It has been accepted for inclusion in Florida Field Naturalist by an authorized editor of Digital Commons @ University of South Florida. For more information, please contact digitalcommons@usf.edu.

NEW FOS SPECIAL PUBLICATION

The Breeding Birds of Florida by Glen E. Woolfenden, William B. Robertson, Jr., and James Cox, 2006. Florida Ornithological Society Special Publication no. 7: ii + 142 pp., 22 figures, \$12.

The two papers in this monograph, plus the information on the Florida Fish and Wildlife Conservation Commission's web site, represent the only publicly available information on Florida's Breeding Bird Atlas (BBA), the largest natural history undertaking in the history of Florida.

In Part I, Glen Woolfenden and Bill Robertson lay the foundation for interpreting the Florida BBA by reviewing the biogeography and recent history of Florida's breeding birds. In Part II, Jim Cox uses data from the Florida BBA to examine relationships between the present breeding bird distribution and various climatic and habitat variables. His analysis indicates recent distributional changes and highlights areas with concentrated occurrences of rare and declining species.
