third weekend in September. Visitors from 10 states signed our Visitor's Book this fall, as well as guests from Denmark, Scotland and South Africa.

Our fall Research Assistant was Ryan Kayhart, and Jenna Holzschuh was our Field Assistant/Data Tech. Special thanks to volunteer Jeanne Verhulst who helped with data entry.

Thanks to Tom Muller for mowing paths and to Jim Gillette for mowing the field; and to Sue Dougherty, Lyn Jacobs, Willie Norton, Rosemary Reilly and Doug Smith for their help with habitat maintenance. Special thanks to Allan Nash for spreading truck loads of wood chips on our trails. Appreciation to the following individuals who helped scribe, tend net lanes, or assisted with other aspects of our educational or banding operation: Aidan & Madeline, Bob Ames, John Boettcher, Jane Capellupo, Mark Catlin, Barb French, Marilyn Guenther, Kathy Habgood, Gary Herbert, Chita McKinney, Shirley Meston, Terry Perry, the Podulka family, Rosemary Reilly, Sonya Rooney, Lee Schofield, Ruth Stork, Alice VandeMoere, Tom Verhulst and Willem Windig.

A special thank you goes to Bill Kaiser, Nancy Britton and The Genesee Land Trust for permission to band on their land.

Alfred Station **421-0774**
Allegany County, NY

The 38th year of fall banding at Alfred Station began on 22 Jul and ended on 5 Nov. One 12-m net and one 6-m net were used on 28 days for a total of 235.5 net hours. A total of 95 birds of 25 species were banded (40.3 b/100nh). In addition, six Ruby-throated Hummingbirds were captured and released unbanded.

The peak day occurred on **30 Oct** when **14 birds** were banded; **21 Oct** was also the day with the most species diversity (**8 species**). There were 26 repeats, and four returns—all chickadees from previous seasons, the eldest two being in their fourth year.

Hippoboscids were found on two birds; a Song Sparrow with Avian Pox was released unbanded.

As in previous years, no birds were banded at this location between 8 Sep and 10 Oct when I was banding at Braddock Bay Bird Observatory.

Banding summaries were sent to regional compilers for the Allegany County Bird Club and the Buffalo Ornithological Society. A program on bird banding was presented to senior citizens in the town of Richburg, NY, in Jul 2014.

This is an abbreviated report for the fall AFR 2014 due to illness and a very busy work schedule. Nevertheless, I tried to band throughout the fall season.

I started banding on 6 Aug and finished on 9 Nov. The temperature and rainfall were about average through mid-Sep. I encountered one of the first cold fronts in September when I banded the most birds I had for this season: nineteen, for the top day in 2014.

I caught and banded 30 species. Gray Catbirds held their first spot with Dark-eyed Juncos taking over the second spot for the first time since I have been banding at this location. More and more Dark-eyed Juncos seem to be breeding locally in the spring and summer months. This species is present at my bird feeders year around. Warblers are becoming a rarity at my station, with only five species banded this season.

I had seven recaptures: two Gray Catbirds, two Blue Jays, one American Goldfinch, and two Black-capped Chickadees. One Gray Catbird was two years old; the other was a year old. One Blue Jay was seven years old the other was two years old. Of the two Black-capped Chickadees, one was a year old the other was a repeat. The American Goldfinch was four years old.
