**CORRECTION: COORDINATES FOR A BANDED
NORTHERN CARACARA (*Caracara cheriway*)**

In our recent article “A new longevity record for the Northern Caracara (*Caracara cheriway*) in Florida” (Florida Field Naturalist 44:26-28, 2016), the longitude of the location where the caracara was originally banded, in March 1994, was erroneously reported as W 85° 01'. The correct location where this caracara was banded in 1994, and then photographed in 2015, is N 27° 28', W 81° 01'. — *Joan L. Morrison, Brian K. Schmidt, and Steven M. McGehee*
