Original papers

Giovanni Badino

Geothermal flux and phreatic speleogenesis in gypsum, halite, and quartzite rocks 1-11

György Czuppon, Attila Demény, Szabolcs Leél-Össy, Mihály Óvari, Mihály Molnár, József Stieber, Klaudia Kiss, Krisztina Kármán, Gergely Surányi, and László Haszpra

Cave monitoring in the Béke and Baradla caves (Northeastern Hungary): implications for the conditions for the formation cave carbonates 13-28

Jean-David Moreau, Vincent Trincal, Daniel André, Louis Baret, Alain Jacquet, and Michel Wienin

Underground dinosaur tracksite inside a karst of southern France: Early Jurassic tridactyl traces from the Dolomitic Formation of the Malaval Cave (Lozère) 29-42

Eugen Nitzu, Marius Vlaicu, Andrei Giurginca, Ioana N. Meleg, Ionut Popa, Augustin Nae, and Ștefan Baba

Assessing preservation priorities of caves and karst areas using the frequency of endemic cave-dwelling species 43-52

Alan R.L. Albuquerque, Rômulo S. Angélica, Daniele F. Gonçalves, and Simone P.A. Paz

Phosphate speleothems in caves developed in iron ores and laterites of the Carajás Mineral Province (Brazil) and a new occurrence of spheniscidite 53-67

Luis M. Mejía-Ortiz, Tanja Pipan, David C. Culver, and Peter Sprouse

The blurred line between photic and aphotic environments: a large Mexican cave with almost no dark zone 69-80

Kim Genuite, Yves Perrette, and Stéphane Jaillet

Flowstone growth in Gournier River (Vercors, France): a diachronic landscape analysis by 3D modelling and photo draping 81-91

Duc A. Trinh, Quan H. Trinh, Angel Fernández-Cortés, David Matthey, and Javier G. Guinea

First assessment on the air CO₂ dynamic in the show caves of tropical karst, Vietnam 93-112

Rapid Communication

Virgil Drăgușin, Laura Tîrlă, Nicoleta Cadicheanu, Vasile Ersek, and Ionuț-Cornel Mirea

Caves as observatories for atmospheric thermal tides: an example from Ascunsă Cave, Romania 113-117
