Note to Contributors
1. Papers should be submitted online at http://scholarcommons.usf.edu/ijs through the "Submit Article" link. Texts should be typed 1.5 line spaced and have continuous numbered lines, preferably using Times New Roman 12 pt font, and should contain all figures, tables or plates. Tables, plates, and figures, with captions, should be placed after the reference list using the format of UIS (see most recent issues). For the review process, all figures and/or plates should be of low resolution to keep the final at a reasonable size.

2. Figures, plates, and tables should be sent at full resolution only after the review process is completed, and then in separate files (e.g. Fig1.jpg or Fig1.tif, Tab1.doc or Tab1.xls). To do so, highlight “Supplemental Files” while submitting your revised manuscript, then upload your supplemental files and their short description. For long tables, MS Excel should preferably be used. If a paper has more than one figure, it should be sent separately as a good-quality jpg file.

3. Papers should preferably be written in English. Authors using a language other than their own are requested to have their manuscripts checked for linguistic correctness before submission. SI system units should be used. Dates should be in the form “5 February 1975”, numbers as 21.6ºC (and not 12.6ºC). Complex sentences may be split into several parts. Abstracts should be short and summarise the contents of the paper.

4. Figures should be headed by a title, the full name(s), business address(es) and e-mail address(es) of the author(s), plus full details of post(s) held by the author(s, if appropriate). If a paper has more than one author, the name of the person to whom correspondence and proofs should be sent must be followed by *. Abstract should be at least 250 words.

5. Manuscripts should not be longer than 30 printed pages (12 double-spaced typewritten pages). Authors should provide five keywords after the abstract. Keywords are separated by a ; . Articles can be structured in 3 orders of headings: e.g. GEOLOGY, Lithology, mineralogical characteristics. See recent issues for examples.

6. Each paper will be subject to editorial review by three referees. The Editorial Staff reserves the rights to refuse any manuscript submitted, whether by invitation or otherwise, and to make suggestions and modifications before publication. Submitted papers should be in a final form ready for publication. Make sure figures are of good quality. Corrections to proofs should be restricted to printing and editorial errors only. Other than these, the cost of any substantial alterations may be charged to the author(s).

7. Bibliographical references should be listed in alphabetical and chronological order at the end of the paper. Journal names should not be abbreviated. See most recent issues for examples. References should be included in the following formats:

8. Each after the review process is completed, each table should be supplied in separate files. Tables should be numbered using Arabic numbers, e.g. “Table 1”, etc. Should a table not be an original, a full reference to its previous publication should be quoted. Tables should be supplied with appropriate captions, and kept as simple as possible.

9. After the review process is completed, color figures should be supplied in separate files. Figures should be numbered using Arabic numbers, e.g. “Fig. 1”, etc. and must be cited in the text close to where they are intended to be placed. Graphs and diagrams should be reduced for a reduction to the Journal format. Figures and photographs should be supplied with appropriate captions, and kept as simple as possible. Please use same font size when generating your figures or plates.

10. Letters to the Editorial Staff should relate to single topics, provide comment on editorial policy or discuss the content of the International Journal of Speleology, or be responses to comments published in earlier issues of the Journal.

11. Articles accepted by the Editorial Staff will become the property of the Publisher and may not be reprinted or translated without the written permission of the Publisher.

12. The Editor and the Publisher of the International Journal of Speleology are not responsible for the scientific content or other statements provided by the authors of accepted papers.
