# Here's Proposed Constitution for USF

The constitution, which will establish the school's first student government some time next September, has been completed and passed by the Steering Committee last week.

The Constitution Committee, a subcommittee of the Steering Committee, has drawn up what they term a strongly student centered government plan, directly linked to the entire university.

An open meeting of the Steering Committee will be held at 10 a.m. tomorrow in

the Teaching Auditorium-Theatre to give students a chance to discuss the constitution with the committee members. If there are valid objections to parts of the constitution presented, the Constitution Committee will consider revision of the document. Students wishing to lodge written objections to the constitution may do so at the information desk in the University Center.

The constitution will most likely be given to the student body for ratification next week. A two-thirds affirma-

tive vote will be necessary to ratify. Present plans are for ballots in which students can vote for either the whole or parts of the constitution. Following is a complete draft of the proposed constitution.

## PREAMBLE

We, the student association of the University of South Florida, consecrating our utmost endeavors to the defense of civil, religious, political, and intellectual liberties for all, do ordain and establish this Constitution:

to represent and serve faithfully and wholeheartedly the students, staff, and University;

to execute efficiently and thoroughly the will of the students;

to develop all students to their fullest degree of attainment in all phases of education;

to encourage openly and unceasingly the continuous intellectual development of the individual student;

to establish positive conditions under which the students of the University shall have equitable representation

in all government affairs; to promote at all times an exemplary student-faculty relationship; and resolve to combine our sincere efforts to accomplish these ends.

1. The Student Association. 1.1 The Student Association shall be composed of all full-time students attending the University of South Florida.

1.2 The Student Association shall be comprised of twenty Civic Units.

1.3 The purpose of these Civic Units shall be to provide the membership of the legislative branch and to pro-

vide a means through which the Student Association shall express itself effectively in the programs of the University.

1.4 Should the membership of any Civic Unit at any time exceed 500 persons, it shall be the duty of the Legislature to prescribe a manner of re-apportionment to alleviate that condition.

2. The Legislature. 2.1 All legislative powers herein granted shall be vested in a unicameral body, which shall consist of two representatives elected from each

Civic Unit plus five representatives-at-large and five University Senators, chosen in Student Association election, unless otherwise stipulated. 2.2 The Vice President of the Student Association shall preside over the Legislature, but shall have no vote, unless the body is equally divided.

2.3 All other members of the Legislature shall have the privileges of the floor and the vote, excepting the five University Senators who shall have only the privilege of the floor.

2.4 The Legislature shall elect from its membership a President Pro Tempore to assume the duties of the Vice President during his absence. 2.5 The presiding officer may appoint any committee which he and/or the Legislature find necessary for the transaction of its affairs.

2.6 The Legislature shall determine the rules of its own proceedings. 2.7 The Dean of Student Affairs or designated representative shall sit in the

## CAMPUS ROUNDUP

# Miss Universe Comin' to USF

By CAROL MARTIN

University of South Florida—

Students at USF will briefly

brush elbows with Miss Uni-

verse from 3:35

to 4:15 p.m.

Wednesday as she

makes a brief tour

of the campus.

Miss Universe, who is really

Linda Bement of Salt

Lake City, has a

set of statistics

sorta like this: 5

ft. 6 in., 116 lbs.,

19 years old, 37½

burn hair, and green eyes.

Linda likes skiing (the snow

kind), tennis, and is "wild

about" sports cars. Press and

Greater Tampa Chamber of

Commerce photographers plan

to cover her swish across cam-

pus. So boys, drive the sports

car, make way for the photog-

raphers, and we'll see you at

the front of the Administration

Building at 3:35 p.m.

Wednesday. Ken Kingsley of

Maas Bros., is in charge of

Linda's West Coast Florida

Tour.

University of Florida—Spring

Frolics on April 28, for the

first time this year in the form

of a concert rather than a dance.

Jimmy Reed, New Orleans jazz

stylist Pete Fountain and a folk

singing group, the Limericks.

Florida Southern College—

The Baptist Student Union re-

cently acquired its own build-

ing. Located near the center of

the campus on Columbia Way,

it will be used as a center for

Baptist students on campus and

as a meeting place.

University of Miami—New

approaches to Latin America

were explored by 13 authorities

from academic, business and

diplomatic fields during the

Southeastern Conference on

Latin American Studies meet-

ing April 28-29 at the Lucerne

Hotel, Miami Beach.

Florida State University—The

huge tent which will house the

Flying High performances May

2-6 has been erected on the

circus lot and mysterious prepa-

rations for the annual home

show are being made.

Chipola Junior College—CJC

campus was the site of the re-

cent District Vocal Association

District Six Senior Festival,

which featured 1,500 choral

participants.

University of Florida—King

Ugly was crowned at the

Spring Frolics. Proceeds from

the contest go to a student

scholarship fund.

Florida State University—

May 6-7 has been designated

Family Weekend by FSU and

parents of students may visit

the campus at that time. On

May 8, parents may attend

classes with their sons and

daughters.

University of Miami—Norman

Cousins, editor of the Saturday

Review, served as a guest in-

structor at the University Col-

lege last week. He taught classes

in social sciences on Monday

and Wednesday.

Broward Junior College—Dr.

Joe B. Rushing has been offi-

cially inaugurated as the first

president of the Broward Coun-

ty Junior College. The cere-

mony was held at the War

Memorial Auditorium in Fort

Lauderdale on March 24.

Florida Presbyterian College—

"Startime," an evening of

## INTRAMURALS

### Arete Win Campus Field Day April 22

The USF Arete, competing against another men's and three women's social clubs, rolled up 30 points in seven events to capture the first All-Campus field day Saturday, April 22, at USF.

The day's events, beginning at 10 a.m. and continuing until 3 p.m., were played on various playing areas on campus. Activities ranged from softball and archery to the 500 yd. relay and sack race.

The Arete took a firm grip on the team lead with first place wins in the volleyball and softball events for men. They clinched their victory with wins

in the coeducational sack race and archery events.

Second place, overall, went to the Enotas, who compiled 18 points in the meet. Other scores were: Tri SIS (women) 17, Independents 16, Fides (women) 9, and Pidea (women), who failed to score.

An extra added event, coeducational at that, was the honeymooner's race. It seems a contest was held to determine which group could most quickly dress and undress men in women's clothing. . . . hm.

One girls' softball game turned out to be a real pitching duel. In three innings of play the score read 17-3.

The Intramural All - Stars, sorely handicapped by a three week lay-off, just couldn't muster up enough steam to overcome a first period deficit, going down to defeat at the hands of the University of Tampa Intramural champs 69-48 Wednesday, April 26, at George B. Howell Gym.

Trailing 25-18 at the half, the All-Stars suddenly collapsed in performance as a more conditioned Tampa U. squad took over. The USF had been unable to prepare for the event, due mainly to the short notice given.

**16 Points for Old John**  
John Gullett led the USF Intramural League champions in the scoring department with 16 points. Backing him in the totals were Dan Meisen and Roy Wilcox, with 12 and 9 points, respectively. Other members of the squad, and their points include: Frank Meiners, 4, Dave Aycock, 3, Pete Doyal, 2, and playing manager Jim Moffitt with 2.

Leading the Tampa squad to victory was Jack Kelley, who rolled up 18 points.

Kent Howell, USF student, totaled 31 points in 50 pitches for first place honors in the All-Campus Horseshoe Tourney, held April 20 on Campus.

Close behind Howell in the point department was Roger Whelting, with 28. Charles Bridges and Robert Alwood finished third and fourth, respectively, with scores of 27 and 13.

Third-round winners in the current All - Campus Tennis Tourney include: Dr. Frank Cleaver, math professor; Jay McWhirter; Dave Aycock, and Tony Morre.

**Another Meeting**  
A group meeting will be held Wednesday, May 3, at 7:30 p.m., in Rm. 257 of the UC Building, for prospective health, physical education and recreation majors and minors.

Discussion will be centered around course requirements, planning schedules for next Fall and various job opportunities available in the field of health, physical education, recreation and athletic coaching. An entertainment program is also being planned.

## Proposed Constitution For USF

(Continued from Page 1)

Legislature as an ex-officio member.

3. The Executive.

3.1. The executive power shall be vested in an Executive Council composed of two representatives chosen for each interest (area) council within the University, an Executive Committee, and five University Senators.

3.2. The Executive Council shall direct and co-ordinate the University (area) councils within the University.

3.3. The executive committee shall be composed of a president, vice president, recording and correspondence secretaries, and treasurer chosen in a student association election plus a Parliamentary Authority appointed by the president and approved by the executive council.

3.4. The executive council shall be referred all legislation before it is acted upon by the legislature.

3.5. The executive council shall analyze the legislation and offer constructive criticism, and then it shall be returned within fifteen (15) school days to the legislature for approval.

3.6. The president of the student association may appoint any committee which he and/or the executive council find necessary for the transaction of its affairs.

3.7. The executive council shall determine the rules of its own proceedings.

4. Qualifications for any officer within the student association:

4.1. He shall be a full-time student enrolled in the university, carrying a minimum of twelve (12) academic hours.

4.2. He shall be in good academic standing with the university, maintaining accumulative 2.0 (C) average.

4.3. He shall not hold an office in the legislative branch or the executive branch of the University Senate (concurrently) unless otherwise stipulated.

5. Student Association Officers—

5.1. The President:

5.1.1. He shall preside over the executive council and the executive committee.

5.1.2. He shall be a member of the senior (or higher) class.

5.1.3. He shall appoint a Parliamentary Authority subject to the approval of the executive council.

5.1.4. He shall exercise the power of approval or disapproval of any legislation arising in the legislature.

5.1.5. Should any legislation be disapproved by the president, the legislature may take recourse to reconsideration and passage of said legislation with an affirmative vote of three-fourths (¾) of its total membership. The legislation then shall become law.

5.1.6. Should the president neglect to approve or disapprove any legislation after a period of ten (10) school days it then shall become law.

5.2. The Vice President:

5.2.1. He shall preside over the legislature.

5.2.2. He shall, in the absence of the president, assume the duties of the chief executive.

5.3. The Recording Secretary:

5.3.1. He shall keep a record of all proceedings.

5.3.2. He shall call the roll at all meetings.

5.3.3. He shall read the minutes of the previous meetings.

5.3.4. He shall read all papers and documents.

5.3.5. He shall prepare the agenda for the forthcoming meetings as instructed.

5.4. The Corresponding Secretary:

5.4.1. He shall have charge of all documents belonging to the executive branch.

5.4.2. He shall notify all officers, committees, and delegates of appointments.

5.4.3. He shall send the minutes of previous meetings to all officers, committees, and delegates.

5.5. The Treasurer:

5.5.1. He shall hold all receipts and funds delivered, and upon warrants issued by the executive council shall disburse money on demand.

5.5.2. He shall present a comprehensive annual report before the executive council, supplementing this with monthly and quarterly reports.

5.5.3. He shall be chairman of a permanent finance and budget committee of the executive council.

5.6. The Parliamentary Authority:

5.6.1. He shall render an advisory opinion on the mechanics of any legislation before the president and/or the executive council.

5.6.2. He shall prescribe the time, place, and manner for Student Association elections.

5.6.3. He shall be chairman of a permanent "rules" committee of the Executive Council.

5.7. The University Senators:

5.7.1. They shall sit in the University Senate, on the Executive Council, and in the Legislature acting as liaison between these governmental bodies.

6. Standing Committees:

6.1.1. This committee shall be permanent, having its headquarters in the Executive Council.

6.1.2. This committee shall be chaired by the appointed Parliamentary Authority.

6.1.3. This committee shall be composed of no less than three (3) nor more than seven (7) members.

6.1.4. This committee's purpose shall be: to advise the President in matters concerning legal mechanics; to interpret the constitution (as necessary); to provide the direction in matters of Student Association discipline; to draft any rules or regulations relating to the Student Association or organizations therein, deemed necessary by the Executive Council.

6.1.5. The members of this committee shall be appointed by the chairman subject to the approval of the Executive Council.

6.2. The Finance Committee:

6.2.1. This committee shall be permanent having its headquarters in the Executive Council.

6.2.2. This committee shall be chaired by the Treasurer.

6.2.3. This committee shall be composed of no less than three (3) nor more than five (5) members.

6.2.4. The Vice President shall sit ex-officio on this committee.

6.2.5. The members of this committee shall be appointed by the chairman subject to the approval of the Executive Council.

7. Presidential Succession:

7.1. In the event of the resignation or the removal of the President of the Student Association, the Vice President shall assume all of the duties of said term. If in the event of the resignation or the removal of both the President and Vice President, the President pro tempore of the Legislature shall succeed to this office.

8.1. A recommendation for the removal of any individual from office shall be made in the Legislature.

8.2. No individual shall be removed from office without the concurrence of two-thirds (⅔) of its total membership of the Legislature and the approval of the Executive Council.

9. Amendment Procedure:

9.1. The Legislature, whenever two-thirds (⅔) of its total membership shall deem it necessary, shall propose amendments to the constitution.

9.2. The amendment shall follow the same path as other legislation.

9.3. The amendment shall be ratified by two-thirds (⅔) of the voting student association.

10. Quorum:

A quorum shall constitute one (1) more than half (½) of the total membership of any organization wishing to transact business.

## Hugoboom Relected As Journal Editor

R. Wayne Hugoboom, associate professor of music at the University of South Florida, was relected editor of the "Choral Journal" during the second national conference of the American Choral Directors' Association recently at Columbus, Ohio.

The "Choral Journal," official publication of the ACDA, will be expanded under Hugoboom's direction during the coming year. During the conference Hugoboom was also appointed chairman of the choral reading sessions for the next national conference which will be held in Chicago, March 15-16, 1962.

Another Floridian was honored by the ACDA, when members elected Dr. Edward J. Keister, University of Florida, president for the coming year.

## Miss Universe

(Continued from Page 1)

the University of Miami under direction of Dr. Fabien Sevitzky.

Broward Junior College—The Baptist Student Union will hold car washes during the spring to raise money for the Baptist Student Missionary Program, at the Baptist churches throughout Fort Lauderdale and Hollywood.

Florida Presbyterian College—Famed writer, Harry Golden, will lecture Tuesday in Pasadena Community Church on the topic, "It Could Happen Only in America." He is the final guest in this year's FPC artist lecture series.

## Airborne Revenooers

CHATTANOOGA, Tenn. (AP)—Revenooers have taken to the air.

Federal and state alcohol tax agents recently used a state airplane to spot 18 moonshine stills in a single day.

## Journalism Students Hear Weimer Speak

Prof. Rae O. Weimer, director of the School of Journalism and Communications at the University of Florida, Gainesville, was a recent guest speaker at a luncheon and a discussion for those students interested in journalism. Several journalism graduates of the University of Florida also attended.

Courses in journalism and communications at U. of F., the requirements for a degree in journalism, and opportunities in the field were the main topics of discussion.

## Teeth Prove To Be Clincher

DALLAS, Tex., May 1 (UPI)—William G. Webb Jr. was having a tough time getting his luggage from the train station yesterday until he remembered his false teeth.  
 Webb, from Albany, Tex., lost the key to a storage locker. He reported the loss to Ed L. Childers, a depot official, filled out the necessary forms, but stumbled a bit over the description of what was in his luggage.  
 For a bit it appeared he might not be able to persuade Childers the property was his. Then Webb's face spread into a broad grin.  
 "Sir," he said, "I have the clincher. In the beige suitcase there's a set of false teeth."  
 Childers found the choppers. Webb took them, slipped them into his mouth to prove they fit, and walked out with his luggage.

## Ban on Bareness

NANTUCKET, Mass., May 1 (UPI)—Shirtless men and women in short shorts will be barred from Nantucket streets this summer, town officials of this island community decreed yesterday.  
 The order made no mention of bikinis.

## Envoy Named To African Post

WASHINGTON, May 1 (AP)—President Kennedy has selected Robinson Mellvane, with the State Department since 1953, ambassador to the African republic of Dahomey.  
 Mellvane, 47-year-old native of Downingtown, Pa., will succeed R. Borden Reams. Reams will continue as ambassador to the Ivory Coast, Niger and Upper Volta.

Also announced Saturday was appointment of Joseph W. Shea as secretary of the Federal Trade Commission. The post pays \$14,000 a year. Shea, 53, is a 20-year veteran with the FTC.

## Services Scheduled For Mrs. Garroway

NEW YORK, May 1 (UPI)—Memorial services were scheduled today for TV star Dave Garroway's wife Pamela who died Friday of an overdose of sleeping pills.  
 Results of chemical tests ordered after an autopsy revealed cause of death were not expected to be released for at least a week.

Mrs. Garroway, 37, died in their five-story town house after she telephoned her doctor who said she had been upset over her husband's plans to file for a divorce. Garroway was not at home when Mrs. Garroway died.

## TASK FORCE TO TARGET AREA

# Navy Prepares To Rescue Astronaut

ABOARD U.S.S. LAKE Champlain, May 7 (UPI)—A seven-ship Navy task force steams to sea today to pluck America's first spaceman from the water.

All ships go on "ready alert" at 2 a.m. EDT Tuesday for the expected shoot from the cape a few hours later.

Rear Admiral G. P. Koch, commander of the task force, said he is confident his group will get the astronaut out of the water quickly, provided the

the Atlantic. It has orders not to speak to him unless he speaks first.  
 Psychologists and doctors want the first astronaut to tell his own story in his own way, without having it colored by words and thoughts conveyed to him after his return from flight.

So, from the first retrievers, who probably will be Marine helicopter pilots, to all others of the 5,000 men aboard the flotilla who may come in contact with him, the orders are: Address no words to the astronaut right after recovery unless he asks a question.  
 This 40,000-ton carrier and six destroyers headed for positions down the Atlantic missile

## Big Corporation Got Name Through Error

BALTIMORE, May 1 (AP)—Allegheny Corp., spelled with an "A," differs in that particular from the usual spelling of Allegheny Mountains, Allegheny River, Allegheny Airlines and Allegheny Power System.  
 It's an old Indian name.

A lawyer taking part in the proxy contest for control of the corporation yesterday traced the discrepancy to a typographical error made 32 years ago in taking out Maryland incorporation papers.

firing goes as expected. The capsule will be aimed at a circle eight miles in radius around the carries.

If all does go as scheduled, the first man to see the astronaut may be Wayne Koons, a 27-year-old Marine lieutenant from Lyons, Kan. Koons is training supervisor of the helicopter team which has practiced for months getting the astronaut and his capsule out of the water.

The helicopter rescue teams are part of Marine Air Group 26, based on the carrier.

Two destroyers, the Decatur and the Perry, will be in place to retrieve the astronaut if he gets out of range of the carrier helicopters, as did Ham the chimpanzee on his Jan. 31 trip.

The help was in the water in his capsule two hours and 45 minutes before a destroyer reached him. At the last minute, a helicopter arrived and made the recovery.

As everywhere, there was avid speculation aboard the ship as to which of the three astronaut finalists—Alan Shepard, Virgil Grissom or John Glenn—will get the nod.

Only half-jokingly, Admiral Koch said he thought he detected a trend away from Glenn as the early favorite toward

## Children's Migraine Clears Up

By W. C. ALVAREZ, M.D.

A woman writes me a most interesting story about her girl who, evidently, always has had attacks of what is called cyclic vomiting.

I will never forget the first child—a girl of 10—whom I saw with this strange disease. The clinical picture was so vivid that although I saw the child some 50 years ago, I can still see the room and the bed; the anxious parents, and the child, so utterly miserable that she lay as if half-conscious.

**Abdominal Pain**  
During that whole day she had not a word in answer to her mother's questions. Once every hour or so she would groan with abdominal pain and then would reach violently for a few minutes, bringing up a little bile. Then, again, she

If any parents of a child with this disease have learned of any other medicine which will stop these spells, I will be glad to hear of it. The trouble is that the malady is so rare that few men can come to know it well from personal experience.

### Swollen Ankles

Many people ask me what to do for swollen ankles.

Usually the best thing, besides seeing a doctor and taking his treatment, is to raise the foot of the bed by putting the end of the mattress on perhaps a couple of pillows. By thus raising the feet at night the fluid tends to run back out of the tissues, and in the morning the person wakes with perhaps normal-looking ankles.

By night time the ankles may be swollen again, especially if

the person has to work for much of the day standing on his feet.  
In some cases it helps a good deal to wear an elastic stocking or elastic bandage. Elastic stockings are now made so well that they are not conspicuous.

**Don't listen to old wives' tales about menopause.** Dr. Alvarez' booklet, "Menopause and Hysterectomy" will alleviate your fears and tell you what you should do during this time of life. It may be obtained by sending 25 cents and a large, stamped, self-addressed envelope with your request to Dr. Walter C. Alvarez, Dept. TAM, The Register and Tribune Syndicate, Box 957, Des Moines 4, Iowa.

By ROBERT PETERSON

Sociologists contend that modern, middle-aged housewives whose children are grown face a grave dilemma. With smaller homes, closets crammed with labor saving gadgets, and packaged foods they find themselves purposelessly adrift in a sea of leisure time.

But not Mrs. Gabriel Heatter, wife of the perennially popular newscaster. When I lunched with the Heatters at their handsome home in Miami Beach, overlooking a bay of sparkling blue water, I learned that Saidie Heatter is a member of the old school.

### Would Be Happier

She believes most women would be happier if they turned their backs on some of the fruits of our technological progress and returned to the traditional tasks of their sex.

"I feel sorry for women who don't savor housework," said

this pretty, brown-eyed grandmother who has three servants but thinks nothing of sending the help out to a movie while she whips up dinner, washes the dishes, or engages in a bout of old-fashioned housecleaning.

"Maybe some women really enjoy an empty routine of bridge, tea parties and fashion luncheons. But not me. I think you've got to be doing something useful, productive and creative—something that draws on your talents and fulfills your role in life—if you want real contentment."

### Creatively Engaged

With some prodding I learned that she has half a dozen arts and crafts which keep her creatively engaged. She doesn't capitalize on them but they'd prove useful in keeping the Heatter ship afloat if Gabriel's mellifluous tones ever lost their earning power.

"My daughter calls this a

## Life Begins At Forty

tinued, leading me down the hall to a spectacular, deep-tufted rug ablaze with bright reds, yellows and greens in an abstract pattern.

### Activities Enjoyed

"Then there's baking. Once a week I take over the kitchen and bake a big batch of bread and rolls using stone-ground flour I buy from a mill in California. We love homemade bread and I always bake extra loaves for my daughter who lives nearby and for friends."

"I also enjoy dressmaking, canning fruit, gardening and interior decorating. It's true I don't have to do any of these things. But I wouldn't dream of letting anyone deprive me of these chores which I feel are a woman's most reliable source of satisfaction."

It's too bad the word housework has become synonymous with drudgery. Ad men eager

to sell products ranging from dishwashers to powdered mashed potatoes have cloaked the word in such dreary adjectives that many have been persuaded housework is little better than enforced slavery. But a few wise women, such as Mrs. Heatter, know better.

If you would like a free list of "35 Ways to Make Money at Home" write to this column c/o The Tampa Times enclosing a stamped, self-addressed envelope.

### Spending Going Up

NEW YORK (UPI)—Total government spending — federal, state and local—may reach \$161 billion in fiscal 1961, the Tax Foundation, Inc., estimates.

It represents an average tax burden of \$2,850 per family, \$100 higher than the previous fiscal year.

## MEDICAL TALK

would lapse into her sleepy state, and lie as if almost dead.

At first, when I saw this girl with a disease which I had never seen before, I feared she might have some serious trouble in her abdomen — something which should quickly be operated on. But, fortunately, the mother then told of other exactly similar spells which the girl had had.

They lasted a day or two and then, rather suddenly, had cleared away. Then I knew that the attack I was seeing probably would quiet down, too, and it did.

### Severe Form

I also learned that the mother and the father had each had a severe form of migraine. Also, I learned that the girl had gotten her attacks after some excitement, such as an examination, or a school picnic.

Years later, I saw another one of these girls, and because, by then, I was sure of the clinical picture, I begged the family doctor not to operate. He went ahead and explored the girl's abdomen and found nothing.

The more I have seen of this disease the surer I have become that it is a form of migraine. I have seen it clear up entirely, just as the tendency to sick headaches often does, when the girl reaches the age of 20 or so.

Commonly, in these cases, the interval between spells lengthens until the child has one only once in five or six months. What interests me much in the letter before me is this mother's statement that her child began to get these spells when she was 7 months old. They have kept coming, suddenly, at any time of day. The girl is now 13 years of age and is still getting the spells about twice a year.

### Drug Injection

If I had such a child under my care, I would give the mother some ampules containing a solution of Gynergen, and a hypodermic syringe. I would teach her to give an injection of the drug as soon as a spell started.

This would be my main hope of stopping a spell. In adults with a severe migraine this treatment will block the spell in perhaps 85 per cent of the cases. No medicine taken by mouth can work, once the nausea and retching have set in. Then the stomach will not absorb anything.

## Scientists 'Reset' Standard

By The Associated Press  
From new measurements, scientists of the National Bureau of Standards conclude that radioactive Carbon-14 has a half-life of 5,760 years — not 5,568.

This is important because Carbon-14 is one of the most valuable tracer atoms and time clocks on earth for estimating the age of archeological specimens.

The radioactive carbon, created in the air by cosmic rays, gets into every living thing, plants, animals, and man. After death, no more is added through intake of food or air. So a measure of how much radioactive carbon a mummy or a pile of wood ashes contains can tell how old it is.

The half-life is the time it takes for half of any given starting amount of the radioactive atoms to break down.

With Carbon-14, half of all the atoms in a specimen would decay or disappear in 5,760 years, and half of the remainder in the next 5,760 years, and so on.

### Lazy Mowers

A special compound of hydrazine, a hot-shot rocket fuel, may soon be available in family sized packages to help slow the growth of grass for men wanting to put in more hammock time on weekends.

Chemical industry sources say the material already has been used successfully on golf courses and along parkways, reducing the need to cut grass from once or twice a week to two or three times a season.

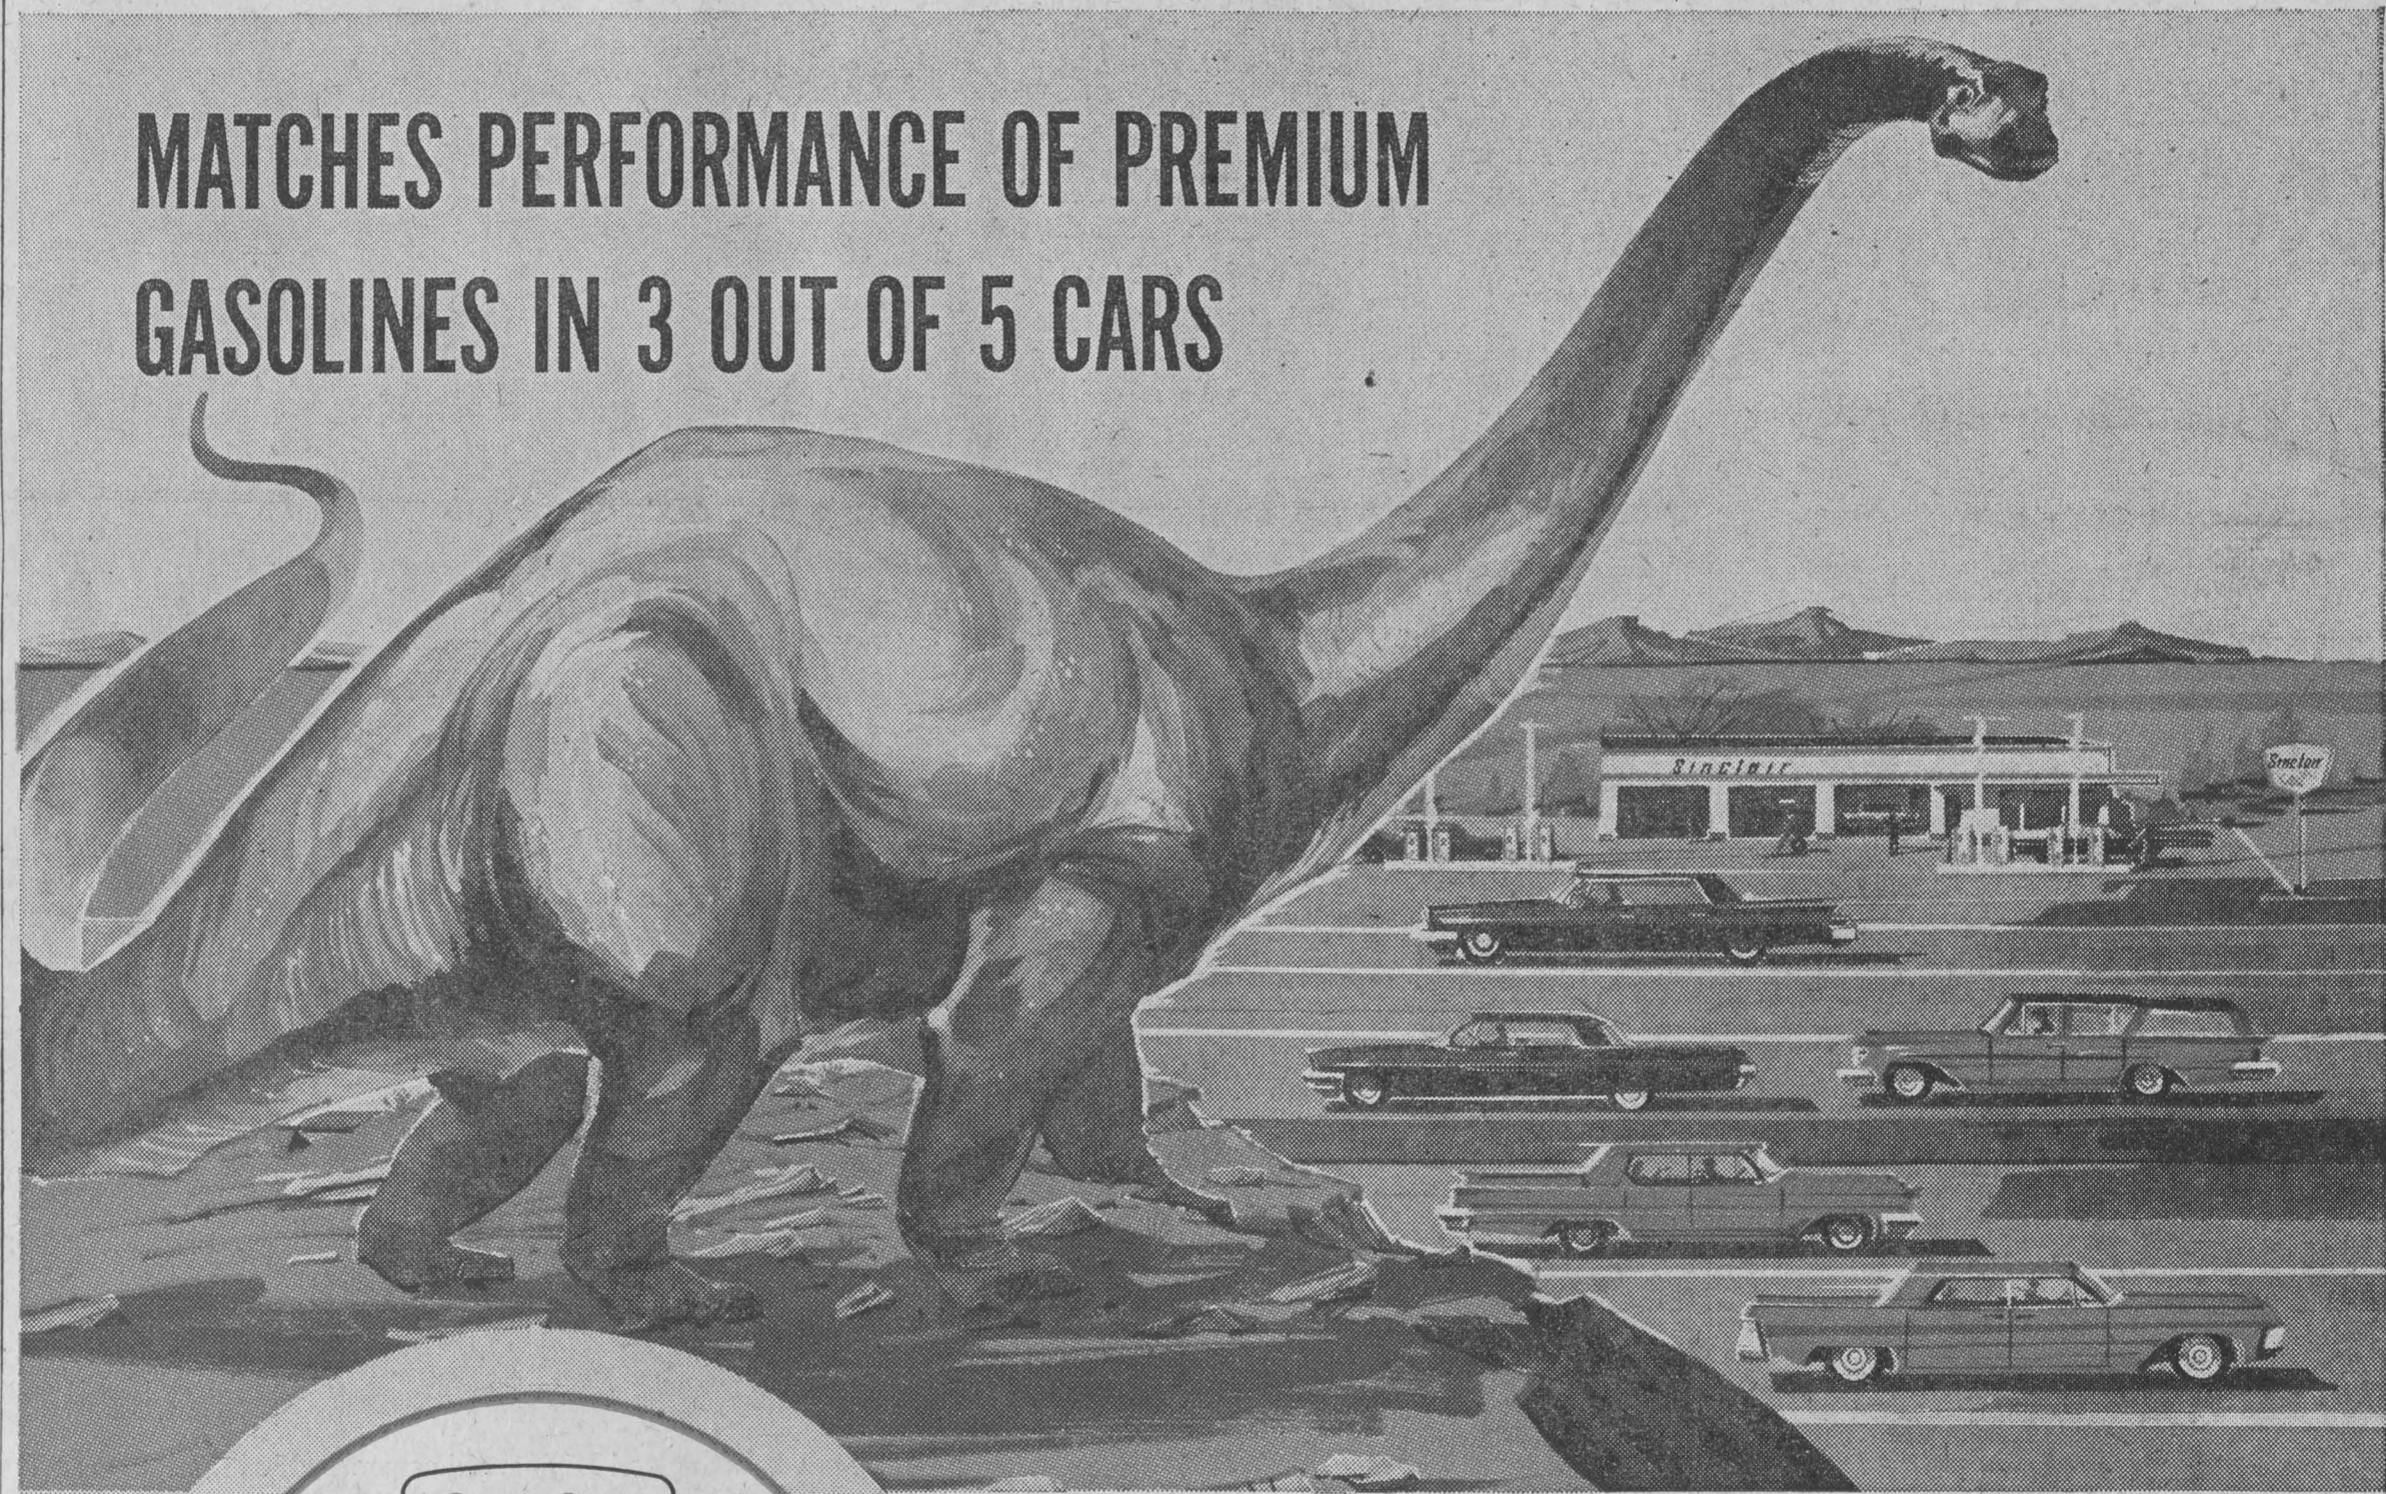

### Side-Kicks

A new use for rockets — to help an airplane pull out of a dangerous spin — has been developed by Air Force scientists. Rocket "packages" are mounted on each wing, and can be fired as an emergency measure to stabilize the plane.

# Announcing *Sinclair* DINO GASOLINE AT REGULAR PRICE

## MATCHES PERFORMANCE OF PREMIUM GASOLINES IN 3 OUT OF 5 CARS

**Sinclair**  
**DINO**  
GASOLINE

## Blended with Special HIGH-MILEAGE Ingredients for Greater Economy

Here's important news about a great new name in gasoline. It's ready for you now at 25,000 Sinclair Dealers' Stations in 36 states. It's Sinclair DINO Gasoline—the regular-priced gasoline that performs like premium gasoline in 3 out of 5 cars on the road.

If you want the most for your gasoline dollar, you owe it to yourself to try Sinclair DINO Gasoline in your car right now, today. With DINO Gasoline, you can save when you buy. Better still, you can save as you drive week after week, month after month. That's because Sinclair DINO contains special high-mileage ingredients to give you many money-saving miles per gallon.

Drive in at the sign of the famous Sinclair Dinosaur. You save with Sinclair because—at Sinclair we care...about you...about your car.

ON TV *Sinclair* PRESENTS

## RED SKELTON

CHANNEL 13

9:30 P.M., Tuesday,  
beginning May 9

## AT *Sinclair* WE CARE...About You...About Your Car
