Subject: [Genealib] Launch of Genealogy Education Subscription Site:
   Genealogy Guys Learn
Message-ID: <7424EF12-C08E-42A7-BA03-65631F5AADF3B@usf.edu>

Guys Podcast, the Genealogy Connection podcast, and The Genealogy Guys Blog is
pleased to announce the launch of Genealogy Guys Learn (genealogyguyslearn.com<http://genealogyguyslearn.com/>), a subscription-based
educational website designed to provide genealogy courses and videos for
researchers of all skill levels.
[A picture containing text Description automatically generated]
At its launch, Genealogy Guys Learn consists of 5 text/image-based courses on such
topics as basic research, intermediate research, the Social Security Death Index,
will and probate records, and military records. Genealogy Guys Learn also contains
a dozen recorded presentations by George G. Morgan and Drew Smith, including All
About the U.S. Federal Census, Principles of Effective Evidence Analysis, Finding
Archived Newspapers, and Organizing Your Research Process.

Another feature of the Genealogy Guys Learn website is that it provides quick
access to information about books written by George G. Morgan and Drew Smith; other
recommended books, quick sheets, and magazines; recommended software, hardware, and
online services; and links to websites related to the content provided in the
courses and videos.

?Drew Smith and I have been speaking at genealogy conferences for decades,? said
George G. Morgan, president of Aha! Seminars, Inc. ?But attending conferences is
not always practical or within the budget for all genealogists. With the launch of Genealogy Guys Learn, we’re able to provide our affordable educational services directly to the genealogist in their own homes on their own schedules.?

The Genealogy Guys Learn website automatically keeps track of courses and videos users have viewed, so that users can see their progress at a glance. The website will be updated each month with additional content (new courses or videos), providing continuing value to the subscribers. Subscribers will be able to provide feedback to George and Drew as to which topics they would most like to see added in the future.

For more information about Genealogy Guys Learn, please contact George G. Morgan, aha at ahaseminars.com<mailto:aha at ahaseminars.com>, 813-220-6274, or visit genealogyguyslearn.com.

Subject: [Genealib] Advice for a growing genealogical library
Message-ID: <CAAV9_q+0evO4-uSCFEQuR4VwpKY5oR6L7D4o0n0fRxmW94aU7Q@mail.gmail.com>

Hello:

The West Valley Genealogical Society?s Library is expanding and growing. A good problem to have but it does bring up some questions.

First, we are looking for some advice on your shelving units that your library uses. What do you like about the brand/model you picked? If you had to do it over again, what would you change? We are looking at 6 shelve high units which would give us a lot more space for books.

Second, does your library have a policy for weeding their genealogical collection? The question does your library remove print materials from the collection if they are online? The society is split between moving more online vs. print. We do have a computer lab of 15 computer but are membership is over 700 plus members.

West Valley Genealogical Society?s Library can boast of over 19,221 plus books, 1,190 maps, 3,400 media items and 1,919 periodicals. Our staff is at the ready to help with any genealogical question. So, if you are ever in Arizona please stop and visit our library!

Respectfully,

Kim S. Harrison

Ad-Hoc Accessioning Committee

*Kim S. Harrison*
kimgenhist08 at gmail.com
I serve as the librarian of a much smaller society library, but in my opinion, all libraries should have a collection development policy. This will guide what you will and will not accept as donations as well as any weeding project.

To opt not to duplicate material that is online brings up a slippery slope question:

- Will you catalog those things currently in your library with a link to the online version?
- If so, why not also catalog other material available online that fits your collection development policy?
- If not, is it reasonable to think your patrons will find this material online? Will you limit your online option to specific websites, e.g. FamilySearch.org and ... what? Probably not a subscription website (unless you have that in your library). What about the online digital book collections? Again, will your users be able to effectively find material there?

But your starting point to it all is a well thought out collection development policy.

Kind Regards,
Barbara Snow

---

Kim,  
Years ago we had a fire in one of our church buildings and it consumed the family  
history center. The fire investigators said that the hot spot of the entire blaze  
was the FHC because of the wooden shelving they had for the books. Since then I  
have been a strong proponent of metal shelving-choose your style.  

As you can imagine, the FHL does have a collection development policy that focuses  
on high quality content for heavily used areas but will make exceptions for areas  
where we have little content and not much had been published.  
And...anything/everything from Ireland. ? ok not really but some days they have to  
reign me in.

West Valley Genealogical Society's Library can boast of over 19,221 plus books, 1,190 maps, 3,400 media items and 1,919 periodicals. Our staff is at the ready to help with any genealogical question. So, if you are ever in Arizona please stop and visit our library!
My first thought is not to remove paper copies if they are online...all to many researchers don't have the computer power or knowledge to access the online copies and all too many online copies are either restricted to one page at a time access or are behind a paywall.

My second thought is to purchase whatever local or area resources that exist because they go out of print all too quickly. I purchased out of print county histories and willingly paid over $300. Curtis Media printed a number of county and town histories in the 1960's and 1970's that are now scarce.

Become familiar with what has been printed on your city/county/state and it's status in libraries. WorldCat is wonderful for that. I wish I had been more competent in using spreadsheets and had created one for each area!

Listen to your local genealogists and local historians when they talk about holdings where they have visited. Of course they may want you to purchase items out of your collection development area (a detailed collection development policy is a must). Network with those libraries and
archives. Exchange items?

Good Luck.

Nan

From bj.jamieson at gmail.com Sat Oct  5 19:56:47 2019
From: bj.jamieson at gmail.com (BJ Jamieson)
I'm the genealogy reference specialist at the Maine State Library—a rather unusually, I didn't bring my work computer home with me this weekend, so replying from my personal email.

In addition to what others have said (yeah for written collection development policies!), what I'm doing:

A. On printed material that is now on-line: keeping it but moving from prime shelving (for example, old DAR lineage books are the first thing a patron currently sees when walking in—old and shabby looking, and not where anyone should start research) to either back shelves or our easily accessible storage area.

B. Methodology— I'm focusing my current book buying on methodology books, as the easy of on-line research means that many people do lots of research without really understanding good methodology or how records vary in different times/places. So I'm getting books on Italian research, DNA basics, where to look for military ancestors, and so on. I think it's working—a local DAR chapter just gave us money for my choice of books; our technical services person delivered 14 of the new books to me yesterday at 9:30 a.m. and by the end of the day, 5 had already been checked out. OK, so one was to me, but still ;-)!

C. Overall weeding is at my discretion. I'm fairly quick to cull older DNA and technology books, but the 1850 census is the 1850 census, even if it's much easier to access now than 50 years ago, so I'm tending to keep books on sources, for example, unless the condition of the book is the reason for weeding.

Hope this helps!

I am chair of the library of a genealogy society. I find that some of those older
books were donated as memorials way back when so we end up having to keep them even
if they are online. and we have many older patrons who still don't like using
anything online. I have thought of buying more "how to" but we are a non-circulating
collection so I am not sure they would be used that much. Brooke Anderson

Get several catalogs from companies that sell library furniture and
shelving, etc..
Buy the middle priced items that will give you enough space for growth.

If you get census indexes or transcriptions from several sources, keep them all! Each one might transcribe a name a different way and for those with hard to find ancestors every help they can get is marvelous. Common surnames and families who have no imagination in first names are just as much a problem as those who have odd and easily mispelled names. Not every family has a Decimus Et Ultimas Barziza!

growing. A good problem to have but it does bring up some questions.

First, we are looking for some advice on your shelving units that your library uses. What do you like about the brand/model you picked? If you had to do it over again, what would you change? We are looking at 6 shelve high units which would give us a lot more space for books.

Second, does your library have a policy for weeding their genealogical collection? The question does your library remove print materials from the online vs. print. We do have a computer lab of 15 computer but are membership is over 700 plus members.

Anne Shaughnessy
Mount Prospect (IL) Public Library

Hello:
I am trying to assist a patron who is doing research in England c1670-1679. He would like to have a list of those English parish registers from that era which are missing. He is aware that some of the registers are available at Family Search and Ancestry. He wants to make sure he is doing a thorough search for the Woolridge name. Does such a list even exist? Would I have to start with a list of English parishes that existed in 1670? I appreciate your help.

Respectfully,
Anne Shaughnessy
Mount Prospect (IL) Public Library
Phillimore?s Atlas is the standard reference for this purpose. https://www.amazon.com/Phillimore-Atlas-Index-Parish-Registers/dp/1860772390/ref=sr_1_1?crid=3SMT2J4SITXQD&keywords=phillimore+atlas+and+index+of+parish+registers&qid=1570397161&s=books&sprefix=Phillimore%27%2Cstripbooks%2C153&sr=1-1

In some cases there are transcripts made at unique dates depending on the parish?so even if the original is gone, a film, transcript, abstract, etc., may exist. If the parish register is gone, check the Bishop?s Transcripts (BT).

Anne,
The Phillimore Atlas & Index of Parish Registers 3d by Cecil R. Humphrey-Smith lists all of the parishes by county with a listing of the starting and ending dates for the registers. Maps of the parishes are included such that you can determine all of the surrounding parishes by name.

For shelving--keep in mind ADA requirements. Even discounting that, if shelves are too high, researchers damage books on top shelves by dragging on the spines to get them down. Or damage themselves by falling off stools, etc.

We do not weed things just because they are available online--who knows if they will always be online? And in some cases, as others have said, the print version can be more user-friendly. I am less likely, however, to purchase something if it is available online--trying to stretch the budget.

In fact, we weed very little--obsolete technology/software yes, also for condition.

I'm in a fairly large public library collection (at least for my population size).
I agree with the collection development policy others have mentioned.
As far as online goes - I do use online availability to sometimes influence buying/retention BUT ONLY in those areas that are not frequently used by my patrons. For instance, I'm in northeast Indiana and many of our settlers came from a few counties in Ohio and Pennsylvania, before that. I will continue to keep/buy print copies even if it is online for those key resources. But, for county histories from the south end of the state -- I'll keep what I have, even add a few if they're available for free on discussion lists, but I won't buy any because most of them are online and the counties are rarely, if ever, of interest to my patrons.

If you have a good relationship with the society, you might even ask them about their druthers when in a space crunch. (Non-binding of course.)

Hi all:
Does anyone have a source for digitizing high school yearbooks in the Northeast
from a now-closed private high school? The alums maintain a school website and are
looking to post those 1920s-1970s yearbooks for alums. There is money to be spent
for this service and once the yearbooks are digitized, the alums don't care what
happens to the physical copy. Obviously, the hope is that the yearbooks are
searchable to optimize usefulness so any leads would be appreciated.

I performed a search for companies in your area that should be able to help you. The category is microfilming but, I would think that digitization is also part of their service venue.

Recordsforce    Bill Becker     124 Heritage Ave        Portsmouth, NH  (603) 766-8000  $5 to 10 Million  

King Information Systems Inc    Patricia Tighue 3 Edgewater Dr Ste 203 Norwood, MA     (781) 762-6477  $2.5 to 5 Million  

New England Micrographics       Ellen McQuade   40 Hudson St Ste C Marlborough, MA (508) 485-9572  $1 to 2.5 Million  

Digital Scanning Inc    Brian Shillue   344 Gannett Rd Ste 6    Scituate, MA   (781) 545-2100  $500,000 to 1 Million

Carole,

I know that Ancestry.com has a sizable Yearbook Collection, and they accept Yearbook Donations prior to 1999. They do an OCR scan of the pages.

More information found here: https://support.ancestry.com/s/article/Donating-Yearbooks

Also, looks like Boston Public Library has digitized many for Massachusetts Yearbooks, they might be a good contact to reach out to.

Cheers,

Carl Smith

From jhuffman at lapl.org  Tue Oct 15 12:26:32 2019
From: jhuffman at lapl.org (Huffman, Julie)
We use Northern Micrographics in Wisconsin to digitize our hardcopy city directories, and they do an outstanding job. They've wanted to do our yearbooks, as well, but we're not ready to get into that yet. You mail them the book, they digitize it without disbinding it, and they will return it to you unscathed when the job is done with a DVD containing the digital format--they can even print a new copy of a hardcopy book from the newly digitized file (if you want). They use ResCarta, which I find to be a very precise OCR system.

Here is my contact: Alan Hamilton | Regional Sales Manager
Northern Micrographics | 2004 Kramer Street | La Crosse, WI 54603

We used the Oklahoma Correctional Institute. If the timespan is within their current project, it is free! (including shipping both ways).

The product is a DVD(s) with one pdf file per yearbook. Yearbooks are scanned at 300dpi which is adequate for printing at original size. Each pdf much be opened to be searched (unless you have ways to search multiple pdfs ... I know they exist, I did it a number of years ago). They do clean up images to remove most markings.

Outside their current project, digitization costs $10-$15 per book depending on page count. I don't know about shipping.

Michael Gaines (ocirc at doc.ok.gov) was my contact last year. They did 5 boxes of 1950-1989 yearbooks in less than the advertised 8-10 weeks (more like 6).

OCI has been around for years and takes security seriously vis-a-vis the inmates and any potential privacy infringements.

We've also had many yearbooks digitized by OCI and are happy with the results. The early Albuquerque High School yearbooks digitized by OCI are now on the New Mexico Digital Collections website:
https://econtent.unm.edu/digital/collection/abclibrary/search/searchterm/La%20Reata/field/all/mode/all/conn/all/order/title/ad/asc

They paid for shipping both ways and there was no charge for the PDF files. A great deal.

best wishes,
Lisa

OCI will also ship them anywhere you want, for free, when that are done. Since it sounds like the originals don’t need to go back. We only had our duplicates digitized, we had a lot of dups, and OCI sent them off to Allen County for us when the were done. Two birds with one stone! There might be some place that would be honored to have yours after digitization.

Mary Mannix

Sent from my phone, in case lots of "typos". Well, that is the story I am sticking to.

The product is a DVD(s) with one pdf file per yearbook. Yearbooks are scanned at 300dpi which is adequate for printing at original size. Each pdf must be opened to be searched (unless you have ways to search multiple pdfs ... I know they exist, I did it a number of years ago).

They do clean up images to remove most markings.

Outside their current project, digitization costs $10-$15 per book depending on page count. I don't know about shipping.

Michael Gaines (ocirc at doc.ok.gov) was my contact last year. They did 5 boxes of 1950-1989 yearbooks in less than the advertised 8-10 weeks (more like 6).

OCI has been around for years and takes security seriously vis-a-vis the inmates and any potential privacy infringements.

If the school is located in Massachusetts, Digital Commonwealth scans yearbooks free to a nominal cost. They are scanned in partnership with The Internet Archive, I believe. Digital Commonwealth's HQ is at the Boston Public Library main branch. They do pickup and delivery of items.

Digital Commonwealth membership:

From GlasgowE at wtcpl.org  Wed Oct 16 13:44:29 2019
From: GlasgowE at wtcpl.org (Elizabeth Glasgow)
Date: Wed, 16 Oct 2019 17:44:29 +0000
Subject: [Genealib] Personal Information found in records
Message-ID: <6062b16d98d2478cb26d74bb16d4c35a6@wtcpl.org>

Our library just accepted a donation of the funeral records of a recently defunct
local funeral home. The records begin in the late 1800s and extend to 2017. We
have already copied the records up to 1965, indexed them and placed them on the
library shelves, but we are worried about sensitive information found in the
records as we approach current date. We assume we will remove social security
numbers and phone numbers moving forward, but were still wondering about other
information and how other libraries have approached donations like this.
Many thanks in advance,

Elizabeth A. Glasgow

We keep the more recent records in a staff-access only area. Then we "redact" them as needed by placing sticky-notes over the information and watching carefully as they are handled.

We may sit in our library and yet be in all the corners of the earth.

In our state, NY, we can show births from older than 75 years, an marriages from older than 50 years. There are INDEXES which by law can come down to the present, but at least in NY the state is very strict on the privacy laws.

I just checked FamilySearch for Ohio and they have INDEXES down to 2007 on that site.

Please excuse cross-posting.

Feel free to invite your local museum counterparts.

This is the program for the Huntington County Genealogical Society which takes place in the Indiana Room. A short business meeting will precede the program.

*Textiles 101 ? Preservation by IHS*, Karen DePauw

Much of what we do to preserve our textile-based collection items is classified as preventative. We aim to preserve items for the future while making it possible to still display and study them. Learn a bit about the basic preservation techniques for textile-based items, as well as helpful, budget-friendly tips. Also, understand how to determine when conservation is needed and when it might be safely done in-house or requires a professional.

As coordinator of Local History Services at the Indiana Historical Society, Karen DePauw serves Indiana organizations through collection care trainings and workshops. She received a bachelor of arts in history at Quincy University and a master of science from the University of Rhode Island focusing on historic costumes and textile conservation. Karen’s passion for historic costumes and textiles has led to the publication of two books, The Care and Display of Historic Clothing, and The House of Worth: Fashion Sketches 1916-1918. She is a member of the American Association for State and Local History Field Services Alliance and an active member of the Costume Society of America.

The Huntington City-Township Public Library is located at 255 W Park Dr., Huntington (approximately 30 minutes southwest of Ft. Wayne on US-24).

I have heard good things about the OCI? I will pass this information along to the people making the decisions.

Carole

We used the Oklahoma Correctional Institute. If the timespan is within their current project, it is free! (including shipping both ways).

The product is a DVD(s) with one pdf file per yearbook. Yearbooks are scanned at 300dpi which is adequate for printing at original size. Each pdf much be opened to be searched (unless you have ways to search multiple pdfs ... I know they exist, I did it a number of years ago).

They do clean up images to remove most markings.

Outside their current project, digitization costs $10-$15 per book depending on page count. I don't know about shipping.

Michael Gaines (ocirc at doc.ok.gov) was my contact last year. They did 5 boxes of 1950-1989 yearbooks in less than the advertised 8-10 weeks (more like 6).

Hi Elizabeth;

Our library has a set of marriage records in which the SSN's were written on the application. Mostly in the 1990's. To protect the privacy of that information, we removed them from the public floor and have them in a staff only area. The genealogy staff are the only ones permitted to make scans or copy from these particular records and when doing so they omit the SSN's before giving in to the patron.

I hope this helps.

Sincerely,
Stephanie

Hello,
Is anyone else have problems when using ALE getting the suggested records to show
up on the right side of the page? When I use my personal account the suggested
records appear and allow me to click on other people in the record and go to their
suggested records. ALE it is just a blank space, or if they do happen to appear it
won't allow us to click on another name and go to those records. Thanks!

Yes! I noticed that today as well. In fact, I had "suggested records" with a search I did, and then when I came back to the same search the suggested records were gone.

Not long after I joined this group, I seem to remember someone offering to share a program they had done on how to research the history of your house.

I've searched the archives but not found it.

I have been asked to do that program for our public library. I would appreciate hearing from anyone who has such a program to share. Also did you do it all yourself or bring in an architect, county recorder, etc.

We recently had a program at the Fairfax County Public Library. Speakers were a former staffer at county Planning and Zoning who visited and researched all the homes on our County Historic Sites list, updating them. And a new member of county Zoning (now called the Dept. of Planning and Development) also participated. They discussed various methods of researching your home, including both online sources and checking property tax lists, deeds and more. You might also include someone from your county's court records department who would know what to search there. The program was well attended and very helpful.

Yes, I would appreciate the handout. I'm starting from scratch so all options are open.

Brooke

"Google can bring you back 100,000 answers, but a librarian can bring you back the right one" Neil Gaiman

I'm a retired librarian from Danville, IL. I created a handout for patrons. I did a talk about finding the history of a house. If you like I could send an copy as an attachment. Let me know what you think.

Are any of you planning to attend RootsTech London? If so, I'd love to see you
there. Also, if anyone is aware of any extra stuff going on in connection with the
conference for genealogy librarians, please share. Personally, I'll be researching
at the British Library Wednesday morning, so I might run into some of you there.
(If you are considering going and haven't already registered to use their reading
room and requested items to be retrieved, you'll want to do that online right
away.)

Joe
I'm in a fairly large public library collection (at least for my population size). I agree with the collection development policy others have mentioned. As far as online goes - I do use online availability to sometimes influence buying/retention BUT ONLY in those areas that are not frequently used by my patrons. For instance, I'm in northeast Indiana and many of our settlers came from a few counties in Ohio and Pennsylvania, before that. I will continue to keep/buy print copies even if it is online for those key resources. But, for county histories from the south end of the state -- I'll keep what I have, even add a few if they're available for free on discussion lists, but I won't buy any because most of them are online and the counties are rarely, if ever, of interest to my patrons.

If you have a good relationship with the society, you might even ask them about their druthers when in a space crunch. (Non-binding of course.)

On Sat, Oct 5, 2019, 4:57 PM BJ Jamieson <bj.jamieson at gmail.com> wrote:
I'm the genealogy reference specialist at the Maine State Library ~ rather unusually, I didn't bring my work computer home with me this weekend, so replying from my personal email.
In addition to what others have said (yeah for written collection development policies!), what I’m doing:

A. On printed material that is now online: keeping it but moving from prime shelving (for example, old DAR lineage books are the first thing a patron currently sees when walking in – old and shabby looking, and not where anyone should start research) to either back shelves or our easily accessible storage area.

B. Methodology ~ I’m focusing my current book buying on methodology books, as the easy of online research means that many people do lots of research without really understanding good methodology or how records vary in different times/places. So I’m getting books on Italian research, DNA basics, where to look for military ancestors, and so on. I think it’s working – a local DAR chapter just gave us money for my choice of books; our technical services person delivered 14 of the new books to me yesterday at 9:30 a.m. and by the end of the day, 5 had already been checked out. OK, so one was to me, but still ;-) 

C. Overall weeding is at my discretion. I’m fairly quick to cull older DNA and technology books, but the 1850 census is the 1850 census, even if it’s much easier to access now than 50 years ago, so I’m tending to keep books on sources, for example, unless the condition of the book is the reason for weeding.

Hope this helps!
B.J.

Hello:

The West Valley Genealogical Society’s Library is expanding and growing. A good problem to have but it does bring up some questions.

First, we are looking for some advice on your shelving units that your library uses. What do you like about the brand/model you picked? If you had to do it over again, what would you change? We are looking at 6 shelve high units which would give us a lot more space for books.

Second, does your library have a policy for weeding their genealogical collection? The question does your library remove print materials from the collection if they are online? The society is split between moving more online vs. print. We do have a computer lab of 15 computer but are membership is over 700 plus members.

Message-ID: <2097263548.2767642.1571591248629@mail.yahoo.com>
Dear Genealibbers:
With the permission of the St. Tammany Parish Library Administration, I am sharing this opening. This position requires an MLS/MLIS. [https://recruiting.paylocity.com/Recruiting/Jobs/Details/175898](https://recruiting.paylocity.com/Recruiting/Jobs/Details/175898)
I do not work for STPL, but for a nearby academic library. I cannot answer most questions about the position, but I recommend Covington as a wonderful place to live and work with a rich history and culture. We are located just north of New Orleans, on the "Northshore". I'd be happy to respond to any questions off-list.

Historical UT Agricultural Publications Now Available as Digital Collections

Three unique agricultural publications from University of Tennessee Extension and the Agricultural Experiment Station have been preserved as digital collections by the University of Tennessee Libraries. These vintage publications, created between 1922 and 1990, contain historical information about agriculture in Tennessee.

The Tennessee Agricultural Experiment Station (today called AgResearch) was established in 1882 and the Division of Extension in 1914. Since the early 20th century, the two units have disseminated agricultural research to Tennessee farmers and rural residents. Extension agents demonstrated practical techniques to rural people on their farms and in their homes. With the goal of improving agriculture, health, and homemaking practices in rural communities, the Agricultural Experiment Station and UT Extension also shared research-based information through news releases, circulars, and reports.

Existing issues of these ephemeral publications were brittle and in need of preservation. In 2018, the UT Libraries secured a grant from Project Ceres (a collaboration between the US Agricultural Information Network, the Agriculture Network Information Collaborative, and the Center for Research Libraries) to digitize and preserve these historically significant publications.

The Tennessee Farm News Collection (digital.lib.utk.edu/tfn<https://digital.lib.utk.edu/tfn>) is a series of weekly news releases published by the UT Extension Service under various titles between 1921 and 1989. The news releases publicized market prices, farm shows, 4-H clubs, and agricultural training programs offered by UT.
(digital.lib.utk.edu/utesc<https://digital.lib.utk.edu/utesc>) contains bulletins from the UT Extension Service dating from 1925 through 1968, each with a unique title and topic. Topics include building plans, rural engineering, home gardening and horticultural advice, and farm and home management.

The Tennessee Farm and Home Science Collection (digital.lib.utk.edu/tfhs<https://digital.lib.utk.edu/tfhs>) holds quarterly reports published by the UT Agricultural Experiment Station from 1952 to 1990. Reports include research conducted at experiment stations across the state and information on personnel, grants, and agricultural field days.

While showcasing agricultural history in Tennessee, the publications in these collections also frequently reference cultural and political events of the time, such as World War I and the Great Depression, providing insight into how such events influenced life in Tennessee. More than 29,000 pages of historical agricultural publications are now easily searchable and freely available to anyone researching or just curious about the history of Tennessee agriculture.

Subject: [Genealib] Overhead Document Scanner
We are investigating ordering a *Crowley Overhead Document Scanner* Standalone for our department. I can think of lots of good reasons to get such as protecting oversize books and maps when coping, being able to copy books that have tight gutters, etc.

I see there are a lot of options for example: all-in-one touchscreen Panel PC.

Is this really necessary, does this make it easier to use the equipment.

But I would like to know of any negatives experiences that people have had with overhead scanners or with Crowley equipment.

We are investigating ordering a Crowley Overhead Document Scanner Standalone for our department. I can think of lots of good reasons to get such as protecting oversize books and maps when coping, being able to copy books that have tight gutters, etc.

I see there are a lot of options for example: all-in-one touchscreen Panel PC. Is this really necessary, does this make it easier to use the equipment.

But I would like to know of any negatives experiences that people have had with overhead scanners or with Crowley equipment.

I have given similar talks for many years on tracing the history of your house, tweaking the talk and handout for various audiences and locales. Attached is the latest one I have in my files. Hope it helps a fellow Ohioan!

Subject: [Genealib] Program on researching history of house

Not long after I joined this group, I seem to remember someone offering to share a program they had done on how to research the history of your house.

I've searched the archives but not found it.

I have been asked to do that program for our public library. I would appreciate hearing from anyone who has such a program to share. Also did you do it all yourself or bring in an architect, county recorder, etc.
Hi Becky --

This is a wonderful document!

Would you be OK with us adapting it for our library here in Massachusetts?

Cheers,

Libby Fox

Digital Projects Coordinator

The Daughters of the American Revolution is seeking an experienced digital projects coordinator in our Library to manage a strategic overhaul of our digital resources and streamline our digitization process. This person will work with the library staff to improve our patron services and help craft a long-term strategy to expand online access to the DAR library's collection.

The DAR Library, one of the nation's premier genealogical research centers, is ranked as one of the most important national institutions based on the uniqueness of sources. Our Library houses thousands of volumes of genealogical compilations, record abstracts, and other materials such as family histories, cemetery record transcriptions, and Bible records, making this a unique and valuable resource.

Essential Responsibilities:
* Plans and develops the DAR Library's online tools and reference outreach.
* Oversees Library digitization projects.
* Manages the intake, processing, cataloging, digitization and indexing of books, GRC records, and other materials into the digital collections.
* Assists researchers at the Reference Desk as needed.
* Tracks donations of materials.

Qualifications:

Education:
* MLS degree in Library Science/Information Science from an ALA accredited institution preferred.

Required Knowledge, Skills and Abilities:
* Minimum of 2-4 years of relevant library experience, or an equivalent combination of education, training and experience.
* Relevant technical skills, including facility with metadata standards (e.g. MARC, EAD, Dublin Core), taxonomies, digital information management, and repository platforms.
* Background and/or experience in American genealogical research and sources preferable.
* General professional knowledge of library policies and practices, including materials selection and collection development, information tools and searching techniques required. Experience with customer service in a library or similar setting is required. Experience working in reference services in a Special Library setting preferred.
* Proven record of project management.
* High proficiency in MS Office, including Word, Excel and Outlook.
* Ability to work effectively both independently and collaboratively; and to manage interruptions and shifting priorities and schedules.
* Excellent written and oral communication skills.
* Excellent planning, analytical, and organizational skills.
This position works at the NSDAR headquarters in Washington, D.C. First preference will be given to local/regional candidates.

Application close date is Tuesday, November 12, 2019.

Submission Requirements:

Only candidates that submit a COVER LETTER and RESUME outlining your qualifications and skills for the position will be considered further. Please send application information to:

We have a KIC Bookeye overhead scanner and a scanning photocopier. Rare books and original archival materials can only be copied on the KIC scanner since the item never touches glass. People just copying regular books also love the KIC scanner because it can scan two pages at a time and you see the scan before you save it. We sometimes need to move people copying regular books to the photocopier if there are people who need to copy rare books or original materials.

The biggest general negative is that it creates large image sizes. If you enable the email feature patrons need to limit the number of pages in a file so the resulting email isn't blocked by a firewall or an email attachment size limit.

Subject: Re: [Genealib] Personal Information found in records

In our state, NY, we can show births from older than 75 years, and marriages from older than 50 years. There are INDEXES which by law can come down to the present, but at least in NY the state is very strict on the privacy laws.

I just checked FamilySearch for Ohio and they have INDEXES down to 2007 on that site.

Yes, they do. I am looking at Ohio Death Certs down to 1953, and they are actual images of the death cert with all its' info. However, the entries at [Ohio Death Index, 1908-1932, 1938-1944, and 1958-2007] shows an EXTRACT of data but NOT an actual image.

We looked at doing a local funeral home, but....they started in 1976 [too recent to show; private company records; his employees raised a privacy concern [how much the services cost] ; and they had newspaper obits which are still under copyright.

OTOH: you might want to contact Digital Archivist Jennifer Brancato, East Texas Research Center, Stephen F. Austin University, PO Box 13055 SFA Station

On Wed, Oct 16, 2019 at 1:44 PM Elizabeth Glasgow <GlasgowE at wtcpl.org> wrote:

Our library just accepted a donation of the funeral records of a recently defunct local funeral home. The records begin in the late 1800s and extend to 2017. We have already copied the records up to 1965, indexed them and placed them on the library shelves, but we are worried about sensitive information found in the records as we approach current date. We assume we will remove social security numbers and phone numbers moving forward, but were still wondering about other information and how other libraries have approached donations like this.

Many thanks in advance,

"Books must be treated with respect, we feel that in our bones, because words have power. Bring enough words together they can bend space and time." - Terry Prachett's *Going Postal*

If anyone in *Atlanta* or *San Francisco* is interested in a competent speaker on Irish genealogy--one of our local speakers, Kevin Cassidy, is interested in presenting in either of those cities (he will be traveling there somewhat regularly) in the coming year. He has been doing Irish research for 25 years, and has presented on various aspects of Irish genealogy research at our library several times, as well as at other locations in the Midwest. He will even be doing a program in Belfast [https://www.eventbrite.co.uk/e/using-american-records-to-tear-down-irish-brickwalls-tickets-76005312937?fbclid=IwAR0M5H1MDSC03Mx8p1aUBNHWvy83tMcp5oZXf0a92uW3i2wGnktF4Kv_Q]. He is knowledgeable, reliable and punctual (as well as inexpensive).

If interested, contact him (Kevin Cassidy) at greengenes1 at cox.net.

Subject: [Genealib] Job opening at United States Holocaust Memorial Museum
Message-ID: <CAL768sV0dgXvDkCNUZDL0dgrxDOF_5J_EFNiRcUMRgpaMNoYQ@mail.gmail.com>

Hi all,

The United States Holocaust Memorial Museum has a job opening for a technical information specialist to assist researchers, frequently genealogists, find information on people persecuted by the Nazis.

The application website and full job description are below. Please forward to anyone you think might be interested.

thanks,

Megan Lewis
reference librarian, United States Holocaust Memorial Museum
Technical Information Specialist, United States Holocaust Memorial Museum
https://www.ushmm.org/information/career-volunteer-opportunities/careers/technical-information-specialist

The position is located in the Division of the Holocaust Survivors and Victims Resource Center (HSVRC), National Institute of Holocaust Documentation at the United States Holocaust Memorial Museum. The mission of the HSVRC is to ensure that the individual experiences of survivors and victims of the Holocaust and Nazi-era persecution are recorded, preserved, and disseminated for future generations. The Resource Center aims to accomplish this mission by collecting information about Jewish and non-Jewish survivors and victims of the Holocaust and creating research tools and resources that provide access to this information.

The HSVRC serves as the main access point to the Museum’s extensive holdings of name-related data and databases that can help trace the fates of millions of people persecuted by Nazi Germany and its collaborators. The work of the HSVRC allows the Museum to keep its pledge to make this information available to Holocaust survivors and others in a timely fashion. Staff works directly with the public in the Resource Center’s space on the second floor of the Museum and also responds to requests submitted by phone, fax, email, and online. Detailed reference services and basic research are provided to scholars and the general public. Extensive research is provided free of charge to survivors, their families, and the families of victims. In addition, staff conducts research to support a broad range of Museum programming and to assist Development with engaging and re-engaging potential and past donors.

This is a one-year term, full-time donated position (non-Federal), paid with the Museum’s donated funds. Salary is commensurate with experience.

Duties, and Responsibilities for the role

Conducts advanced research, including extensive research requests, in the Museum’s archival holdings and library holdings for survivors, their families, and the families of victims.

Provides reference and research services to Museum patrons and staff who contact the HSVRC by email, telephone, mail, online form, or in person in the HSVRC public space.

Analyzes documentation found and presents findings in oral or written form; includes copies and explanations of relevant documentation as well as necessary secondary source materials that pertain to the request.

Ensures findings, supporting documentation, explanations, and all correspondence for extensive research cases are included and updated in the reference and request informational system or other reference tracking systems so that findings can be easily searched and referenced.

Demonstrates how to search the Holocaust Survivors and Victims (HSV) Database, OuSArchiv database, Collections Search, and other online databases as well as reference materials located in the public reference space and answers operational and functionality questions concerning aspects of HSV Database and other electronic or online resources.

Makes recommendations to improve functionality of the HSV Database and other electronic resources based on end-user experience.

Reports technical problems and functionality issues with the HSV Database and other electronic resources to the Chief, Data Management Branch, Division of Digital Assets Management and Preservation so that they can be resolved in a timely manner.
Creates descriptive information about the contents of the Arolsen Archives Collection and other archival sources that include finding aids, catalog entries, thesauri, and other materials.
Distributes Meed Registry forms to survivors or family members or friends on behalf of survivors who are not registered and provides information about the registration process. Works with Museum volunteers and interns to support the work of the HSVRC.
Performs other related duties as assigned.

Minimum Qualifications for the role

Knowledge of established methods and techniques in the retrieval, analysis, interpretation, evaluation, and presentation of a broad range of name-related documentation from the Museum's archival and other holdings.
Knowledge of personal computers, databases, and software sufficient to establish and access files, maintain project schedules, prepare reports and texts, and work with the various technical systems of the National Institute of Holocaust Documentation, e.g. HSV Database, OuSArchiv, Illumin reference and research request management system, and Collections Search.
Knowledge of the Museum's archival collections, their content, and organization as well as related source materials in the holdings of other organizations.
Knowledge of archival, published, and electronic resources in historical name-related research
Knowledge of standard practices in citing sources used in research.
Strong communication skills - both oral and written - to prepare answers understandable to a layperson in response to complex research requests.
Historical knowledge of the Holocaust, World War II, and the 1933-45 period of Nazi domination, in particular knowledge of the camp system and of Holocaust-related documents and records.
Basic knowledge of German in order to understand and interpret documents.

<Message-ID: <5DB9DF8B020000AA000D1F06@volusia.org>

Hello;
I have a patron whose father was orphaned at a young age and ended up living in a Catholic orphanage in Missippi. He was born in Natchez in 1918, so I think that D'Evereux was probably where he grew up. Does anyone know if there are records for the orphanage and where they might be located? My patron is trying to trace her family back further, but doesn't even know the names of her grandparents, as her father would never speak about his early years.

I found an article about the orphanage online, and contact information was given. I called the phone number and left a message, but so far have not heard back. The article was from 2010 so the info may not be valid anymore. I'm hoping someone in the area can advise me on any info available.

Thanks in advance,
Hi Kim,

I'm guessing this is the D'Evereux Hall Orphanage overseen by the Brothers of the Sacred Heart?

The Diocese of Jackson should be able to point you in the right direction as to the availability of records. Each diocese is different, some being more generous with records than others. I have not worked with the Diocese of Jackson directly, however, in assisting patrons in the past I've had some which will conduct a reasonably exhaustive search while others will adamantly declare their archives closed with no access whatsoever. If your patron is a member of a catholic church, it would be helpful for her to have a letter of support from her local parish when requesting records from the diocese. While not required, this type of letter assists in introducing the patron to the diocese, and organizes the record type/list needed and for what purposes. Requesting specific records, such as admittance records, school grades, next of kin details, and discharge records, should help the diocese in the search on your patron's behalf.

Good luck.

Ernest;
Thank you. The phone number on the web site is the one I called. I left a voice
mail but haven't heard back yet. Since the article was written in 2010, I don't
know if this is still a good number to use or not. I left a message for someone,
but I don't know if it's the right person.
I appreciate you taking the time to find the link for me though!

Sincerely,
Kim

From: jkistler at morgancountylibrary.info (Janice Kistler)
Date: Wed, 30 Oct 2019 20:25:06 +0000
Subject: [Genealib] Donation policy
Message-ID: <F946509CFF48A14E83FE81D7FB74C95F1DA24DF1@VONNEGUT.mcpl.local>

For those of you who are working in libraries, do you have a donation policy? If so would you be willing to share it?

Here's my situation in (hopefully) less than a year I will be moving into a different part of the library thanks to a massive addition and renovation project. I'm concerned that people will come out of the wood work trying to donate anything and everything that they think should be included in our genealogy collection. Our expansion project is mainly about providing more "people space." There are days when my two small tables (and all the other tables in the library) in the genealogy area are taken over by students, tutors, social workers, etc. I don't mind this but sometimes folks come in to look up their family histories and find our space occupied. So we have a definite need for more 'people space.'

I'm thankful these growing pains are being addressed by management. But I have a strong feeling that if we consolidate all the items that are in 2 or 4 different spaces right now (that should be in the genealogy area) we are going to be cramped! There will be no room for donated materials. We do have a policy for books and other items to the library but this isn't specific to the historical and familial nature of what I am offered.'

So please help if you can.
