternate resources to enhance your family's history and advanced search techniques to help maximize your results from online databases including census records, passenger lists, maps, and books. RELIC's Tish Como will present this program on Tuesday, September 30, at 7:00 p.m., at Bull Run Regional Library.

To reserve a seat for this free program, contact RELIC at (703) 792-4540 or at relic2 at pwcgov.org<mailto:RELIC2 at pwcgov.org>.

SAVE THE DATE: OCTOBER 28

October 28, 2014, 7 p.m. Lecture by noted author Andrew Jackson O'Shaughnessy on "The Men Who Lost America: British Leadership, the American Revolution and the Fate of the Empire." This title won Dr. O'Shaughnessy both the 2014 George Washington Book Prize, which recognizes the year's best books on the nation's founding era, especially those that have the potential to advance broad public understanding of American history, and the 2014 New York Historical Society's annual American history book prize. He is the Vice President of the Thomas Jefferson Foundation, Saunders Director of the Robert H. Smith International Center for Jefferson Studies and Professor of History at The University of Virginia.

"Genealogy Doctor" Accepting Appointments for Research Help

Don Wilson, head of RELIC, sets aside time each month for free private sessions to mentor persons researching their family history. A thirty-minute session can be used to discuss and analyze an historical or genealogical problem that has stumped you.

Daytime and evening hours are possible. To set up an appointment, please call RELIC at 703-792-4540 or email relic2 at pwcgov.org<mailto:relic2 at pwcgov.org> . Bull Run Regional Library is located at 8051 Ashton Avenue, Manassas, VA 20109.

Have a question about Prince William County history, places or families? Need guidance with your genealogical research? You may contact RELIC staff for help and advice at Ask RELIC<<http://www.pwcgov.org/government/dept/library/RELIC/Pages/Ask-RELIC.aspx>> or by calling us at 703-792-4540. Hours, June to August (ET): Monday-Thursday 10am-9pm, Friday-Saturday 10am-5pm. Closed Federal holidays. On September 7 we'll resume Sunday service, noon-5pm.

Miss Gladys Rose Is Given Shower Monday Afternoon
Miss Gladys Rose, daughter of Mr. and Mrs. Manuel Rose, of Pleasanton, was honored at a shower given at the home of her parents on Rose avenue Monday afternoon.

The shower was given by Mrs. Myrtle Lanini. It included all the neighbors of Miss Rose living on Rose avenue. A set of china ware was given Miss Rose by those attending.

A social afternoon was enjoyed after which refreshments were served.

Miss Rose is to be married on June 9 to Ed Pao, of San Francisco.

Among the guests were the Mesdames Myrtle Lanini, Cecile Gibson, Isabel Rose, Irene Allen, Anne Nevis, C. Vizzolini, A. Fracisco, Emily Amaro, Lillie Fiorio, Paula Garibaldi, Catherine Lambert, Mary Sylvia, John Fracisco, Anna Semas, Clarice Semas, John Dutra, Maggie Azevedo, Mamie Avilla, Libby Mello, Lillie Jackson, Mabel Rosa, Blanche Bailey, Nancy Regalia, Ben Messa, S. DiGuillio, Manuel Rose, and the Misses Evelyn Silveria, Freda Garibaldi, and Lorraine Rose, and the honored guest, and Mrs. Lanini, all of Pleasanton.

Hi Patrick,

What's I'd try to do is save the Word document as a txt file, then open it in Excel and use the Excel wizard to import it with the first and last name in separate columns. Then you could reverse the two and resave as a txt file and open it in Word.
You'd have to do some cleanup going in both directions, but it might work.

Subject: [Genealib] Tennessee Librarians' Day Conference, 19 Sept 2014

Message-ID: <D006A09A.1B4E9%acrow@ancestry.com>

Good afternoon,

The Tennessee State Library & Archives and Ancestry.com would like to invite you to the Librarians Day Conference being held on Friday, 19 September 2014 at the Nashville Public Library, 615 Church Street, Nashville, TN. Registration begins at 9:00am; presentations begin at 10:15am

The day is designed for librarians serving the genealogical community. Topics to be

presented are:

- * Ancestry at the Library: Tips and Tricks on How to Help Patrons by Anne Gillespie Mitchell
- * The Rich Collections of the Tennessee State Library and Archives by Chuck Sherrill
- * Free Data Collections on Ancestry by Kim S. Harrison
- * Hidden Treasures at Ancestry by Lou Szucs
- * Tips and Tricks to Identify the Right Resources on Ancestry by Juliana Szucs Smith
- * Live Q&A Panel with all of the speakers

Registration for Librarians' Day includes lunch and syllabus materials. The cost is \$22.09.

Register early, as there is limited seating. There will be no walk-in registration available. Register at:

<http://www.eventbrite.com/e/ancestry-librarians-day-tickets-12295693751>

We would also like to invite you to attend the Tennessee Ancestry Library Event (TALE) the next day (Saturday, 20 September) at the Sheraton Nashville Downtown, 623 Union Street, Nashville, TN). Registration for this all-day event is \$32.64. Lunch for the Saturday event is on your own; you may also pre-order a lunch when you register. The cost of the event does include the syllabus material.

Lectures for Saturday include:

- * How to Search Successfully to Tell Your Story on Ancestry.com by Anne Gillespie Mitchell
- * You Ancestor's Lawsuit: Finding and Using Tennessee's Supreme Court Case Files by Chuck Sherrill
- * AncestryDNA: Another View Into Your Family Story by Anna Swayne
- * Jumpstart Your Research by Juliana Szucs Smith
- * Panel Discussion

You can register for the Tennessee Ancestry Library Event at:

<https://www.eventbrite.com/e/tennessee-ancestry-library-event-tale-tickets-11797413381>

And if that isn't enough ? the Tennessee State Library & Archives will be hosting several helpful sessions in the days before TALE. These events are free, but seating is limited, so register early. Pre-conference events include:

- * Tuesday, 16 September, 3:00pm: On Solid Ground: Tennessee Land Grants by Chuck Sherrill
- * Wednesday, 17 September, 10:00am: Civil War Ancestors on the Home Front by Darla Brock
- * Wednesday, 17 September, 3:00pm: Getting the Most Out of Records on Ancestry.com by Trent Hanner
- * Thursday, 18 September, 10:00am: Behind the Scenes Tour of TSLA by Chuck Sherrill (sold out)
- * Thursday, 18 September, 3:00pm: Finding Your Ancestors in Tennessee Court Records by Chuck Sherrill
- * Friday, 19 September, 10:00am: Learn How to Use Family Tree Maker by Cris Cooper
- * Friday, 19 September 3:00pm: Family Tree Maker Q&A by Cris Cooper
- * Friday, 19 September, 5:00pm: All-Conference Reception at TSLA

Registration for these free pre-conference events can be found at:

<https://www.eventbrite.com/e/tennessee-ancestry-library-event-pre-event-activities-tickets-12296267467>

Check out this page for information about lodging, parking, etc:
<http://kytn.weebly.com/tale.html>

Additional questions can be answered by the staff at TSLA at [reference.tsla at tn.gov](http://reference.tsla.tn.gov).

We look forward to seeing you in Nashville!

Sincerely,
Amy Johnson Crow, MLIS, CG

Hello All,

I am researching what interest there is in books published by a genealogical society that would be priority to purchase for your collection. Which of the following would you purchase if a new book were published and in what order would you purchase them?

Cemetery Transcription Books
Deed Abstracts Books
Marriage Record Books
Any other topic?

I would like to hear from public librarians and societies and organizations.

Thank you,

Carla Mellott

Message-ID: <CANQTj-FSaF9Wn-0fv8N0SCCA_Z+phqDqoCy4XQ2xa+p5E1sNjg@mail.gmail.com>

For several years I was involved closely in selecting and ordering books for the California Genealogical Society's library. The one thing I jumped on whenever possible was newspaper abstracts. There are still hundreds of old, small-town newspapers that have not yet been digitally scanned, and the way the ink bled through old newspapers often means that when a newspaper IS scanned, the OCR technology misreads an important name and mangles it beyond recognition so that it can't be found by any normal search techniques. A book of newspaper abstracts compiled by a local genealogical or historical society is worth its weight in gold.

Marriage records are nice, but much harder to find are divorce records. Both should be included in a book of newspaper abstracts. Sometimes a marriage which took place in an adjoining county would be reported in the newspaper, whereas it would not be found in the local courthouse.

Another suggestion would be to identify a particular type of record that is lacking in a particular state - such as marriage records in the state of South Carolina. Anything that can help to fill a gap in records would be top priority. Deed abstracts could be very important in counties where the courthouse burned, as deeds were often kept in a fireproof safe and were the only records that survived a fire.

Hope this helps.

Barbara Hill

Think it depends on the area. For example, here in NC we have marriage bond index

for all of NC (minus 1 county) from 1741-1868. The one county not included has a separate index that was published. The index for the other counties was created by the State Archives for our state in microfiche. The index for the 1 county was published by an author rather than society. Of course marriage books after 1868 would be great.

Our state also has a cemetery index created by the WPA for pre-1914 burials. The surveys have even been digitized by the State Archives and are available online.

Deed books and court minutes are great resources to have abstracts/transcripts of and are heavily used here. One of the reasons they are great to have is in NC, most deed and court minutes are in bound volumes that cannot be copied. They provide an index where it is easier to find what you are looking for exact volume and page numbers and also provides a copy when a copy of the original cannot be made. Also any books that abstract records such as wills, estates, apprentice bonds, bastardy bonds, cohabitation bonds, etc. that may be available in your state are great.

I think it would be good to know what resources are available already in your state and then fill in the gap.

Hello All,

I am researching what interest there is in books published by a genealogical society that would be priority to purchase for your collection. Which of the following would you purchase if a new book were published and in what order would you purchase them?

Cemetery Transcription Books
Deed Abstracts Books
Marriage Record Books

Any other topic?

I would like to hear from public librarians and societies and organizations.

Thank you,

Carla Mellott

Without question, deed abstract books. This information is hard to come by without ordering the film from Salt Lake or visiting the courthouse. We are have a great interest in newspaper abstracts, not just the birth, deaths, marriages but also the personals. A lot of clues are found in the personals. Many societies publish wills, but what about the other probate documents? What if your case is intestate?

We would like to see more than just the wills published.

All,

My first priority would also be deed and land records. Indexes and maps are nice. Arphax does a good job, but there are many counties that have only refiled

deeds left after a fire, and it would be nice to see those published, as well as those counties who will not let their records be microfilmed but may be willing to let someone prepare an index. If the deeds are abstracted, please let them index everyone mentioned in the deed! Deeds are vitally important for those doing slave genealogy.

My second priority would be newspapers. Not just vital records, but all of the names in an issue. You never know what information may await you in a personal mention or even in a business advertisement.

I would also like to see indexes to probate records of all types: flat records, minutes, small estate minutes... I have found transcribed wills in probate minutes when the will itself is missing. Once again, please index all of the names mentioned in a record if you are indexing flat records.

In Texas County Commissioners minutes can be a gold mine for local history and genealogy researchers. If your state or county has any types of records that are not commonly found in other areas, those are a window into an area that might shed light on someone's family.

I think I'd go for the deed abstracts.

Libraries would like all of the above, but I'd put cemetery transcriptions last because of the prevalence off sites like Findagrave and their use.

I consulted with a few fellow staff members.

? Deed abstracts, followed by will abstracts would be a top priority, but only if the abstracts are detailed, listing all parties named in the documents.

? Cemetery listings would be of interest, as well as updates of previous cemetery listings.

? Vital records books would be of interest if the governmental agency involved would allow transcription of more recent records than currently available in most books are on most Web sites. Updates of previous vital records publications that include more information than name, parents' names and date would be helpful (ages of parents, birthplaces of parents, how many children this mother has had, etc.).

? Annotated census books, with documented annotations, provide something that Web sites do not, although some will bring up records seemingly related to the same person. (For instance, Ancestry census record will show other census years, vital records, etc. as possible related entries.)

Subject: [Genealib] New Publication: Guide to Hanover Military Records

Message-ID: <CABtm-bGo0DXzgK4_3sw2r1LafWVh-ZWHPxiCna7=Y0DR398SuA@mail.gmail.com>

I am forwarding information to this group on behalf of Teresa Steinkamp McMillin, Certified Genealogist, who has recently published *Guide to Hanover Military Records, 1514-1866. *

Lind Street Research Publishes a New Guide for finding German Military Records

for the former Kingdom of Hanover

INVERNESS, ILLINOIS, August 1, 2014 ? Teresa Steinkamp McMillin, Certified GenealogistSM and German research expert, is proud to announce the publication of*Guide to Hanover Military Records, 1514?1866, on Microfilm at the Family History Library*. Military records for the former Kingdom of Hanover in Germany can include a soldier?s date and place of birth, his father?s name, and widows? pensions. This publication is the only English-language guide to this gold mine of information for genealogists. With this guide, a researcher can quickly determine all available records for a regiment and time period and know where to find them in the Family History Library?s (FHL) microfilm holdings in Salt Lake City, Utah.

The records in this collection span 130 rolls of FHL microfilm and go beyond simply listing names of soldiers. In addition to the typical details in the muster rolls, transfers to and from other companies provide clues to additional muster rolls to review. The many other types of records in this collection include regimental journals, pension data, marriage consents, field church books, and even horse muster rolls, including physical descriptions of the horses and the names of the soldiers who rode them, and much, much more.

Easy to use, this guide is organized chronologically and includes brief historical overviews at the beginning of each major section. The book explains the history of the former Kingdom of Hanover and includes a detailed explanation of how to use this guide, demonstrated with examples.

This guide book is a must-have for anyone researching ancestors from the former Kingdom of Hanover in Germany.

?*McMillin has produced a thorough, detailed guide to the soldiers' records, geography, and military history of the Kingdom of Hanover. Her book is the key that unlocks the puzzle of which microfilm your ancestor's military record is found among the 130 Hanover military microfilms at the Family History Library.*? -- *Ernest Thode*

*?Until now this collection has hardly been touched by family historians, mostly because of the difficulties associated with locating the?microfilms. It?s an incredibly helpful work.? ? **Baerbel* *Johnson*

?*The 400+ pages of this guide will save any genealogical or historical researcher dozens of frustrating hours trying to find valuable information in this collection. Although painstakingly detailed, it is ridiculously easy to use.*? -- *Michael Lacopo*

Teresa Steinkamp McMillin, Certified Genealogist has had a life-long passion for genealogy. In 2006, Teresa founded Lind Street Research, a company dedicated to helping clients trace their German ancestry. Since then, she has helped many people discover their family history. Teresa also writes family history books and is a popular speaker for local and national genealogical societies, sharing her knowledge with the genealogical community.

Message-ID: <49FA69F49BA5D14C912703086D70C6F70AE08F7A@mbx026-w1-ca-2.exch026.domain.local>

We are trying to locate someone or a database service to make our obituary and cemetery indexes searchable and available on our Indiana Room webpage. These indexes are currently in MS Access. The cemetery database is static and no further data will be entered. However, the obituary index is ongoing and kept current.

If you have such databases on your library's website, who made these searchable and accessible online for you? Does anyone know of any database/technology companies that we could ask to create a database for us using the data already entered in MS Access?

Any suggestions would be helpful.

Thanks,

Nancy A. Massey

There are several names that come to mind:

Nimble User, in Pittsford NY, whom we used for the one at the Rochester NY
[<http://www.nimbleuser.com/>, 656 Kreag Rd. Pittsford, NY 14534 |
585.586.4750]

try contacting Becky Hill from the Hayes Presidential Library, who has done
a great job there:,
[[bhill at rbhayes.org](mailto:bhill@rbhayes.org)], [<http://www.rbhayes.org/hayes/aboutobits/>],

and there is a company (whose name slips my mind at this time) which
specializes in doing this for libraries for a fee.
You can search the back discussions on this mailing list using Google and
typing this in the front of the search box to limit it to GENEALIB:

We go first for indexes and abstracts for types of records that are normally a little more difficult to access, and after that vital records.

Court minutes and other court records

Deeds or other land records

Probates

Tax records

Newspaper abstracts

Marriages and divorces

Births and deaths

Cemeteries (cemeteries are no longer one of my top priorities because so much is appearing on line, but they are still useful!

Message-ID: <3b230.dc0229e.411ad534@aol.com>

Fantastic.

subvetpaul at aol.com (mailto:Fantastic.subvetpaul at aol.com)

In a message dated 08/11/2014 6:33:55 P.M. Central Daylight Time, ckuta at indiantrailslibrary.org writes:

I am forwarding information to this group on behalf of Teresa Steinkamp McMillin, Certified Genealogist, who has recently published Guide to Hanover Military Records, 1514-1866.

Lind Street Research Publishes a New Guide for finding German Military Records

for the former Kingdom of Hanover

INVERNESS, ILLINOIS, August 1, 2014 ? Teresa Steinkamp McMillin, Certified GenealogistSM and German research expert, is proud to announce the publication of Guide to Hanover Military Records, 1514-1866, on Microfilm at the Family History Library. Military records for the former Kingdom of Hanover in Germany can include a soldier's date and place of birth, his father's name, and widows' pensions. This publication is the only English-language guide to this gold mine of information for genealogists. With this guide, a researcher can quickly determine all available records for a regiment and time period and know where to find them in the Family History Library's (FHL) microfilm holdings in Salt Lake City, Utah.

The records in this collection span 130 rolls of FHL microfilm and go beyond simply listing names of soldiers. In addition to the typical details in the muster rolls, transfers to and from other companies provide clues to additional muster rolls to review. The many other types of records in this collection include regimental journals, pension data, marriage consents, field church books, and even horse muster rolls, including physical descriptions of the horses and the names of the soldiers who rode them, and much, much more.

Easy to use, this guide is organized chronologically and includes brief historical overviews at the beginning of each major section. The book explains the history of the former Kingdom of Hanover and includes a detailed explanation of how to use this guide, demonstrated with examples.

This guide book is a must-have for anyone researching ancestors from the former Kingdom of Hanover in Germany.

?McMillin has produced a thorough, detailed guide to the soldiers' records, geography, and military history of the Kingdom of Hanover. Her book is the key that unlocks the puzzle of which microfilm your ancestor's military record is found among the 130 Hanover military microfilms at the Family History Library.? -- Ernest Thode

?Until now this collection has hardly been touched by family historians, mostly because of the difficulties associated with locating the microfilms.

It's an incredibly helpful work.? ? Baerbel Johnson

?The 400+ pages of this guide will save any genealogical or historical researcher dozens of frustrating hours trying to find valuable information in this collection. Although painstakingly detailed, it is ridiculously easy to use.? -- Michael Lacopo

Teresa Steinkamp McMillin, Certified GenealogistSM has had a life-long passion for genealogy. In 2006, Teresa founded Lind Street Research, a company dedicated to helping clients trace their German ancestry. Since then, she has helped many people discover their family history. Teresa also writes family history books and is a popular speaker for local and national genealogical societies, sharing her knowledge with the genealogical community. Visit www.hanovermilitary.com (<http://www.hanovermilitary.com/>) for more details

Nancy,

webCemeteries.com is my favorite! I have never actually set up their database, but I have used it for research.

Sharon F. Corey

webCemeteries.com

webCemeteries.com
? webCemeteries.com computerizes your cemetery records and helps you leverage technology.
View on www.webcemeteries.com Preview by Yahoo

??

We are trying to locate someone or a database service to make our obituary and cemetery indexes searchable and available on our Indiana Room webpage. These indexes are currently in MS Access.? The cemetery database is static and no further data will be entered.? However, the obituary index is ongoing and kept current. If you have such databases on your library's website, who made these searchable and accessible online for you?? Does anyone know of any database/technology companies that we could ask to create a database for us using the data already entered in MS Access?

Any suggestions would be helpful.

Thanks,

Nancy A. Massey

Subject: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

Message-ID: <CA+mUgxWtYUYA_ZbBg8+P5aPDxEBpgPLFaFb4=eeuHimoeDY+DA@mail.gmail.com>

Please help me find pros and cons for the perception that our paper newspapers do not need to be microfilmed, just digitized.

- This year an anticipated funding for microfilming and digitizing our last fourteen years of paper copies of our weekly city newspapers was not forthcoming after the new director and the budget committee met and found that we had little money to spare.

- Someone told our new director that we did not need to microfilm our newspapers, just digitize them or subscribe to an online version of our weekly city newspaper. I checked with our city newspaper, which has online archival copies only back to March of 2014, so that is not a viable alternative.

I would like comments from genealogists, archivists, or local history librarians who have made decisions about microfilming and digitizing newspapers. Here is some background.

- Our old microfilm copies of Allegan, Michigan newspapers are years 1856 to 1999, and many/most reels are dreadful. Even our ScanPro 2000 is not able to compensate for many overdeveloped, too dark to read, out of focus, unflattend, or folded pages.

- We do have our original paper copies, but I fear that they will disintegrate or leave over time, as they are kept in a hot storeroom, and minimizing and eradicating unused items is now a priority to utilize our limited space.

- Our newer paper copies (2000-2014) are stored in archival boxes in a workroom, but papers are yellowing more each year, and they take up space wanted for other uses.

Where would I look for grants to microfilm and digitize our newspapers?

My situation: I have been told that our library will need grants to fund any microfilming or digitization of our newspapers

- Any* suggestions would be appreciated.*

Thank you,

I attended a workshop at the Indiana State Archives a few weeks ago. The state archivist said that they recommend microfilm as the preferred method of preservation. He also said that it was easy and very cheap to then digitize the film. You might check with your state archives to see if they do microfilming like Indiana does. Much cheaper than commercial firms. Does Michigan have LSTA grants? Indiana has been leaning toward digitization grants with LSTA funds.

The Library of Virginia recommends microfilming first before digitizing too ? we've had recent contact with them about some materials they own that the Virginia DAR is having reformatted for them and us. Microfilm is a proven, stable medium for holding images long-term anyway, and it is infinitely easier for digitizing to be done from film rather than odd sizes of papers, etc.

Subject: Re: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

I attended a workshop at the Indiana State Archives a few weeks ago. The state archivist said that they recommend microfilm as the preferred method of preservation. He also said that it was easy and very cheap to then digitize the film. You might check with your state archives to see if they do microfilming like Indiana does. Much cheaper than commercial firms. Does Michigan have LSTA grants? Indiana has been leaning toward digitization grants with LSTA funds.

Subject: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

Please help me find pros and cons for the perception that our paper newspapers do not need to be microfilmed, just digitized.

* This year an anticipated funding for microfilming and digitizing our last fourteen years of paper copies of our weekly city newspapers was not forthcoming after the new director and the budget committee met and found that we had little money to spare.

* Someone told our new director that we did not need to microfilm our newspapers, just digitize them or subscribe to an online version of our weekly city newspaper. I checked with our city newspaper, which has online archival copies only back to March of 2014, so that is not a viable alternative. I would like comments from genealogists, archivists, or local history librarians who have made decisions about microfilming and digitizing newspapers. Here is some background.

* Our old microfilm copies of Allegan, Michigan newspapers are years 1856 to 1999, and many/most reels are dreadful. Even our ScanPro 2000 is not able to compensate for many overdeveloped, too dark to read, out of focus, unflattend, or folded pages.

* We do have our original paper copies, but I fear that they will disintegrate or leave over time, as they are kept in a hot storeroom, and minimizing and eradicating unused items is now a priority to utilize our limited space.

* Our newer paper copies (2000-2014) are stored in archival boxes in a workroom, but papers are yellowing more each year, and they take up space wanted for other uses.

Where would I look for grants to microfilm and digitize our newspapers? My situation: I have been told that our library will need grants to fund any microfilming or digitization of our newspapers

* Any suggestions would be appreciated.

Thank you,

--

Before you go very far with this, check out the availability and price of microfilm, microfilm processing and microfilm duplicating. See if microfilming cameras and other equipment are available, and if you are lucky enough to find it, look for a vendor to repair and service microfilm equipment.

In spite of archivists' fervent pleas to maintain microfilming as the best and safest method of long-term preservation, the entire microfilm industry is dying before our eyes. We have been microfilming in-house all of the state's weekly (anything less than daily, some are two or three times a week) newspapers for many years. West Virginia University did also. WVU stopped microfilming and started buying duplicates of our film (also in-house). We had been buying commercially produced microfilm of the major daily papers. That commercial microfilm is no longer available, so we started filming those papers also.

Now we are looking at astronomical prices for film and for developing, and finding repair and service for microfilming equipment is almost impossible. Did I mention we have been subscribing to every newspaper in the state for many years, and funding is tighter and tighter? Draw your own conclusions.

I could write a huge list in support of the value of preserving local newspapers, let alone the major city ones, but if there is no money and nothing to buy even if there was money, there's no point.

I think I'm going through the five stages of grief over this, and I just showed myself I am not as far out of the anger stage as I thought.

Hi Linda,

We are a small library in a small town with a large newspaper collection. We continue to microfilm recent papers but we were getting a large demand to digitize the newspapers we had on microfilm. Since we didn't have the funds to digitize or support the online infrastructure of hosting our papers online, I contacted Newspapers.com. They ended up digitizing our papers for free, host it on their site (which we received free access to), and we received digital files of all of the papers which we can do anything with after three years. Of course there are caveats with using a third-party but overall, the process was great and we've gotten wonderful feedback from our patrons. This option might not work for every situation, but that was our solution. Good luck!

My answer would be made from experience: microfilm lasts through exposure to contaminated air, loss of air conditioning and being in a closed building while it is decontaminated so the microfilm to be brought out. The books that were not near the fire lasted, the microfilm lasted but not the computers or the CD's. Yes, they had to be cleaned, but they are still being used over 20 years later. During that time I have "lost" CD's to programs dying, information to computer crashes and hard disk failures. For me, digital is nice but I will keep the microfilm copies as long as they are available. Our microfilm is now over \$100 a reel but I cannot imagine being without it.

The down side of microfilm is finding machines to read and print the materials. Within the last couple of years I replaced both of our reader-printers and choices were not wide. Maintenance people have to come in from out of town and that makes the contract cost more. I take it out of the budget willingly after having gone without a maintenance contract once. Never again.

The Portal to Texas History gives grants to digitize materials. I don't know about the Library of Congress' Digital Newspaper project, but it is worth looking into. As a side note: the newspapers on the Portal to Texas History are digitized from the microfilm.

Good luck.

Can you offer them to newspapers.com or a similar service?

I believe familysearch.org digitizes and posts online for free, and may be interested.

I reached out to our micrographics team who has extensive experience in this arena. Here is their viewpoint:

Susan's comments are indicative of our experience as well. FamilySearch, which started microfilming in 1938 as the Genealogical Society of Utah, is no longer capturing images in microfilm format. This year the last of the microfilm cameras used by FamilySearch have been retired. All of our remaining 275+ cameras are capturing in digital format. Microfilm capture of newspapers is particularly expensive, since most will require 35mm microfilm to adequately capture the text of a full newspaper page. There are only a few companies that still manufacture 35mm microfilm cameras, and the cost of the film has risen exponentially over the past several years due to lack of demand and increases in the cost of oil (polyester film). The price of a microfilm camera will often exceed the cost of digital camera equipment. If you can obtain older film cameras you will find that part replacement is expensive if available at all. Print film is also becoming more difficult to find and commensurately more expensive

While many lament the passing of microfilm, the digital age is upon on us. Digital images can be duplicated at a fraction of the cost of film duplication with no degradation of image quality for which microfilm is subject to. The commercial costs of scanning film are also not insignificant and can sometimes come close to equaling the cost of original film capture. For those who want to scan the film themselves, the cost of film scanning equipment is significant (\$40-\$90K).

Whether we wanted to convert or not, the imaging industry has made the decision for us and we have to look for ways to make digital work. Significant financial investment is being made to research and develop digital preservation that will match the safety and peace of mind that microfilm gave us. While the passing of microfilm was unplanned, it is certain and we need to move on.

David E. Rencher

Chief Genealogical Officer, FamilySearch

Subject: Re: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

Before you go very far with this, check out the availability and price of microfilm, microfilm processing and microfilm duplicating. See if microfilming cameras and other equipment are available, and if you are lucky enough to find it, look for a vendor to repair and service microfilm equipment.

In spite of archivists' fervent pleas to maintain microfilming as the best and safest method of long-term preservation, the entire microfilm industry is dying before our eyes. We have been microfilming in-house all of the state's weekly (anything less than daily, some are two or three times a week) newspapers for many years. West Virginia University did also. WVU stopped microfilming and started buying duplicates of our film (also in-house). We had been buying commercially produced microfilm of the major daily papers. That commercial microfilm is no longer available, so we started filming those papers also.

Now we are looking at astronomical prices for film and for developing, and finding repair and service for microfilming equipment is almost impossible. Did I mention we have been subscribing to every newspaper in the state for many years, and funding is tighter and tighter? Draw your own conclusions.

I could write a huge list in support of the value of preserving local newspapers, let alone the major city ones, but if there is no money and nothing to buy even if there was money, there's no point.

I think I'm going through the five stages of grief over this, and I just showed myself I am not as far out of the anger stage as I thought.

Sent: Wednesday, August 20, 2014 8:14 AM
To: Librarians Serving Genealogists
Subject: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

Please help me find pros and cons for the perception that our paper newspapers do not need to be microfilmed, just digitized.

* This year an anticipated funding for microfilming and digitizing our last fourteen years of paper copies of our weekly city newspapers was not forthcoming after the new director and the budget committee met and found that we had little money to spare.

* Someone told our new director that we did not need to microfilm our newspapers, just digitize them or subscribe to an online version of our weekly city newspaper. I checked with our city newspaper, which has online archival copies

only back to March of 2014, so that is not a viable alternative.
I would like comments from genealogists, archivists, or local history librarians who have made decisions about microfilming and digitizing newspapers. Here is some background.

* Our old microfilm copies of Allegan, Michigan newspapers are years 1856 to 1999, and many/most reels are dreadful. Even our ScanPro 2000 is not able to compensate for many overdeveloped, too dark to read, out of focus, unflattened, or folded pages.

* We do have our original paper copies, but I fear that they will disintegrate or leave over time, as they are kept in a hot storeroom, and minimizing and eradicating unused items is now a priority to utilize our limited space.

* Our newer paper copies (2000-2014) are stored in archival boxes in a workroom, but papers are yellowing more each year, and they take up space wanted for other uses.

Where would I look for grants to microfilm and digitize our newspapers? My situation: I have been told that our library will need grants to fund any microfilming or digitization of our newspapers

* Any suggestions would be appreciated.
Thank you,

--

I am glad to see that so many people have weighed in on this. When I was working, we had microfilming done (remember, this was back in the last century...); When digitizing was done it was done on site using, as David Rencher mentioned, frightfully expensive equipment that we got using grants

and gifts. Sadly, that equipment has not been used much for 6 or 7 years, but that's another story.

Another consideration: do you have staff, time and money to do this? Who monitors it? Who hosts it? For what it's worth, amateurs (like our RGS CRPC group in Rochester NY) have taken it upon themselves to do free, volunteer work in scanning. And I am sure that you have heard about:
<http://www.localsyr.com/story/d/story/volunteers-to-scan-40000-historic-titles-at-ononda/17081/dYLSRDyG00uAJqdntho7zA>

You may also want to contact the following people, as they did a great presentation at the NYS history conference in Poughkeepsie NY in June 2014.

In my opinion, this article presents a falsely positive view of the situation, until you read it very carefully. I do not think the author has substantiated her opening statement that "microfilm is still going strong." She says that the "New York Public Library and other institutions continue to house microfilm for their patrons." Well, sure they retain and use the collections they already have-there's

a huge difference between that and actually creating new film for preservation purposes. The fact that academic researchers and genealogists will continue to use microfilm is mentioned later in the article. Again, use of existing microfilm is beside the point.

Yes, there are many newly invented and marketed products that make viewing, enhancing and copying onto paper or into digital storage terrific-if an institution can afford them, and that is a great big if, especially if a library has even four or five standard reader/printers to replace, let alone the ten to twenty and more that most have. We attend demonstrations every year for several years and drool over wonderful hardware and software, then go home without it because we can't afford it. Prices for this equipment are not going down. It's easy to talk about applying for grants, etc., but the money is still coming from someone's tax dollars for the most part.

"Librarians can physically add microfilm to their collections" but again, only if they have the funding, can find and maintain the equipment, and can find commercial or handle their own developing and duplicating. This is not happening any more. Many universities were using student labor to microfilm, and you know they weren't paying top wages or getting top quality product. We have trained and experienced staff to shoot microfilm of items as large as newspapers, and our own duplicating equipment, and we are struggling.

As for commercial companies digitizing and making content available via subscription Web sites, which is how most newspapers online are accessed, an institution and individual researchers have to be able to afford the subscriptions. The goal of libraries has always been to make information free and easily accessible to anyone in the community. This is getting harder and harder to do.

We have lamented over and over for the past few years how much state archives and libraries have lost funding and had to sacrifice personnel, service hours and programs. We are all very lucky to retain the funding we have and we are not very likely to get increases to pay for increased microfilming costs or for the digital equipment and programs to replace microfilm.

I'm sorry, but for many institutions there is no gain here, only loss. For future researchers of all types, losing local newspapers will be devastating. This falls right in with no longer having peoples' correspondence, diaries, etc., since few now commit their thoughts to paper and save them. Maybe it doesn't matter anyway, since script writing is no longer being taught. We already have college graduates who can not read primary documents and have to have them transcribed.

My historian half grieves for the loss of information, and my librarian half advocates for the best preservation method. As a public servant, I regret not being able to provide the public with all the information available with a choice of methods of delivery. Yes, Mr. Rencher, we will move on, and we will do the best we can with what we have. But I don't have to go down without a fight, and I don't have to like it!

I attended a workshop at the Indiana State Archives a few weeks ago. The state archivist said that they recommend microfilm as the preferred method of preservation. He also said that it was easy and very cheap to then digitize the film. You might check with your state archives to see if they do microfilming like Indiana does. Much cheaper than commercial firms. Does Michigan have LSTA grants? Indiana has been leaning toward digitization grants with LSTA funds.

Amen, Susan. Very well written.

As a dedicated local historian as well as a genealogy researcher, it is great to have access to many items.

But - who can afford the 35K to 140K machines to do this, and the staff to operate them? No local libraries or historical societies of which I am aware. The NYS archives partnered with Ancestry to have various records digitized. Volunteers do other digitizing. I volunteer at our local library research council, and without that over 3500 items that I have done, would not have been at all. Our RGS/CRPC group has done over 150,000 pages of records. Tom Tryniski (of fultonhistory.com) has done over 27 million pages of newspapers.

See the trend? Diminishing funding (flat funding for a decade or more has been brutal), and depending on good hearted volunteers has become a

reality. I wish there was a more sanguine outlook.

After reading this, I could not sleep. Thanks David!! <g>

My concern ? do we really have a crystal ball that can tell us that the present and future technology will preserve our documents? Are we really talking to each other about this?

In recent months, I have talked to State and local archivists, and they STILL say they will continue to microfilm. In fact, my vendor that I use told me they are busier than ever before. So, I am getting mixed messages on this issue.

Truthfully, I am staying with microfilm and will do what I can to find the money until I retire. There are side issues to all of this. How can we predict the future when based on the past, we have seen technology come and go so quickly?

Why are we allowing the market to dictate the preservation of our records?

A pessimist or realist.

Subject: Re: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

I reached out to our micrographics team who has extensive experience in this arena. Here is their viewpoint:

Susan's comments are indicative of our experience as well. FamilySearch, which started microfilming in 1938 as the Genealogical Society of Utah, is no longer capturing images in microfilm format. This year the last of the microfilm cameras used by FamilySearch have been retired. All of our remaining 275+ cameras are capturing in digital format. Microfilm capture of newspapers is particularly expensive, since most will require 35mm microfilm to adequately capture the text of a full newspaper page. There are only a few companies that still manufacture 35mm microfilm cameras, and the cost of the film has risen exponentially over the past several years due to lack of demand and increases in the cost of oil (polyester film). The price of a microfilm camera will often exceed the cost of digital camera equipment. If you can obtain older film cameras you will find that part replacement is expensive if available at all. Print film is also becoming more difficult to find and commensurately more expensive

While many lament the passing of microfilm, the digital age is upon on us. Digital images can be duplicated at a fraction of the cost of film duplication with no degradation of image quality for which microfilm is subject to. The commercial costs of scanning film are also not insignificant and can sometimes come close to equaling the cost of original film capture. For those who want to scan the film themselves, the cost of film scanning equipment is significant (\$40-\$90K).

Whether we wanted to convert or not, the imaging industry has made the decision for

us and we have to look for ways to make digital work. Significant financial investment is being made to research and develop digital preservation that will match the safety and peace of mind that microfilm gave us. While the passing of microfilm was unplanned, it is certain and we need to move on.

Subject: Re: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

Before you go very far with this, check out the availability and price of microfilm, microfilm processing and microfilm duplicating. See if microfilming cameras and other equipment are available, and if you are lucky enough to find it, look for a vendor to repair and service microfilm equipment.

In spite of archivists' fervent pleas to maintain microfilming as the best and safest method of long-term preservation, the entire microfilm industry is dying before our eyes. We have been microfilming in-house all of the state's weekly (anything less than daily, some are two or three times a week) newspapers for many years. West Virginia University did also. WVU stopped microfilming and started buying duplicates of our film (also in-house). We had been buying commercially produced microfilm of the major daily papers. That commercial microfilm is no longer available, so we started filming those papers also.

Now we are looking at astronomical prices for film and for developing, and finding repair and service for microfilming equipment is almost impossible. Did I mention we have been subscribing to every newspaper in the state for many years, and funding is tighter and tighter? Draw your own conclusions.

I could write a huge list in support of the value of preserving local newspapers, let alone the major city ones, but if there is no money and nothing to buy even if there was money, there's no point.

I think I'm going through the five stages of grief over this, and I just showed myself I am not as far out of the anger stage as I thought.

Subject: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

Please help me find pros and cons for the perception that our paper newspapers do not need to be microfilmed, just digitized.

* This year an anticipated funding for microfilming and digitizing our last fourteen years of paper copies of our weekly city newspapers was not forthcoming after the new director and the budget committee met and found that we had little money to spare.

* Someone told our new director that we did not need to microfilm our newspapers, just digitize them or subscribe to an online version of our weekly city newspaper. I checked with our city newspaper, which has online archival copies only back to March of 2014, so that is not a viable alternative.

I would like comments from genealogists, archivists, or local history librarians who have made decisions about microfilming and digitizing newspapers. Here is some background.

* Our old microfilm copies of Allegan, Michigan newspapers are years 1856 to 1999, and many/most reels are dreadful. Even our ScanPro 2000 is not able to compensate for many overdeveloped, too dark to read, out of focus, unflattened, or folded pages.

* We do have our original paper copies, but I fear that they will disintegrate or leave over time, as they are kept in a hot storeroom, and minimizing and eradicating unused items is now a priority to utilize our limited space.

* Our newer paper copies (2000-2014) are stored in archival boxes in a workroom, but papers are yellowing more each year, and they take up space wanted for other uses.

Where would I look for grants to microfilm and digitize our newspapers? My situation: I have been told that our library will need grants to fund any microfilming or digitization of our newspapers

* Any suggestions would be appreciated.

Thank you,

--

This affects all small town collections which is what I am guessing is a majority in America. Hearing what FS and New York are doing is not a good reason for me to jump in and digitize. My opinion? I think everyone is getting caught up in the excitement of access to information (me too!). But is anyone looking into the future? At least, I know my original documents are safe in their boxes (hopefully no hurricanes come along), and on three rolls of microfilm, one on site, one at Iron Mountain, PA and a master in a undisclosed place. I can also duplicate if an earthquake takes out the mountain!

I am still not sure about the cloud which is a business that could go under along with all my stuff. Or my back up drives, which have broken down at least three times in the last five years and we lost everything on the drive. Yes we did back it up to the county drives, but now they say we are taking up too much space. My CD's that I thought were safely created 5-7 years ago are now in jeopardy because of software and age. Staff and volunteer time is immeasurable.

I get phone calls from vendors that will provide services for digitizing, etc., but they do not get it. It takes too much staff time to prepare the records.

Talk about money going out the window!! It has cost us \$75,000-150,000 (over the last 5 years) to purchase equipment, hire professionals for scanning, and a lot of staff time and stress when equipment does not work. I am sure that I am low balling that amount.

I need a better plan and a more secure future before I invest any more. Oh, and after all that, none of my digitized records are online except for the indexes created by my wonderful volunteers. Researchers have to come in-house to use our records.

I hear another collection (30,000+ pages) calling me!

To: Librarians Serving Genealogists
Subject: Re: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

I reached out to our micrographics team who has extensive experience in this arena. Here is their viewpoint:

Susan's comments are indicative of our experience as well. FamilySearch, which started microfilming in 1938 as the Genealogical Society of Utah, is no longer capturing images in microfilm format. This year the last of the microfilm cameras used by FamilySearch have been retired. All of our remaining 275+ cameras are capturing in digital format. Microfilm capture of newspapers is particularly expensive, since most will require 35mm microfilm to adequately capture the text of a full newspaper page. There are only a few companies that still manufacture 35mm microfilm cameras, and the cost of the film has risen exponentially over the past several years due to lack of demand and increases in the cost of oil (polyester film). The price of a microfilm camera will often exceed the cost of digital camera equipment. If you can obtain older film cameras you will find that part replacement is expensive if available at all. Print film is also becoming more difficult to find and commensurately more expensive

While many lament the passing of microfilm, the digital age is upon on us. Digital images can be duplicated at a fraction of the cost of film duplication with no degradation of image quality for which microfilm is subject to. The commercial costs of scanning film are also not insignificant and can sometimes come close to equaling the cost of original film capture. For those who want to scan the film themselves, the cost of film scanning equipment is significant (\$40-\$90K).

Whether we wanted to convert or not, the imaging industry has made the decision for us and we have to look for ways to make digital work. Significant financial investment is being made to research and develop digital preservation that will match the safety and peace of mind that microfilm gave us. While the passing of microfilm was unplanned, it is certain and we need to move on.

Subject: Re: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

Before you go very far with this, check out the availability and price of

microfilm, microfilm processing and microfilm duplicating. See if microfilming cameras and other equipment are available, and if you are lucky enough to find it, look for a vendor to repair and service microfilm equipment.

In spite of archivists' fervent pleas to maintain microfilming as the best and safest method of long-term preservation, the entire microfilm industry is dying before our eyes. We have been microfilming in-house all of the state's weekly (anything less than daily, some are two or three times a week) newspapers for many years. West Virginia University did also. WVU stopped microfilming and started buying duplicates of our film (also in-house). We had been buying commercially produced microfilm of the major daily papers. That commercial microfilm is no longer available, so we started filming those papers also.

Now we are looking at astronomical prices for film and for developing, and finding repair and service for microfilming equipment is almost impossible. Did I mention we have been subscribing to every newspaper in the state for many years, and funding is tighter and tighter? Draw your own conclusions.

I could write a huge list in support of the value of preserving local newspapers, let alone the major city ones, but if there is no money and nothing to buy even if there was money, there's no point.

I think I'm going through the five stages of grief over this, and I just showed myself I am not as far out of the anger stage as I thought.

To: Librarians Serving Genealogists

Subject: [Genealib] Need help to address comment "No need to microfilm, just digitize" and look for grants to microfilm or digitize our newspapers

Please help me find pros and cons for the perception that our paper newspapers do not need to be microfilmed, just digitized.

* This year an anticipated funding for microfilming and digitizing our last fourteen years of paper copies of our weekly city newspapers was not forthcoming after the new director and the budget committee met and found that we had little money to spare.

* Someone told our new director that we did not need to microfilm our newspapers, just digitize them or subscribe to an online version of our weekly city newspaper. I checked with our city newspaper, which has online archival copies only back to March of 2014, so that is not a viable alternative.

I would like comments from genealogists, archivists, or local history librarians who have made decisions about microfilming and digitizing newspapers. Here is some background.

* Our old microfilm copies of Allegan, Michigan newspapers are years 1856 to 1999, and many/most reels are dreadful. Even our ScanPro 2000 is not able to compensate for many overdeveloped, too dark to read, out of focus, unflattened, or folded pages.

* We do have our original paper copies, but I fear that they will disintegrate or leave over time, as they are kept in a hot storeroom, and minimizing and eradicating unused items is now a priority to utilize our limited space.

* Our newer paper copies (2000-2014) are stored in archival boxes in a workroom, but papers are yellowing more each year, and they take up space wanted for other uses.

Where would I look for grants to microfilm and digitize our newspapers? My situation: I have been told that our library will need grants to fund any microfilming or digitization of our newspapers

* Any suggestions would be appreciated.

Thank you,

--

I have a patron who is scanning all of her genealogical magazines and then gives them to me. If any of these are of use in your libraries, please let me know and I will try and get them to you.

* McDonough County Genealogical News Quarterly (Macomb, IL) - Summer 2011-2014 (looks like current issue)

* Dotre av Norge: Preserving our Norwegian Heritage - Sep/Oct 2012-May/June 2014

* Ohio Genealogical Society Quarterly - 1 issue, Dec 2006

* OGS Genealogy News - Jan/Mar 2006-Summer 2007

* Nebraska Ancestry - Sep/Oct/Nov 2009-Dec/Jan/Feb 2010 & Mar/Apr/May 2014

I am hoping to be able to mail these off in the next two days so I can clean off my desk before I take a short vacation.

We received a donation of The Municipal Year Book covering 1980-1993. While it doesn't exactly fit our collection I can see researchers using it for other types of research. If we had unlimited space I would likely add it, but since we don't I thought I would solicit other opinions.

Feel free to email me directly.

Hello all,

We are currently weeding our collections of materials outside of our collection area and duplicate copies of books in our holdings. Lists of books on offer are attached. Please contact me if your library is interested in any of these materials. Pick up at the Schenectady County Historical Society, or we can send them by mail for the price of postage (Library Rate).

Please let me know if you are interested in any of these materials or if you have any questions.

Best,

Well, I wouldn't burn it, but I wouldn't have it on the shelves to browse. People

need to be able to verify whether something written about their family history was taken from Anjou's "research" and is therefore suspect.

From tneel at ogs.org Tue Aug 26 10:20:51 2014

From: tneel at ogs.org (Tom Neel)

Date: Tue, 26 Aug 2014 10:20:51 -0400

Subject: [Genealib] Ohio Genealogical Librarians' Seminar

Message-ID: <000601cfc138\$f19b7460\$d4d25d20\$@ogs.org>

The Ohio Genealogical Society's 11th Annual Genealogy Librarians' Seminar will be held Friday Oct. 17, 2014 from 9:30 to 3:30 at the OGS Library, 611 State Route 97 W, Bellville OH (exit 165 on I-71). This is an educational gathering for professionals who work in the genealogical and local history field in Ohio's libraries. This year's theme is "Libraries for Today's Researcher". The first session, "Working with Local Court Records," will be given by Tom Neel, OGS Library Director. Derek Davey, Lourdes University, will then speak on "Using Social Media in your Local History & Genealogy Room." OGS interns Nancy Strayer and Aaron Turner will tell what is involved in placing a digital project on the free Omeka software. Marcus Ladd (Miami University) and Phil Sager (Ohio History Connection) will then give us a tour of the more professional content management software - ContentDM. Mini-topics this year will be Tom Neel giving a tour of the "Civil War 150 Exhibit" in the OGS Library, or Bvenitta Williams, Seminar Chair, leading a discussion on "What is a Patron Looking for When they Arrive?" The day will close with a session by Eric Honnefer, BGSU Center for Archival Collections, on "Preservation of Archival Materials." The fee is \$25 (includes lunch) or \$15 without lunch. OGS Chapter librarians, public librarians, and even out-of-state librarians are welcome. The OGS library (60,000 volumes) is open 9 to 5 for research at no charge for attendees or their friends coming with them. Registration and more details at www.ogs.org/events/2014genlibseminar.php

Subject: [Genealib] Mary Whitney Phelps Tent No. 22 Ancestors Book

Message-ID: <006d01cfc18e\$d109f040\$731dd0c0\$@net>

Mary Whitney Phelps Tent No. 22, Daughters of Union Veterans of the Civil War, 1861-1865 in Springfield, Missouri is close to publishing their ancestors book. The name of the book will be True Union. We are now taking orders for the book but we must have 200 orders by October 1st to publish. This is a one-time only printing.

Pertinent information about the book:

- * 500+ pages
- * 160 individual sketches from 126 past and current members
- * Title of the book is Union True
- * The book will be an 8 1/2 x 11 size with color hard cover
- * Book will include an every name index
- * We must have 200 orders to publish the book.
- * Cost of the book will be \$35.00 plus \$3.50 for postage
- * Payment must be sent by October 1 (checks will be held and returned after Oct 1 if enough orders are not received)

Send checks to:

Fran Black, Treasurer

12269 Highway T

Marionville, MO 65705-7120

Subject: [Genealib] Temporary id/pw for Ancestry access for training purposes?

Message-ID: <CAB0Jr2RukXFEZcaDyd=t5E8gpMcN92aq=9XYz1itz7FWeKDUwQ@mail.gmail.com>

Greetings all,

I am speaking at a local school about Ancestry and wanted *live* access to the databases.

Our library subscribes to Ancestry Library Edition so I hoped that would ensure a "Sure, we can do that" response. Today's email however, says that can't do that (tied to ALE due to IP restrictions) but didn't offer a regular "temporary" A.com account.

Has anyone on the list been able to get a temporary/teaching account or does everyone have personal accounts that they use.

Me, I'm not willing to set up a trial account just for this. I'll do the PowerPoint/screen shot route but it's just not the same as being able to use a target person from someone in the audience.

Thanks,

Katheryn

To the best of my knowledge, Ancestry doesn't offer 'temporary/teaching

accounts" of any kind other than the free trial accounts.

Actually, they do under certain circumstances for K-12 and higher ed. I was able to do this for a university library science class I taught a year ago.

As someone else has already mentioned, the Ancestry.com person to contact is Kim Harrison. Be aware that she may be at the FGS conference in San Antonio the rest of this week.

Good morning,

Drew is correct I am at the FGS conference this week. You may send all questions to me at kharrison at ancestry.com.

Let me answer this question to this. For temporary access to show Ancestry Library Edition request should be directed to ProQuest. Ask for a trial access and explain why you need it. These request should permit a time frame of 2-3 days in advance if not more.

Kim

Message-ID: <CAJcBF=y=2rrWh3Pv+sfx_pT609DfgdpwUPTtv0-AXKfDFFYh-A@mail.gmail.com>

Good afternoon everyone,

I'm presenting a free webinar on behalf of the Nashville Chapter of the Afro-American Historical and Genealogical Society that may be of interest for genealogy libraries, particularly if you're planning indexing efforts or have yet to begin! I will be demonstrating the indexing process for our HBCU History Newspaper Project. The project aims to capture the precious information that resides within historical issues of student newspapers from historically black colleges and universities. We are relying primarily on volunteers to help out and this provides us an opportunity to explain how to contribute.

The webinar will be from *10-11am CST on Saturday, September 6th*. We have details on the society blog at <http://www.aahgsnashville.org/hbcu-indexing-workshop/>. No registration is required, but you have several options for signing up for reminders prior to the webinar (details on the blog).

Hope you can attend!

Hello! This is Christina Manzo from the emerging Crowdsourcing Consortium for Libraries and Archives project supported by the IMLS. Could you send the following message to the people on your listserv?

Thanks!

On behalf of our partners at Dartmouth College and Boston Public Library, we are pleased to announce the launch of an exciting new initiative, funded by the Institute for Museum and Library Services (IMLS), that will examine how libraries, archives, and museums, can most effectively use crowdsourcing techniques to augment their collections and enhance their patrons' experience!

This initiative, provisionally entitled the Crowdsourcing Consortium for Libraries and Archives (CCLA), will employ a series of meetings and webinars to collect, examine, and share the most recent, cutting-edge technologies, tools, and platforms and accompanying best practices in the field. The goal of the CCLA is to create a forum that enables all interested stakeholders to join a national conversation about the most pressing needs and challenges regarding the development and deployment of crowdsourcing technologies in the cultural heritage domain.

As a first step in this process, we want to hear from you!

The CCLA team invites you to take *a short 10-minute survey* <<https://www.surveymonkey.com/s/CGHJL7B>> to share your thoughts on the current state of crowdsourcing in libraries, museums, and other cultural heritage institutions. Your opinions and insights will directly inform the agenda of upcoming CCLA activities and events, influence the discourse of current and future discussions, and have the potential to translate into real-world applications.

Thank you!

P.S. To stay informed about upcoming CCLA events, please follow us on Twitter: @crowdconsortium

When I taught several online "Library Services for Genealogists" continuing education courses over a few summers, I asked Proquest for trial access to Ancestry Library Edition for the class, explained the purpose for this access. Proquest granted temporary access the first few times, but then told me they stopped granting this kind of access, which was frustrating for the students. I believe that was in 2010, so their policy may have changed in the last four years.

Message-ID: <47CAE527BC0AED489CABF11D5A54CD1101B04B02@SP90EXCH1.pwc.ad>

WHAT'S NEW IN RELIC
September 2014

The Ruth E. Lloyd Information Center for Genealogy and Local History (RELIC), Prince William Public Library System, Bull Run Regional Library, 8051 Ashton Avenue, Manassas, VA 20109. 703-792-4540 Email: relic2 at pwcgov.org<<mailto:relic2 at pwcgov.org>>.

To read the latest lists of new materials available in RELIC click on What's New in RELIC<<http://www.pwcgov.org/government/dept/library/RELIC/Pages/What%27s-New-in-RELIC.aspx>>.

Please note that we reopen for Sunday service on September 7. We are closed for

the Labor Day weekend, August 30-September 1.

HIGHLIGHTING RELIC'S REVOLUTIONARY WAR RESOURCES

RELIC has a range of basic sources to help researchers identify ancestors who served in the American Revolution (1775-1783). For a list of many of the titles we offer see the following link: Revolutionary Genealogy<http://librarycatalog.pwcgov.org/polaris/search/searchresults.aspx?ctx=1.1033.0.0.3&type=Keyword&term=revolution%20genealogy&by=SU&sort=CALL_AU&limit=TOM=*&query=&page=0&searchid=5> . Since our collection is focused on Virginia, soldiers from the Commonwealth are especially well represented, but a number of our resources cover the entire nation. Our materials include books, maps, CD-ROM databases, and microfilm. In addition, we have a single-user subscription to www.fold3.com which allows our patrons to access in-house the myriad documents at the National Archives that have been digitized, including Revolutionary War service records, pension files, and final payment vouchers. Our subscription to www.binnsgenealogy.com allows access to images of Virginia tax lists for the period after 1782, which can also be important evidence for Revolutionary era patriotic service.

RELIC PROGRAMS

Here are our latest offerings. Funding for selected RELIC programs is provided by the Friends of Central and Bull Run Libraries. To be notified of upcoming programs and new resources in RELIC, visit [eNotifications/subscribe](http://eservice.pwcgov.org/eServices/eNotifications/subscribe.aspx) and select Library - What's New in RELIC. Unless otherwise stated, all these programs will take place at the community room at Bull Run Regional Library, 8051 Ashton Avenue, Manassas, VA. Programs may last from 60 to 90 minutes. You may register for any of these programs at 703-792-4540 or relic2@pwcgov.org. For details see RELIC Programs<<http://www.pwcgov.org/government/dept/Library/RELIC/Pages/RELIC-Programs.aspx>>.

September 11, 11 a.m. - The DAR Library: Researching the Revolution and Beyond, with Eric Grundset.

September 20, 7-11 p.m. - RELIC After Dark, with John Colletta. \$

September 30, 7 p.m. - Genealogy 201: Beyond the Basics, with Tish Como.

October 9, 11 a.m. - Genealogy 101: Getting Started, with Beverly Veness.

October 28, 7 p.m. - The Men Who Lost America, with author Andrew Jackson O'Shaughnessy.

November 18, 7 p.m. - Before Virginia: Finding the Origins of Colonial Immigrants, with Victor Dunn, CG.

"Genealogy Doctor": free counseling (contact us for an appointment).

For a comprehensive list of upcoming genealogical programs scheduled in the Washington metropolitan area we recommend you see Harold's List, compiled monthly by genealogist Harold McClendon of Mount Vernon, Virginia: http://mvgenealogy.org/PDFs/Upcoming_Genealogy_Events.pdf or email him at haroldm@erols.com to subscribe.

THE DAR LIBRARY: RESEARCHING
THE REVOLUTION AND BEYOND
Presented by Eric Grundset

DAR Library Director Eric Grundset will present a program at Bull Run Regional Library on Thursday, September 11, 2014, at 11 a.m. describing one of the nation's largest collections devoted to genealogy and local history and its potential value for your research.

Since its founding in 1896, the Daughters of the American Revolution Library has grown into a huge specialized collection of American genealogical and historical manuscripts and publications, as well as powerful on-site databases. The library, open to all, is located in Washington, D.C. Non-members pay a small research fee. To register for this free program please contact RELIC at Relic2 at [pwcgov.org](mailto:Relic2@pwcgov.org), or at (703) 792-4540.

REGISTRATIONS NEARLY FULL FOR
TENTH ANNUAL "RELIC AFTER DARK"
FEATURING JOHN PHILIP COLLETTA.

There are still a few seats available for our special fall event. Our tenth annual "RELIC After Dark," will be held on Saturday evening, September 20, 2014, from 7 to 11 p.m., at Bull Run Regional Library. We've engaged nationally known genealogist and popular speaker John Philip Colletta to return after a five year absence. His topic: "Is Any Body There? - Tracking Ancestral Remains." It is a humorous account of some of his experiences searching for burial places of ancestors, along with lessons on finding ancestral graves and conducting genealogical research in general. The event, costing \$25 per person, will include a buffet dinner, with assorted beverages, and allow opportunity to do your own genealogical research using RELIC's facilities. Enjoy free printing from electronic resources and from microfilm reader-printers. Seating is limited, so please contact RELIC staff at [relic2 at pwcgov.org](mailto:relic2@pwcgov.org) or 703-792-4540 to make a reservation.

GENEALOGY 201: BEYOND THE BASICS
Presented by Tish Como

Genealogy 101 introduced basic resources and techniques for researching your family's history. Genealogy 201 presents alternate resources to enhance your family's history and advanced search techniques to help maximize your results from online databases including census records, passenger lists, maps, and books. RELIC's Tish Como will present this program on Tuesday, September 30, at 7 p.m., at Bull Run Regional Library. To reserve a seat for this free program, contact RELIC at (703) 792-4540 or at [relic2 at pwcgov.org](mailto:RELIC2@pwcgov.org).

GENEALOGY 101: GETTING STARTED
Presented by Beverly Veness

Those curious about their family history have an opportunity to learn about methods, strategies and resources for tracing their roots. This free 90-minute program, conducted by Beverly Veness of the RELIC staff, will highlight the numerous free genealogical resources available at RELIC and will explore basic techniques for tracking ancestors.

This program will also be presented at Bull Run Regional Library, on Thursday, October 9, at 11 a.m. To register please contact RELIC at Relic2 at [pwcgov.org](mailto:Relic2@pwcgov.org), or at (703) 792-4540.

NOTED AUTHOR TO TALK ABOUT
HIS AWARD-WINNING BOOK ON
THE AMERICAN REVOLUTION

On Tuesday, October 28, at 7:00 p.m., we welcome noted author Andrew Jackson O'Shaughnessy, Ph.D., who will talk about his book "The Men Who Lost America: British Leadership, the American Revolution and the Fate of the Empire." This title won Dr. O'Shaughnessy both the 2014 George Washington Book Prize, which recognizes the year's best books on the nation's founding era, especially those that have the potential to advance broad public understanding of American history, and the 2014 New York Historical Society's annual American history book prize. He is the Vice President of the Thomas Jefferson Foundation, Saunders Director of the Robert H. Smith International Center for Jefferson Studies and Professor of History at The University of Virginia. To reserve a seat for this free program, please contact RELIC at (703) 792-4540 or at Relic2@pwcgov.org.

BEFORE VIRGINIA:
FINDING THE ORIGINS OF COLONIAL IMMIGRANTS
Presented by Victor Dunn

Determining a Virginia immigrant's origins can be a challenge. Certified genealogist Victor Dunn will show what sources and techniques are available to take your Virginia ancestry across the ocean. The program will be held on Tuesday, November 18, at 7 p.m. at Bull Run Regional Library. To reserve a seat for this free program, please contact RELIC at (703) 792-4540 or at Relic2@pwcgov.org.

"Genealogy Doctor" Accepting Appointments for Research Help

Don Wilson, head of RELIC, sets aside time each month for free private sessions to mentor persons researching their family history. A thirty-minute session can be used to discuss and analyze an historical or genealogical problem that has stumped you.

Daytime and evening hours are possible. To set up an appointment, please call RELIC at 703-792-4540 or email Relic2@pwcgov.org. Bull Run Regional Library is located at 8051 Ashton Avenue, Manassas, VA 20109.

Have a question about Prince William County history, places or families? Need guidance with your genealogical research? You may contact RELIC staff for help and advice at [Ask RELIC](http://www.pwcgov.org/government/dept/library/RELIC/Pages/Ask-RELIC.aspx) or by calling us at 703-792-4540. Hours, June to August (ET): Monday-Thursday 10am-9pm, Friday-Saturday 10am-5pm. Closed Federal holidays. On September 7 we'll resume Sunday service, noon-5pm.
