M. LILIENTHAL & CO.,
IMPORTERS OF
HAVANA TOBACCO,
No. 177 PEARL STREET, NEW YORK.

THE E. D. ALBERO CO.,
MANUFACTURERS OF CIGAR-BOX LUMBER
IN SPANISH CEDAR AND DOMESTIC WOODS,
IMITATION SPANISH CEDAR CIGAR-BOX LUMBER,
Are prepared to furnish this Lumber to Box-Makers in the usual lengths and widths, stained, grained and polished ready for use.
On examination it will be found a perfect imitation of Spanish Cedar in color and grain, and so far superior to any in the market that no comparison can be made. Being sawed and cut from the finest Poplar (the wood preferred by all experienced Box-Makers), and thoroughly planed and polished, the boards are straight and of even surface. The ground color and grain are durable, and the polishing is a patent process, leaving a bright gloss on the wood. As prepared by our patent process, this Lumber can be used as a substitute for Spanish Cedar at less than one-half its cost.
OUR SPANISH CEDAR IS IMPORTED DIRECTLY FROM MEXICO via NEW ORLEANS.
Mills and Warehouse—688-707 W. 6th Street, Cincinnati.

Almirall & Co.,
IMPORTERS OF
Havana Tobacco,
PROPRIETORS OF THE BRAND
FLOR DE LAS VEGAS.

The Tobacco Leaf.
NEW YORK, SATURDAY, JUNE 19, 1880.
DR. T. R. SPENCE, OF CINCINNATI, FOR CONGRESS.
The Cincinnati Trade List of a recent date says—
There is discussion as to the probabilities of who will make the race for Congress in the First District at the next election. The business interest of that District are large and important, and they ought to be represented by a thoroughly alert and intelligent business man. It requires such a man to understand our present system of internal revenue, which is a matter of the first magnitude in Cincinnati.
It has been suggested by prominent merchants and manufacturers that Dr. T. R. Spence understands the subject referred to as intimately as any gentleman in this city. He has had large experience with the system and is a man of broad views and an intelligent comprehension of the business wants of the people. He was formerly a member of the Senate of Michigan and has a good understanding of parliamentary practice. He understands our revenue system intimately and is well read upon all questions of the day. No man in the First District is better qualified to represent its interests.
We doubt if there is a tobacco tradesman in this country who will not heartily say, "By all means that are appropriate, let the Doctor go to Congress!" How long, how faithfully and how well Doctor Spence has served the tobacco trade is known to everybody familiar with the history of that trade during the past ten or twelve years. He deserves a seat in Congress, and we sincerely hope that his admirers in the First Ohio District will send him there. We remember, at this time, having suggested to Dr. Spence in Washington, during the struggle for the reduction of the tobacco tax, that on his next visit to the Capitol he ought to come as a member of the House of Representatives. His reply to us was, that his business interests would prevent his acceptance of a Congressional nomination if tendered to him. This plea should not be allowed to prevail. He is wanted in the public service.

WHAT CONGRESS DID FOR THE TOBACCO TRADE.
Congress adjourned at 12 M., Wednesday. The session is called an "idle" one, but 1,197 bills and joint resolutions were introduced in the Senate, and 4,288 bills and joint resolutions in the House of Representatives. The numbers introduced during the first (or "extra") session were respectively 773 and 2,526, making a grand total of 8,744 bills and joint resolutions introduced thus far during the present Congress.
Many questions relating, in one way and another, to the tobacco industry were discussed. The following important bills were passed:—
"The export tobacco bill, which authorizes the bonds of manufacturers of tobacco, snuff, and cigars exporting the same to be cancelled at the port of clearance."

Western Cigar Manufacturers will find it to their advantage to deal with us.

WESTERN TOBACCO CROP REPORTS

(Special to THE TOBACCO LEAF.)

KENTUCKY.

Mason County District.

Murphysville, June 10.—We are in a drouth again, having had no rain since my last. Seemingly we had a good prospect yesterday, but it has all passed away. Little or no tobacco plants set; plants backward and scarce. There can't be a full crop if it is ever so seasonable, in consequence of rust and the fly. The wheat crop will be very late. E. L. G.

Bradford, Bracken Co., June 10.—A ride over the counties of Bracken and Pendleton last week convinces me that nothing like a full crop of tobacco can be planted. I noticed along the road several patches that had been planted, and on examination found that about one-fourth of them had died from the effects of the excessive hot weather. We have plenty of plants along the Ohio river, but the prospect for a crop out back in the Oak Hills is indeed gloomy. I have set on my farm twenty acres of tobacco, and will plant about thirty more the first good season. L. J. B. & Son.

Carlisle, Nicholas Co., June 8.—Within the past week good rains have fallen, and but for the fact that the plants are still so wet, a large crop could have been put out. It is not too late yet to have a good season, and plants are in sufficient quantity. But unless good rains fall in the next ten days it will be too late. The tone of the market here is firm, but not buoyant. F. M. P. & Co.

Poplar Plains, Fleming Co., June 6.—We had a fine rain during the fore part of last week. The late plants are coming on very well. The prospects are some better for setting. It is now dry and windy, and no rain. The sun is shining bright. Don't know how the season will turn out, as the time is at hand when the plants should grow fast, or they will not be in time, unless we should have a very late season. T. H.

Johnson's Junction, Fleming Co., June 14.—We had a fine rain last night, which will make a tobacco season. Very little set up to this date, and we can't see how an average crop can be set, even with the most sons from now on. Wheat harvest has commenced with us with every prospect for a fine yield, both in quality and quantity. W. S. S.

Germantown, Mason Co., June 14.—We had a fine rain last evening, and last night a splendid tobacco season. There will be a good deal set, as plants have been growing in the beds for the last week or ten days. The tobacco set some two weeks since is looking and growing finely. J. E. H.

Poplar Plains, Fleming Co., June 13.—We are having some very hot and dry weather. Had a little rain last week, but it was not a very general one, and a good many plants are supposed to be dead, as there was not enough rain, and then came the hot weather. A few are planting their ground in corn, and unless it rains soon the crop will be short. T. H.

Carlisle, Nicholas Co., June 14.—Splendid rains throughout the section last night, and the most farmers are all busy setting plants, and are in fine spirits. The area will not be large, however, as some have already put in corn where they had designed tobacco. It is fair to presume there will be a good average crop. F. M. P. & Co.

Headquarters, Nicholas Co., June 14.—For the past two weeks we have had dry weather; just in the nick of time we had a good rain last evening, affording a good season for setting tobacco, and everything is setting to-day. W. J. K.

Cowan Station, Fleming Co., June 13.—The condition of the tobacco crop has improved. We had fine rains, but they were not general. All the plants were set out that were large enough. The good season was confined to this county alone. Plants are scarce. There will not be enough to set an average crop. M. T. M.

Augusta, Bracken Co., June 15.—We had a good rain on Sunday and yesterday. Farmers who have plants are setting. Many farmers have to beg and in some cases to buy plants. They are scarce, except where canvas is used, and our farmers have as yet used but little of it. It is not probable now that a large crop will be set in Bracken. If we get an average one we will do well, as it is getting full time the setting was over, while, perhaps, not over one-third of the crop of that is set. The present crop will be in market by Sept. 1st. S. T. P.

Crittenden, Grant Co., June 11.—The prospect now in regard to the tobacco crop in this section is about 66 per cent. of a full crop. Some planters will get out more, and some less than last season. Possibly with very favorable weather the crop may reach 80 per cent. of a full one. There is 25 per cent. now set, and only doing tolerably well. Some plants are dying. This refers to a part of Grant, Gallatin, Boone, Kenton and Pendleton Counties. E. K. McC.

California, Campbell Co., June 10.—The fine rains of the past few days make the prospects for planting tobacco more favorable than was anticipated a few weeks ago, though there is still great complaint of scarcity of plants. Two or three portions of the land has been set in corn. The plants are very small to set, or the most of them. W. P. E.

Havilandville, Harrison Co., June 15.—On the 14th one of the most heavy rains fell in this section that was ever known. Already some farmers have their whole crop set out, and those that have not are all setting. The most reliable information at present shows that there will be a pretty good crop of tobacco. It is not so brisk as heretofore, and buyers are not so hot in their purchases. O. L.

Owen County District.
Monterey, Owen Co., June 10.—There is but little change in the market this week; the tendency is downward. But little of the contemplated crop set yet, owing to the scarcity of plants, and also to the lack of seasons. I think if we have two more good rains in this month, we will get out an average crop. J. W. F.

Truiville, Owen Co., June 12.—Prices of tobacco range from 5 to 15c. The crop at present is very unfavorable. J. O.

Worthville, Carroll Co., June 11.—There has been little done in setting out tobacco since my last. If we have rain the crop will soon be finished. Some farmers have finished. J. S.

Flag Fork, Franklin Co., June 11.—Since my last report we have not had any seasons to set tobacco, and there is great complaint of grasshoppers eating what has been set. There can't be more than a half crop set in this section, account of scarcity of plants. Some few have plenty of plants, but others have none. If we have rains in time I think we will get about a half crop set. A. A. B.

Ghent, Carroll Co., June 8.—There has been about 20 per cent. of a usual crop planted. Farmers are busy preparing land to plant, and if there should be a good season there will be 50 per cent. of land planted this week of the crop. That is anticipated. Plants are doing well in the beds, and, if seasonable, the whole crop will be set in the next twenty days. Fine growing weather. E. S. S.

Carrollton, Carroll Co., June 12.—We have had splendid rains last night and to-day, and farmers are busy planting tobacco. The crop in this county will be nearly if not all set out this season. J. M. J.

Harmony, Owen Co., June 12.—We haven't had any rain since the 5th, and very little tobacco has been set out yet. There are not enough plants to set out say half a crop if seasonable. F. M. H.

Gratz, Owen Co., June 14.—The fine rains of the last three days will ensure almost a full crop. Some had large crops planted out before this season. The old crop is being shipped out very rapidly and will soon be all in market. S. L.

Owenton, Owen Co., June 15.—We had a very hard rain in all this region Sunday night, and at intervals since, and the weather yet is unsettled. You can now say that the bulk of the crop is set; those having plenty of plants finished, leaving their crops later. The bulk of the crop was set last year on the 28th of June. The rain will make the smallest plants available before that date. E. G. R.

Paducah Section.

Fulton, Fulton Co., June 10.—Since my last we have had regular seasons for setting tobacco plants, and many farmers are done planting, and others are planting more than they would have done without constant seasons. We now estimate the crop at two-thirds for this season. Heat weighing is now the most exciting interest of the day, and we are falling short of our expectations both in quality and quantity. There is nothing to encourage remunerative prices for what little we will have for market. R. A. B.

Mayfield, Graves Co., June 7.—There has been a fine season for setting plants, and all who had large plants are about through planting, while those who had none large enough have to wait. I don't think there can be over four-thirds of an average crop planted this year, unless we should have very superior seasons during this month. The present crop is falling short of my estimate, not panning out as well as I expected. W. S. M.

Green River District.

Murray, Hopkins Co., June 12.—Planting is about over. I don't know to what extent the crop will reach. Will be able to give a fuller report in my next. A. H. & Bro.

Dycusburg, Crittenden Co., June 12.—On the 5th inst. we had another good rain. This week has been a seasonable and favorable to planting the crop. Farmers report fair progress so far, and a good stand of what has been set out. The setting is about three-fourths of an average crop. The wheat crop is being harvested in good condition; it will be about half as large as last year's crop. S. H. C. & Co.

Providence, Webster Co., June 12.—Weather favorable for growing crop. Entire crop not yet planted, but will be should there be rain within ten days. J. & B.

Redrivers.

Owensboro, Daviess Co., June 12.—Since my last report we have had very hot and dry weather, consequently, no additional planting. Some planters report plants left in beds as not growing and turning yellow, while other planters report their plants as doing well. Market very quiet. Planters refuse to make concessions on former prices, and dealers decline to pay the old prices, hence nothing doing. A. C. T. & Co.

Export.

Farmington, Graves Co., June 10.—The prospect at this time is more favorable than when I wrote about ten days ago. I think, from the best information I can get, and what I can see, that there will be two-thirds of a crop raised if we can have a few more good seasons. T. G. T.

Clarksville.

Hadensville, Todd Co., June 12.—The prospects for a crop of tobacco here are very gloomy. One-half of an average crop is all, in my opinion, that can be raised under the most favorable seasons. From 25 to 30 per cent. is all that is planted in this section. Our market here is dull and sluggish; but little life in it yet. The weather is very hot. D. B. S.

Olmsstead, Logan Co., June 8.—We have had several good planting seasons since the 21st ult., and almost a continuous season since the 27th ult. The planting in this section, to this date, does not exceed half of an average crop. With our weather, we were fortunate enough to have saved their plants have nearly, and in some instances planted their crops, in a large number have only been able to make small plantings. There is more indifference about planting than I have ever seen, many parties having set a part of the land intended for tobacco to other crops. There will be no special effort made to plant, beyond the few plants they have on hand. Under any circumstance, the acreage will be less than last year, and under an average. T. E. B.

Olmsstead, Logan Co., June 15.—We have had dry and hot weather during the past week, and no further planting has been done since I last reported. I find, upon further inquiry, that my estimate made of the planting in my report of last week, was too large, and that the extent of planting, to this date, does not exceed 33 or 35 per cent. of an average acreage at the outside. I met with the deputy marshal yesterday, taking the census of this district, and he estimated it at only 25 per cent. The stand is indifferent in many instances. I made a trip of 20 miles through the country several days ago, and found the planting was from 20 to 33 per cent. of an average acreage. There is much indifference about making further plantings. T. E. B.

Hartsville, June 15.—The outlook for a crop of tobacco on the Upper Cumberland is not good. About one-third of a crop planted, and is not doing well. Plants very scarce. J. G. L.

Outside Points.

Franklin, Simpson Co., June 9.—We have had fine seasons. About three-quarters of a crop planted. I think this county will have a full crop. G. W. D.

OHIO.

Brown County District.

Felicity, Clermont Co., June 10.—The tobacco plants in this locality are scarce and very small, except in canvassed beds. The weather has been seasonable of late for planting, but owing to the reasons stated above, there has been a very small proportion of the crop planted as yet; and we are of the opinion there cannot be the quantity produced that was anticipated. W. Bros.

New Richmond, Clermont Co., June 8.—We have had another good rain since my last report, and the crop is fully one-third planted and the stand is good. I have seen one piece of ten acres that is growing finely without a plant missing. Plenty plants to set the full crop next season. A. K.

New Richmond, Clermont Co., June 15.—We were visited by one of the heaviest rains yesterday evening that was ever known to fall here. The damage to tobacco on steep hills and low bottoms is considerable, completely washing the soil from the former, and overflowing the latter. The entire crop will probably be set this season, except in some cases referred to, where the ground will have to be reworked and manured in hills. The air is cool, and all that is set to-day will undoubtedly live. A. T. K.

Aberdeen, Brown Co., June 14.—A copious rain has just fallen, which will enable the farmers to set what plants they have; but the scarcity of them will prevent a half crop being set. Should it remain seasonable, a very desirable crop may be had, but the acreage is very small. H. F. T. & Son.

Cedron, Clermont Co., June 12.—At this date some of our planters are finishing up planting their entire crop, and, if they have any left, are distributing their surplus plants among their neighbors. What has been set is looking finely. First planting is about all worked over and is growing. A fair crop will be picked if seasonable from this time forward, although we don't anticipate a full crop in the district. G. T. B.

Eastern Ohio District.

Calais, Monroe Co., June 9.—Some small amount of tobacco planted since last rain, but prospects are still discouraging in consequence of the general dry for plants. I do not think that we can come near a crop as last year. C. L. E.

Bartlett, Washington Co., O., June 8.—The prospect for a tobacco crop in this district is not good. I have not heard of but one planter who has plants enough for his crop. No planting done yet to speak of. Weather yet dry. Not much tobacco to set in this neighborhood. W. S.

Seneca, Guernsey Co., June 14.—I have written the most favorable reports that circumstances would permit, but the crop of tobacco in Eastern Ohio will certainly fall below a half crop, on account of the failure of plants, an average crop being from sixteen to eighteen thousand hogheads, weight per hoghead being about eight hundred pounds average. W. B. P.

Chester Hill, Morgan Co., June 14.—There has been no change in the situation since writing to you; very little tobacco planted as yet. At this writing it has commenced raining, and may be a season for planting. J. C. M.

McConnellsville, Morgan Co., June 13.—Since my last there is some improvement in our prospect for a crop of tobacco. We have had some rain, and, if it keeps seasonable from now on, our crop may be in-

creased to a half crop. The planting will be late generally. E. M.

Batesville, June 14.—We have had good rains in Eastern Ohio in the last few days. Considerable tobacco will be planted this season, and the majority of plants, the crop will be light here. G. R. A.

Hendrysburg, Belmont Co., June 15.—Yesterday we had a fine rain, and the farmers are planting some little tobacco, and as the rain continues to-day all the plants that are large enough will be set. I do not think the breadth of planting will exceed the estimate of one and two weeks ago. A few more days will fully develop the whole business in this part of Ohio. R. W. J.

INDIANA.

Fine Grade.

Grandview, Spencer Co., June 12.—We had a very fair season for transplanting tobacco plants, the first of this week, of which the farmers availed themselves, but since then the weather has been dry and very hot, so that most of the plants set have died. In this writing, 2 P. M., the mercury stands at 98° in the shade. It seems as if all the Powers are combined to prevent us raising any tobacco this year. The plants transplanted two weeks since are looking very badly on account of the extremely hot weather. C. S.

Rockport, Spencer Co., June 14.—Since writing last there is nothing new to report. The weather here has continued dry for ten days past, and if a drouth should be ahead of us we may yet have a short crop. R. S. N.

Regie.

Boonville, Warwick Co., June 8.—We have had very seasonable weather since last writing, but, owing to scarcity and smallness of plants, very little planting has been done. I should think only about ten per cent. of crop. Of 25 farmers interviewed, whose acreage last year, jointly, was 132, this year will be 74. The condition of this county will represent fairly the entire southern part of the State. J. S. & Co.

MISSOURI.

Export and Home Trade.

Fayette, Howard Co., June 9.—The tobacco crop of this county is not more than one-eighth of an average one, and we are not going to market more than one-eighth as much as usual. T. A. F. & Co.

Keytesville, June 9.—A good many plant-beds have failed, yet there will be as much tobacco set as last year. There has been no lack of moisture here for three weeks. Three-fourths of the crops now planted. This is the earliest set crop Missouri ever had. G. M. D.

Brunswick, Chariton Co., June 8.—Season continues favorable for setting out plants, which are growing rapidly. Possibly two-thirds of a crop has already been planted. There is some complaint of cut worm after such continued cool weather as we have had, but its ravages have not been of an alarming nature so far. W. A. D.

Brunswick, Chariton Co., June 15.—The general belief is that in our section we will average a rather large planting than during the past three years. Quite a number of farmers say they have finished; whilst in but a few sections do they now complain of plant failures. Many are awaiting another rain to set out the land recently prepared. W. A. D.

TENNESSEE.

Light Clarksville.

Paris, Henry Co., June 14.—The weather has been seasonable since my last, and I think the most of the tobacco has been planted that was aimed at, amounting to two-thirds or three-fourths of an average crop. There was too much wheat sown and cotton planted for a full crop. R. D. C.

West Tennessee District.

Rome, Smith Co., June 8.—We have had plenty of rain since the 25th of May, though the last reports that I got justifies the opinion that there will not be more than half of an average crop of tobacco planted in 1880 in Trousdale, Sumner, Macon, Smith, Wilson, Jackson and Clay counties. These are all of the counties that I have heard anything from that was reliable in upper Cumberland country since they commenced planting the present crop of tobacco. They have planted about one-fourth of an average crop up to date. J. B. J.

Ralston, June 5.—Since my last nothing has transpired worthy of special report. What plants are set are growing finely. I have been over this and adjoining counties since my last, and I am now inclined to the opinion that a half crop will not be set. A good heavy season is setting in, and a wet season may have only one-fourth to one-half of their usual planting. E. C. L.

Ralston, Weakley Co., June 14.—We have had so much rain for the last three weeks that all crops have gotten very grassy. I find in some sections that the tobacco crop is damaged by wet weather rot, but in most cases will be reset by the late plants. As a general thing the crop is doing well, with no expectation, however, of a larger crop than stated in my last report. E. C. L.

SEED LEAF CROP REPORTS.

(Special to THE TOBACCO LEAF.)

NEW YORK.

Baldwinsville (Onondaga County) Gazette, June 10.—A good many farmers have already commenced setting out plants. They are of fair size, and so far as we have noticed are healthy and strong. We believe the season is setting in, and that the planting will be two or three weeks earlier this season than last. There is no lack of good plants this year. The preparations are on a large scale this season in this section for raising both Connecticut Broad leaf and Domestic Havana, and the acreage will be large.

OHIO.

Eaton, Preble Co., O., June 8.—There has been nothing done in the trade since our last that we have reported. Planting is about all done, and the plants are looking fine. Plenty of rain and warm weather. J. H. M. & Co.

Eaton, June 15.—Nothing doing here in the trade; no sales that we have heard of in the last week. The growing crop is looking very well so far. Too much rain now for the good of the plants. J. H. M. & Co.

Ansonia, Darke Co., June 15.—The tobacco is nearly all planted; the late rains have given our tobacco farmers a good chance, but just now it has been damaged by too much rain. The acreage will be larger than last year. Plants are plenty. The farmers are making a good effort, and will more than likely produce fair crops. Heretofore tobacco raising has been made a secondary matter, but now they seem to think it pays to care for the crop. W. E. H.

Arnold, Wayne Co., June 8.—Setting tobacco plants is the order of the day now. The plants are very good, and the recent rains have enabled growers to get out about two-thirds, and they are doing well. We are awaiting another good rain to set the balance. Tobacco is advancing slowly, and growers are hopeful for the future. We have no sales to report since our last. D. J.

Pike Station, Wayne Co., June 12.—We need rain very much to finish setting out plants. Those already set are dying for want of rain. Plants are good. No sales this week. Other crops are looking well. A. J. W.

Seville, Medina Co., June 14.—A fine shower Saturday evening induced some to set plants on the Sabbath. I am sorry to say, but to-day has been fine, and the majority of plants left until will go in, except a few who are always short, partly from neglect and depending on beds. Tonight it is raining heavily. I presume all will be supplied with plants within a week, owing to the rapid growth at this season of the year, and about the usual amount will be planted. Not much old moving, the few buyers and many holders being too far apart in their views. W. L. P.

WISCONSIN.

Seed Leaf District.

Janesville, Rock Co., June 12.—Warm and sultry; 90° in the shade, plants plenty. Five per cent. more plants set than last year, but the quality is poor. Some buyers in the market; prices about the same. W. T. P.

Edgerton, Rock Co., June 8.—Farmers have commenced setting the '80 crop, but cut worms are very bad, taking it about as soon as set. Plants are plenty. The acreage will be considerably larger than last year. Very much to finish setting out plants. The country is being thoroughly scoured for cut worms. The season brings good full prices when to be found with a range from 8 to 15c. There are from 4,000 to 5,000 cases of Seed leaf remaining in growers' hands and held from 3 to 10c. Market quiet, yet something doing all the time, but with no excitement except for Spanish.

Madison, Dane Co., June 14.—The market for Seed leaf continues about the same as last week. Very little Spanish remains in farmers' hands. Have heard of a sale of 50 cases Spanish at 11c, and one small lot at 12c. Planting is progressing finely, with frequent rains and plenty of plants. The indications are that the planting will be done in good season. J. B. H.

PENNSYLVANIA.

Petersburg, Pa., June 11.—All last night and at this writing (6 A. M.) it has been raining heavily, soaking the soil thoroughly, and making it the best weather for planting tobacco. Large amounts of plants have been set out, but the great drawback is in getting plants. Orders for from 5,000 to 35,000 plants are coming in daily by mail and telegraph. Some orders have been filled, but the bulk of them cannot. In our vicinity plants have started to grow finely, and if nothing interferes, they can grow without causing any additional trouble. Cut-worms on the whole are not very bad, but it seems if one insect ceases, or a remedy is found to stop its ravages, another will make its appearance. The "army worm," as it is generally termed, has arrived in our county, and some wheat fields are infested by millions of them. They may not do much much loss as they might have done if they had shown themselves a week or two sooner, but it is reported that they cut off the heads of grain, and therefore create immense loss. It is now reported that they attack the tobacco plant. At Mr. S. Groff's farm, where they are in abundance, they are at the tobacco as high as the stalks, and devouring it speedily. Whether its attacks on tobacco are the same as on wheat, remains to be seen. The number of acres in tobacco with us in Lancaster County, I think, are not greater than last year; but the increase is in other counties, where they are just getting the tobacco fever, and I suppose the majority of them will get it in such a manner as either to partly strangle them or die from its effect, if they have been stimulated by the high prices realized for Pennsylvania leaf during the past few years. But it will require care, tact, energy and perseverance from the time seed is scattered until stripping is finished, and if everything is done in a superior manner, the raiser may be rewarded for all work. H. K. M.

Lancaster New Era, June 12.—As there are only two or three hundred cases of old tobacco left in this market, it is not to be expected that the market for these goods will show much activity. New tobacco has moved off lightly since our last report. Two packings have been sold, amounting in the aggregate to about 900 cases, and a fair profit, we understand, was realized on them. We are now fairly lamed up upon the season of 1880, and we have both good and bad reports. Most of the plants have been set out—perhaps 80 or more per cent. of the entire crop. There has been a great scarcity of plants almost everywhere.

EL PRINCIPE DE GALES CIGAR FACTORY OF KEY WEST.

Sole Agents.

THE TOBACCO MARKET.

NEW YORK.

The local leaf tobacco market has been fairly active in all departments during the past week. Of Western leaf we have about 703 hhds, which is a very large increase over the number previously reported. As yet the Regie operators, though looking around, and, on the alert, are buying but little. They are probably awaiting instructions from their principals. A month hence we shall probably hear from them in good earnest. In cutting leaf little has been done the past week, for various reasons, and among others, for the reason that the number of cuttings is small. As yet, Mason County, to be had here either old or new. Late advices from Cincinnati respecting this sort, indicate increased firmness in prices, even an advance, in that section.

Messrs. SAWYER, WALLACE & Co. report to THE TOBACCO LEAF as follows:

Western Leaf.—The market continues quiet, with no special feature of interest; the sales reported since our last amounting to 763 hhds, of which 651 for export, the bulk of them to Spain, as hinted at in our previous issue, 71 to jobbers, 31 to manufacturers, and 10 to cutters.

1st week.	2d week.	3d week.	4th week.	5th week.	Total.

April.	265	230	293	3,412	4,300
May.	318	680	762	354	2,490
June.	354	763			1,147

Receipts Western month—5,554 hhds. Last year, 4,955 hhds. From New Orleans 20 do. do. Baltimore 20 do. do. Virginia 586 do. 1,065 do.

Total 6,160 hhds. Total 6,320 hhds. Receipts this year—

From New Orleans 126 do. 33 do. do. Baltimore 134 do. 788 do. do. Virginia 5,216 do. 5,253 do.

Total 5,301 hhds. Total 29,283 hhds.

Expt. Manf. Jobbr. Spec. Unkn. Total. Sales for the month 651 41 71 703 hds. Sales for month 889 67 17 1,474 hds. Exports for the month 1,845 hds. For the month, 2,742 hds.

At New Orleans:—Receipts from Jan. 1 to June 12, 1880, 2,023 hhds, against 1,146 hds in 1879; sales this month (June 12) 128 hds; exports: foreign, 81 hds; domestic, 25 hds, against 106 in 1879; stock on hand and on shipboard not cleared June 12, 1,313 hds.

Virginia Leaf.—The sales of Virginia leaf have embraced dark wrappers and smokers. The supply now here affords opportunity for good selections, but manufacturers do not seem to be greatly in want of additional stock at present.

Seed Leaf.—Though the Seed leaf market appears to have been quiet, a large aggregate amount of sales is reported, the footing showing 3,177 cases, subject to the explanation given below by Messrs. Gans' Son & Co. The outlook for the trade is exceedingly promising, the 1879 tobaccos, as far as examined, indicating usefulness in all respects, and of exceptional value. A competent judge, and a large exporter as well as dealer, gave us as his opinion the assurance that the crop was the best we had had for several years. Both for home and foreign trade there is going to be later on a brisk demand for the 1879 tobacco, as there is no old stock of consequence behind it, and as the principal markets abroad are unusually bare of supplies.

S. S. Box & Co., tobacco brokers, 84 & 86 Wall Street, report as follows:—

Our list of sales below would lead one to suppose that great activity has prevailed; such, however, has not been the case. Although our market is moderately active, part of the transactions noted have been previously made, and are but recently given to the public. We partitionize:—

1879	1880	1881	1882	1883	1884
1					

nante Vega, well known as an excellent quality of tobacco, and some fine goods in the cigar line may be expected.

The exchange market shows increasing firmness; rates advancing. Quotations are as follows:—

£ 60 days, 15¼ to 15½ per cent.; New York, 60 days, 4½ to 4¾ per cent.; New York, 3 days, 5¼ to 5½; Marks, 60 days, par—¼ per cent.; France, 60 days, 2 to 2¼; Spanish gold, 228.

Messrs. J. F. Bernades & Co.'s tobacco report of June 12 says:—Comparative statement of tobacco and cigars shipped from Havana.—

1880		1879	
Tobacco.	Cigars.	Tobacco.	Cigars.

Tobacco—Vuelta Abajo—Rain has at length replaced the pertinacious drouth which has proved so destruc-

tive to this year's leaf. During nearly the whole of the past month we have been treated to torrential showers of rain, and although it ceased for a few days at the end of last and commencement of the present month, it is now at it again, just as if there had been

As the leaf was already cut and housed, the only benefit received by the farmers from the atmospheric change, (so far, at least, as the tobacco is concerned,) was that it absorbed sufficient moisture to allow of its

The anxiety of dealers to buy up the leaf in "cujes" has continued unabated. The greater part of that raised in the Rio Hondo districts has been disposed of in this

manner, at prices ranging from 8 to 16 rials (in Spanish bank notes) per average matul, including both wrappers and fillers; and for the yield of some fancy vegas as high as 14 and 16 rials gold per average matul have been allowed, according to the quality and

condition of the leaf. On the other hand, we have not noticed any inclination on the part of our manufacturers or dealers to contract vegas as was heretofore their usual practice. So far, very few indeed are known to have met with customers: these few (as a rule) are

Several *escojidas* (assorting houses), established in the *Vuelta Abajo*, have already commenced the selection of the best customers, these few (as a rule) are situated in the Lomas districts, where only something like decent tobacco, suitable for the requirements of our manufacturers, can be looked for this season.

the Vaena Rioja, have already commenced the selection of the leaf; fillers, as customary, are the first to come forward, especially the lower classes, some of which may be expected to reach our market during the course of the month, but arrivals of any importance cannot be expected before the 1st of July.

Partidos—Since our last issue the owners of one escojida have commenced operating, buying up the trifling yield from the farmers, allowing from 16 to 24

the course of the month, but arrivals of any importance cannot be expected before the end of July or beginning of August.

escocida have commenced operating, buying up the trifling yield from the farmers, allowing from 16 to 24 rials Spanish Bank notes per matul of wrappers, and from 6 to 8 rials per matul of fillers, prices which we hardly think are warranted by the quality and condition of the leaf, which will yield this season an unusually large proportion of Botes.

One lot of new leaf, consisting of 105 bales, mostly fillers, has already come forward from Guanajay.

Remedios—This province has continued to be the pet

Yara—Next to Remedios, this has been the favored province this season; it has consequently been invaded by speculators and dealers, and, as a natural consequence, the pretensions of the farmers have exceeded all bounds, though not warranted by any fine extra quality of the leaf. Prices, instead of opening at from \$30 to \$40 per quintal, in preceding years, are now at present to be had from \$80 to \$90, per quintal.

Market and Stock.—Trade in the above provinces

Prices are not fully maintained, but in some instances are somewhat higher, particularly for fine Vuelta Abajo fillers, which are very scarce and eagerly sought after by our manufacturers.

Sales and prices.—About 2,000 bales of Remedios changed hands at prices ranging from \$42 to \$48 gold per qtl. Partidos fetched \$40 to \$43 gold per qtl. and Vuelta Abajo fillers \$50 to \$70 gold per qtl.; low fillers brought in from \$24 to \$32 gold per qtl. for export, as well as for the use of cigarette manufacturers. The transactions in old leaf amounted to about 5,000 bales, the buyers for the Spanish contract having allowed from \$5 to \$20 gold per qtl., according to quality and condition of the leaf.

Cigars.—The demand is anything but active, yet the voluntary limitation of production at many factories prevents the accumulation of stocks. The production of cheap cigars of superior workmanship and quality to the customary run of such goods has been quite a feature in the trade this season. The Partido wrappers employed have given the cigars a very handsome appearance, whilst some of the mixtures of old and new fillers have been very successful.

Rates were pretty steady during the past month, but owing to the scarcity of paper offering, have advanced within the last 24 hours, closing with a rising tendency. We quote:—

LONDON—Grant, Chambers & Co.'s monthly says: Since our last report there has been but little business done in American tobacco, and the sales of the month sum up but a trifling total. For some time past letters from the States have reported that much injury was being done to the crop by ravages of the bug, and during the month several telegrams have been received by the chief importers confirming these statements, and notifying that crop prospects are very bad. This has produced a firmer tone in the market, and should

the damage to the series as reported, there will be less inclination on the part of holders to make even the most trifling concession on top prices; in some of the lower grades higher rates are already demanded. In Substitutes there has been a good business done, and for such as are in dry condition rather better prices have been obtained. The supply of good useful descriptions is far from abundant. For cigar tobacco of good quality there are numerous inquiries, but little of desirable character to be had. Imports, 725 hhds;

deliveries, 99,444 hds, against 862 hds in the corresponding month of last year; stock, 27,935 hds, against 28,663 hds in 1877; 20,101 hds in 1878; 14,235 hds in 1877; 11,560 hds in 1876; 15,123 hds in 1875; and 12,573 hds in 1874. Virginia leaf and strips—The former when of good light color and sound condition is in fair demand; for the latter there have been numerous inquiries, more particularly for the medium and lower grades, both holders are rather firmer, and it is reported some parcels have been withdrawn from the

market. Kentucky and Missouri leaf, unless possessing good light color, is slow of sale. Strips have been sparingly dealt in, holders being rather more firm owing to the late unfavorable reports of the growing crop. Maryland and Ohio—The former continues to be but little sought after; the latter is readily placed when of good light color and in dry condition; the brown and mixed grades are slow of sale. Havana cigars are without change. Only the finest descriptions are sought after; some of the old imports have of late

been in most favor. Manila cheroots and cigars are difficult to place, even when offered at low prices as at present. Havana, Cuba and Yara—For the former there has been a more general inquiry, but few transactions have taken place; in the two latter growths there is nothing to deal in. Manila tobacco—Nothing of any importance has occurred. Turkey—Fair light color for cutting is much wanted; mixed and ordinary classes are nearly unsalable. Latakia scarcely asked for. Negrohead and Cavendish—The demand is tri-

HAMBURG.—Our Hamburg correspondents, in their monthly circular, report that transactions in Seed leaf during the past month were confined to 28 cases received and 40 cases sold. Prices were quoted:—Wrappers, 200 pils; binders, 50 to 80; fillers, 35 to 50. The amount of stock on hand was 555 cases; receipts since the 1st of January 833 cases. There were during the month no transactions in Havana leaf recorded. Stocks on hand, 2668 cases. Prices were quoted—Wrappers, 340 to 1200 pils; binders 175 to 375; fillers 150 to 250.

—From Holland it is reported that owing to falling crops and lower prices during the past two years, tobacco growing is decreasing.

FILES & FREY. Packers and Dealers in Pennsylvania Leaf Tobacco, 61 and 63 North Duke Street, LANCASTER, PA.

THE ADVANTAGE OF READING A FIRST-CLASS PAPER—
An agent of THE TOBACCO LEAF, while in Poughkeepsie, called upon Messrs. Eastman & Luce, cigar manufacturers and wholesale dealers in manufactured tobacco—a house that stands among the best in its section of the country. Mr. Eastman told our agent that he would not be without THE TOBACCO LEAF on any consideration, and mentioned that he obtained a benefit from the first number he received, when he began his subscription some eight or ten years ago, which fully compensated him for all the money he had expended in subscribing for it since. He said that he had long had a desire to ascertain the name and address of the manufacturer of a certain brand of tobacco, and on taking up the first copy of THE LEAF he had ever seen, he observed the advertisement of the maker of this brand; and in this way THE TOBACCO LEAF proved to be of much pecuniary advantage to the firm. As a moral, we may say that THE TOBACCO LEAF is shown by such incidents as these to be beneficial not only to its readers, but to those who advertise in its columns.

—A resident of Frogton, in some part of Pennsylvania, says an exchange, had a little unpleasantness with his wife a day or two ago, and to have revenge proceeded to his tobacco patch and destroyed about five hundred plants he had just set out. The writer adds:—He felt better after performing this extraordinary feat, but is now lamenting over the fact that he will be minus a good-sized tobacco crop.

—At the Methodist Conference in Pittsburgh lately, Dr. L. Bates offered an amendment to the report on ministerial education, that the question, "Will you abstain from tobacco?" be stricken out. The Conference refused to accept the amendment, and the report was adopted as read.

—From Florida it is reported that tobacco plants there are thrifty and in full bloom.

Special Notices.

Tobacco Factory for Sale.

The Tobacco Factory, Nos. 12 and 14 Exchange Street, the only one in the city of Buffalo. The Machinery consists of one 12-horse power Stationary Engine and Boiler, one No. 3 Pease Cutting Machine, Dayton O. 7 one large Grindstone and Hangings, Shafting, Pulleys, Belting, Tables, etc., and all necessary machinery complete for manufacturing all grades of fine cut chewing and smoking tobacco; machinery first-class.

There is no better opening for a manufactory in Western New York.

For particulars, address M. E. MEYER, 800-807 14 Exchange St., Buffalo, N. Y.

Wanted.

BRADSTREET'S

A SEMI-WEEKLY JOURNAL
DEVOTED TO
Trade, Commerce, and Finance.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND RELIABLE CORRESPONDENCE, furnished by experts expressly for this journal, from all the principal trade centres of this country is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extent.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the times.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION of this journal being among the best merchants, manufacturers and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations and business firms who wish to keep their names before the commercial world.

Published by THE BRADSTREET CO., 279, 281, 283 BROADWAY, NEW YORK.

Twelve Dollars per year.

The Attention of Cigar Manufacturers

is respectfully called to our Large Stock of FINE RE-SWEATED 1878 PENNSYLVANIA WRAPPERS. The quality of these tobaccos is greatly enhanced by our Resweating Process, which is wholly a NATURAL one, being entirely FREE from dyes and chemicals. Of splendid dark colors, these goods are also excellent in quality and burn well. Manufacturers of fine cigars will find this stock particularly well adapted to all their requirements. BARKER & WAGNER, 779-781 29 S. Gay St., Baltimore, Md.

\$100 Reward

Paid to any one giving information of Parties Infringing on our Patents.
Our new Improved Process for Re-Sweating Tobaccos a positive success! Flattering testimonials received from the most eminent Tobacco Dealers and Cigar Manufacturers who have adopted our process. Every Dealer and Manufacturer should have a Sweat-Room fitted up under our process on their own premises. This is the best and cheapest process in existence, and the only sure way to obtain dark colors. Full particulars as to terms, which are reasonable, and circulars mailed on application. Send us a case for trial under our new process. C. S. PHILIPS & CO., 188 Pearl St., New York, 131 & 133 N. WATER ST. PHILADELPHIA, PA.

JACKSON'S BEST!
PETERSBURG, VA.
At the CENTENNIAL EXPOSITION, September 27, 1893,
THIS TOBACCO WAS AWARDED
THE HIGHEST PRIZE.

We call especial attention to the manner in which our Packages are put up, that neither Dealer nor Chewer may be imposed upon by purchasing other goods, thinking he is getting ours. Every But and Caddy has "JACKSON'S BEST" impressed into it by a die. Every Plug has our Trade-mark strip. "JACKSON'S BEST" as per diagram annexed. TRY IT UNDER OUR GUARANTEE, and if not found to be all that we represent it, we will PAY FREIGHT BOTH WAYS.
SOLD BY ALL LEADING JOBBERS THROUGHOUT UNITED STATES.
