This Western News is brought to you for free and open access by the Searchable Ornithological Research Archive at Digital Commons @ University of South Florida. It has been accepted for inclusion in North American Bird Bander by an authorized editor of Digital Commons @ University of South Florida. For more information, please contact [digitalcommons@usf.edu](mailto:digitalcommons@usf.edu).

networks have many millions of accessible data records through herculean efforts such as MAPS (Monitoring Avian Productivity and Survivorship) and LaMNA (Landbird Monitoring Network of the Americas).

While these data networks link Observatories and provide opportunities to examine patterns at scales greater than single locations, they would benefit greatly from inclusion of sizeable datasets that have not yet been entered. For example, I recently discovered through our data-archiving efforts at LaMNA, about 100,000 unentered landbird banding records from nets and traps at the Austin Ornithological Research Station near Wellfleet on Cape Cod between 1930 and 1957. Entering them

now is a lot cheaper than paying for a time machine to go back and sample the birds again!

Such "heritage" data sets are potential treasure troves of information, extending our knowledge back in time and providing a baseline analog for today's rapidly changing world. These data need to be sought out, entered, and archived for future generations and scientific endeavors into this newish century. If you know of any such hidden treasures, please let us know.

**C. John Ralph**, WBBA President  
Arcata, California (cjralph@humboldt1.com)

WBBA ANNUAL REPORT OF BIRDS BANDED, 2010													
A summary of banding with USFWS/CWS bands reported from WBBA area for 2010													
compiled by:													
Walter H. Sakai, Santa Monica College, 1900 Pico Blvd, Santa Monica, CA 90405													
sakai_walter@smc.edu													
Codes in the HIGH BANDER column refer to the list of individuals or institutional banders.													
Numbers in ( ) are individual totals													
Upon request we can supply a list of all banders for a species or the results with AOU# and/or species codes													
Species	Alpha Code	MX	HI	AK	YU BC	NWT AB	WA/OR ID	CA	NV UT	MT/WY CO	AZ NM	Total	High Banders
Emperor Goose	EMGO				81							81	U21(81)
Greater White-fronted Goose	GWFG				2072		1143					3215	U18(2014), C17(1143), U23(58)

## WBBA 2010 Banding Summary

The last several banding years have shown a rebound from prior years when the number of banders reporting their banding efforts and the number of birds banded had been declining. The number of Master Banders reporting banded birds in 2010 stayed the same as in 2009 with 164 reports. The total number of birds banded continued to rise in 2010 with 177,108 birds from 170,714 in 2009 and 160,106 in 2007. There were 73 reports of no banding in 2010. We had the highest number of recognized taxa banded with 497 taxa (includes BBL recognized subspecies, races, hybrids, and such). A good portion of this spike of almost 25% from 2007 was due to reports from Mexico.

In order to keep taxa together and to keep up with changing taxonomy, I prepared the bander's submission Excel spread sheet to include the AOU#'s, alpha codes, and the 2009 AOU phylogenetic sequence (numbers) for ease of data entry. About half of these "new" birds to the list do not have American AOU#s and were placed at the

end of the list. This has precipitated a change in the Excel file used to submit the data and may eventually change the presentation of the numbers in the future. However, I used the AOU# to present this reports as in past years.

Some personal highlights include the astounding 14,456 Tricolored Blackbirds banded (and color banded) by Robert Meese, a researcher at UC Davis. Manuel Grosselett in Mexico and Point Reyes Bird Observatory along the central Californian coast tied for the greatest number of species banded in 2010 with 142 species. I hope that this upward trend from 2007 to 2010 continues next year.

I have also been accepting late submissions and errata, which can not be added to the *NABB* published list but can be added to the posting on the WBBA website.
