A big thank you for involving the community in Vision 20/20

Posted January 15, 2014 at 4:25 pm by [vision2020](#)

I want to thank the Vision Team for the invitation to attend Monday's Vision 20/20 Community Input Forum. As an educator, I have always believed it is very important to include community stakeholders in the development of any strategic plan that has potential impact on students, community, and economic development etc.

I was very excited and pleased at the varying degrees of stakeholders invited to give input on the USFSP strategic plan. The facilitation of the process was done exceptionally well, and the facilitators were very knowledgeable with the work flow processes and what key components were necessary. It was also refreshing to see that prior to the meeting, the vision team had identified the key areas of focus. Most of all, the heartfelt sincerity that our input was valuable and will be considered as the plan is developed.

As a Pinellas County School employee, it is very important to integrate our efforts to make sure that our students, within our community, are provided with high level choices.
