Mist nets made in the USA

Have a
great season
afield!

Here's why: Double tethering resists the wind. Unbreakable braided trammels fight sagging and reduce trammel rolling. Stay-tight knots keep trammels even. Large, durable loops are made of rot-proof nylon. Baggy, resin-free construction provides maximum catching power. Cost effective. Master crafted with care by Marj and Don.

New Products: Rotring technical pens by Koh-I-Noor. Take archival field notes using traditional India ink in a modern, reliable, well-mannered writing instrument.

Also: Imported Mist Nets - Precision Spring Scales - Aircraft Aluminum Net Poles Wing Rules - Leg Gauges - Bird Bags - A C Hughes Colored Leg Bands - Headlamps Carbon Fiber Calipers - Magnifiers - Books - Banding Pliers - *Rite in the Rain* products.

Manomet, MA USA 02345

Our black, tethered, nylon nets are the best grade we can obtain in Japan. We carry 6 and 12m styles, in a variety of mesh sizes. All our thread weights are 70 denier or higher, for maximum durability and less tangle of birds. Contact us for further details and price list.

100% of AFO mist net profits are spent on activities of the Association of Field Ornithologists, including publication of the 'Journal of Field Ornithology,' and annual research grants to amateurs and students via Bergstrom Awards. Your purchase of mist nets through AFO makes a lasting contribution to the ornithological community.

MacBand v. 4.0 S

New version of the only software for the **Macintosh** that stores, views, analyzes, and summarizes banding data, and generates **schedules acceptable to the Banding Lab**. A "stand-alone" application, **requiring no additional software**. Two formats available: S10 for monitors smaller than 13" diagonally, and S13 for larger monitors. Both come with an on-line "User Manual," tutorial and dual system of data entry—"band card" and "record card"—to increase data security. Automatic entry of data, with fewer errors than committed with manual logging, and analysis of distribution by season, returns, and age ratios. Provision for entry of aging, sexing, and identification keys and summary data on banding and status of species at your station.

New features in this release: on-line help, elimination of need to customize scripts and "purge" fields, addition of "user fields," provision for up to 81 locations and all 22 of the Lab's band sizes, default entries for repetitive banding of same species and at same location.

To order, specify format and send check for \$80. to Wesley E. Lanyon, P.O. Box 531, Keene Valley, NY 12943. (518)576-9714.

Users of earlier versions can upgrade for \$15.
